

ENGR 1041 DESIGNING FOR USER EXPERIENCE (UX)

Credit Points 10

Legacy Code 301284

Coordinator Mauricio Novoa ([https://directory.westernsydney.edu.au/search/name/Mauricio Novoa/](https://directory.westernsydney.edu.au/search/name/Mauricio%20Novoa/))

Description Understanding product-oriented user requirements and mapping user experience journeys provide rich inputs for new product and service innovations. In this subject students will focus on user needs and the interactive elements which, when combined, create successful user experiences through impactful user interfaces, and highly differentiated outcomes. Students will engage in an applied project in response to an interaction design challenge. As part of their project students will incorporate elements to evoke strong emotional, sensorial and functional connections which are essential in creating inclusive design, engaged usability, and high-quality human-centred experiences, for successful products and services.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Conduct research on user perception of utility, ease of use, efficiency and effectiveness of products and services
2. Design user experience using research data and through testing
3. Communicate findings to diverse audiences in a range of formats
4. Follow an iterative user design process using a set of techniques

Subject Content

1. Contextual Inquiry
2. Human-Centred Design
3. User Research
4. Interaction Design
5. Experience Strategy
6. Information Architecture
7. Experience Prototyping

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.
