Description This is an engaged subject that requires students to undertake real-world projects to support selected industry or community partners. The subject blends in-class and online activities as well as individual and group work, with self-directed problem-based learning. The focus of students' learning is on sustainable business, including the economic, social and environmental dimensions of business. The in-class workshops support students to conduct the required engagement activities with industry or community partners. As a third-year subject, attention is given to students' application of the knowledge and skills already acquired in their degree programs, and on the practice of business management skills.
