

NURS 7011 CHILDBIRTH IN THE AUSTRALIAN CONTEXT

Credit Points 20

Legacy Code 401089

Coordinator Leanne Luck (<https://directory.westernsydney.edu.au/search/name/Leanne Luck/>)

Description This subject provides students with the knowledge to work, using a primary health care approach, with women and their families during childbirth including the transition to parenthood. Emphasis will be placed on the biological, psychosocial and cultural aspects of the pregnancy, birth and the postnatal period and understanding of the role of the midwife in maintaining a woman and family focus within a continuity of care model. The neonatal period will also be examined. Childbirth in our culturally diverse maternity health system will be explored, investigated, analysed and discussed with a specific focus on Aboriginal and Torres Strait Islander peoples. This will include the history of Aboriginal and Torres Strait Islander peoples and how events in history have impacted on their health and birthing practices. Experiences of women from other countries and cultures will be examined.

School Nursing & Midwifery

Discipline Midwifery

Student Contribution Band HECS Band 1 20cp

Level Postgraduate Coursework Level 7 subject

Restrictions

Students must be enrolled in 4697 Graduate Diploma in Midwifery and be a registered nurse employed in a participating NSW Health Local Health District facility in the position of a midwifery student.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Critically analyse and explain the role of the midwife, within a continuity of care framework, in the provision of care to a woman and her family including knowledge of the legal and ethical issues related to the woman and her newborn/s
2. Apply knowledge of the biological, physiological, psychological and social needs of women pre-conceptually, during pregnancy, labour and birth and the postnatal period to facilitate an optimal experience for the woman including transition to parenthood;
3. Critically analyse the impact of birth on a woman's sense of self and her emotional, psychological, social and cultural needs and those of her newborn and her family
4. Apply knowledge of the principles of adult learning, primary health care and public health policy to facilitate opportunities for health promotion with the woman, her family and community particularly relating to Aboriginal and Torres Strait Islander women
5. Critically evaluate the socio-cultural, economic, political and personal context of infant feeding decisions in Australia
6. Critically analyse historical events that have impacted on the life and c
