

BEHV 0008 PSYCHOLOGICAL FOUNDATIONS OF HEALTH (WSTC)

Credit Points 10

Legacy Code 900123

Coordinator Ryan Sidoti (<https://directory.westernsydney.edu.au/search/name/Ryan Sidoti/>)

Description This subject provides an introduction to the psychology of health and behaviour relevant to understanding patient health decisions and outcomes. Students will be introduced to psychology and health to understand the tradition and relevance of psychology to nursing. This subject also includes foundation topics such as models of health and illness, health-behaviour change models, risk-taking behaviour, stress and health, learning and conditioning, personality and health, human development over the lifespan, death and dying, as well as group dynamics in health. These topics are offered as basic principles, theories, and models of psychology related to health behaviours, future learning, and professional practice in nursing.

Restrictions

This subject is only available to College students enrolled in the Undergraduate Preparation Programs.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Apply basic terminology, principles, theories, and models of psychology to account for health decisions and behaviours.
2. Reflect on personal health decisions and behaviour and relate this to psychological principles introduced in this unit.
3. Demonstrate a foundational understanding of individual and group differences and the impact of these when working with people from diverse backgrounds.
4. Effectively present thoughtful, considered views, arguments and information in written and oral formats, and
5. Apply group dynamics principles for effective team work and group management, along with the ability to monitor one's own work and others' work and performance.
