

HUMN 1015 DEVELOPMENT AND SUSTAINABILITY

Credit Points 10

Legacy Code 101572

Coordinator Julie Wen ([https://directory.westernsydney.edu.au/search/name/Julie Wen/](https://directory.westernsydney.edu.au/search/name/Julie%20Wen/))

Description The subject introduces the basic concepts relating to sustainability and development, and explores their relevance to real-world situations at the local, national, and global levels. The causes of unsustainability as well as their short-term and long-term effects on society and the environment will be evaluated. Students will analyse, using appropriate sustainability indicators and social change theories, a social change initiative (i.e., program, project, policy) designed to integrate the socio-economic, cultural and environmental dimensions of sustainability within the context of a specific developmental focus (e.g. poverty alleviation, gender equality, human/social development, heritage conservation, biodiversity, tourism, green accounting, sustainable livelihoods). Students will engage in problem-based learning skills in order to critically analyse and discuss current issues in development, and provide solutions to sustainability.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Identify the core concepts and practice of sustainability and development
2. Identify and assess current issues/problems in achieving sustainable development, including their causes and impacts
3. Apply theories in the sustainable practice of various types/categories of development (i.e. social, cultural, economic, environmental)
4. Apply sustainable indicators in the analysis of social change initiatives designed to promote sustainable development
5. Demonstrate skills in problem-solving, in oral and written communications

Subject Content

1. Core concepts/theories about sustainability and development
2. Major issues concerning the sustainability of developmental initiatives and their effects on the socio-economic and cultural aspects of society
3. Major issues concerning the sustainability of the natural environment
4. Evaluation of social/cultural, environmental, and economic elements of development for sustainability
5. Alternative technologies and sustainable living/livelihoods
6. Basic social change theories and practice
7. Sustainability indicators of development at different temporal and spatial scales

8. Barriers to sustainability

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Type	Length	Percent	Threshold	Individual/ Group Task
Intra-session Exam	1000 words, 1 hour	40	N	Individual
Report	1800 words	40	N	Individual
Presentation	10 minutes per group, equivalent of 200 words per person	20	N	Group
