

BEHV 3010 HEALTH PSYCHOLOGY

Credit Points 10

Legacy Code 101193

Coordinator Tania Perich ([https://directory.westernsydney.edu.au/search/name/Tania Perich/](https://directory.westernsydney.edu.au/search/name/Tania%20Perich/))

Description Health Psychology is a branch of psychology concerned with the inter-relationship between psychological factors and physical health. It addresses such issues as the possible role of psychological characteristics in health maintenance and promotion, and in the development of illness. Other aspects include reactions to illness, the contribution of psychology to treatment, and explicit means by which health-relevant behaviours might be modified. This subject provides an introduction to Health Psychology and covers theoretical and research issues, the nature and management of stress and pain, issues concerning the receipt of health care and a selection of specific health problems.

School Psychology

Discipline Behavioural Science

Student Contribution Band HECS Band 4 10cp
