

PUBH 7027 SUPPORTING INDIVIDUALS AND COMMUNITIES IN CRISIS

Credit Points 10

Legacy Code 400838

Coordinator Lisa Wong ([https://directory.westernsydney.edu.au/search/name/Lisa Wong/](https://directory.westernsydney.edu.au/search/name/Lisa%20Wong/))

Description The planning, development and implementation of primary health care initiatives rest largely on the capacity of health care workers to develop and engage in partnerships with a diverse range of consumers, health care workers and organisations. In this subject, students will critically examine the complexities inherent in developing and sustaining effective and active partnerships with individuals and groups in primary health care contexts. Students will examine cultural and socio-political issues that shape multidisciplinary and trauma informed communication. Students will also explore how to plan for and respond to crises, emergencies, and disasters at an individual, organisational and community level.

School Nursing & Midwifery

Level Postgraduate Coursework Level 7 subject

Restrictions

Students must be enrolled in a postgraduate program.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Identify models of communication that guide the development of professional interpersonal relationships and partnerships with consumers and organisations in primary health care contexts.
2. Critically examine personal, cultural and organisational factors that influence the nature of interpersonal, interprofessional and organisational relationships in primary health care settings.
3. Identify and analyse specific theories regarding the structure, function and process of therapeutic communication and crisis intervention.
4. Identify the principles that underpin frameworks of disaster/emergency preparedness and response within primary health care contexts.
5. Examine the efficacy of selected frameworks of disaster/emergency preparedness and response in health care contexts.
6. Examine community, multidisciplinary and intersectoral relationships considered essential for effective disaster prevention, mitigation, preparedness and response.
