Health and Science Schools

Electronic Postgraduate Handbook 2014

University of Western Sydney

Units, courses, and arrangements for courses as stated in the postgraduate and undergraduate electronic handbooks (and any other University of Western Sydney (UWS) publications or announcements) are an expression of intent only and are not to be taken as a firm offer or undertaking.

UWS reserves the right to discontinue or vary its units, courses and announcements at any time without notice.

Information contained in this electronic handbook is correct at the time of production (March 2014), unless otherwise noted.

CRICOS Provider Code 00917K

In accordance with the Education Services for Overseas Students (ESOS) Act 2000, the University of Western Sydney (UWS) is registered on the Commonwealth Register of Institutions and Courses for Overseas Students (CRICOS), Provider Code 00917K.

Overseas students studying in Australia must comply with the requirements of the ESOS Act and the National Code. They should consult the Federal Government's Australian Educational International webpage for the description of the ESOS legislation and other relevant information. UWS International Postgraduate and Undergraduate Prospectuses and other promotional material specifically prepared for overseas students also provide information about CRICOS registered courses and conditions relating to study in Australia.

About the Health and Science Schools Electronic Postgraduate Handbook

Sessions and dates
There are two main sessions in 2014: Autumn and Spring. Weeks shown in the dateline refer to the session weeks for these main sessions.

The dateline is available at:
http://www.uws.edu.au/students/stuadmin/dateline.

Unit outlines
Brief outlines of all UWS postgraduate units listed in the course section are given in the second half of this electronic handbook.

The unit outlines give a brief overview of each unit. For some units this information is not available. Please check the UWS website for more recent information. For more information – details of textbooks, assessment methods, tutorial, group work and practical requirements – contact the unit coordinator.

More information on unit offerings can be found at: http://handbook.uws.edu.au/hbook/UNIT_SEARCH.ASP.

Unit not listed?
If the unit you are looking for is not in the alphabetical units section, consult your course coordinator for details or check the unit search web page for updated details on all units offered in 2014 at:
http://handbook.uws.edu.au/hbook/UNIT_SEARCH.ASP.

Prerequisites, co-requisites and assumed knowledge
Students wishing to enrol in a unit for which they do not have the prerequisites or assumed knowledge are advised to discuss their proposed enrolment with an academic adviser.

Where it is necessary to limit the number of students who can enrol in a unit through shortage of space, equipment, library resources, and so on, or to meet safety requirements, preference will be given to students who have completed the unit recommended sequence in the course.

Academic credit
In most courses, academic credit will be granted for previous studies. For example, UWS has a number of agreements with TAFE to grant credit for successfully completed TAFE studies. Seek advice about credit prior to, or at enrolment.

How to use this electronic book
The first part of this electronic book contains information about current postgraduate courses offered by the Schools of Computing, Engineering & Mathematics, Medicine, Nursing and Midwifery, and Science & Health. The next part contains details on current postgraduate unit sets in these courses, and the final part has details of all units within the courses.

The courses are arranged mainly alphabetically. If you know the course code, but not the name, consult the COURSE CODE INDEX.

The units are arranged alphabetically. If you know the code, but not the name, consult the UNIT CODE INDEX at the back of the electronic book.

Check website for updates
Every effort is taken to ensure that the information contained in this electronic book is correct at time of production. The latest information on course and unit offerings can be found at:
http://handbook.uws.edu.au/hbook/

University of Western Sydney

SCHOOL OF MEDICINE

Graduate Certificate in Allergic Diseases

4689.2

This course is designed for medical practitioners, particularly general practitioners and general paediatricians, who want to improve their care of patients with allergic diseases. Students must be registered medical practitioners. It combines an introduction to the scientific basis of allergic diseases and clinical aspects of allergy. Students will complete an online scientific program and attend a regional specialist Immunology Clinic, over a total period of two years.

Study Mode
Two years part-time.

Location

Campus	Attendance	Mode
Campbelltown Campus	Part Time	External

Admission
Applicants for this course must be qualified and registered medical practitioners (doctors).

Applicants who have undertaken studies overseas may have to provide proof of proficiency in English. Local and International applicants who are applying through the Universities Admissions Centre (UAC) will find details of minimum English proficiency requirements and acceptable proof on the UAC website. Local applicants applying directly to UWS should also use the information provided on the UAC website.

Special Requirements
Students must be registered medical practitioners, in clinical practice, and be able to access a regional specialist Immunology/Allergy clinic.

Course Structure
Qualification for this award requires the successful completion of 40 credit points including the units listed in the recommended sequence below.

Note: Please be aware that you are required to enrol in the units for both 1H and 2H sessions

Part-time (Start year intake)

Year 1

401063.1	Allergic Sciences

Year 2

401064.1	Clinical Allergy

Master of Surgery in Advanced Gynaecological Surgery

4690.1

This course is available to Advanced Trainees in Obstetrics and Gynaecology who are undertaking a Fellowship in Minimally Invasive Gynaecological Surgery Sydney West Advanced Pelvic Surgery Unit based at Blacktown Hospital. Students will undertake a program of theoretical and practical activities that will result in their graduation with advanced skills in laparoscopic pelvic surgery. The course will be undertaken while working at SWAPS and supervised by staff at Blacktown Hospital.

Study Mode
Two years part-time.

Location

Campus	Attendance	Mode
Campbelltown Campus	Part Time	External

Accreditation
While this program does not require accreditation the clinical component is accredited for advanced trainees in Obstetrics and Gynaecology by the RANZCOG (The Royal Australian and New Zealand College of Obstetricians and Gynaecologists). RANZCOG supports the program.

Admission

All students must be advanced Obstetric & Gynaecology trainees undertaking a Fellowship in Minimally Invasive Gynaecological Surgery at Sydney West Advanced Pelvic Surgery Unit or other accredited site.

Admission to this course is by invitation after appointment to the fellowship position in the hospital or other accredited site.

Special Requirements
All students must be registered medical practitioners undertaking a Fellowship in Minimally Invasive Gynaecological Surgery at SWAPS.

Course Structure
Each student will undertake eight units of study. Two units will be practicum and the student will undertake six of eight additional units.

The practicum units are

400993.2	Clinical Minimally Invasive Gynaecological Surgery 1
401057.2	Clinical Minimally Invasive Gynaecological Surgery 2

The additional units are

400996.1	Power Modalities
400995.2	Port Entry
400994.2	Laparoscopic Hysterectomy
401061.1	Pelvic Anatomy
401059.1	Gynaecological Surgery Ergonomics
401062.1	Pelvic Floor Function and Dysfunction
401058.1	Endometriosis

SCHOOL OF NURSING AND MIDWIFERY

Master of Child and Family Health (Karitane)

4682.1

The aim of the Master of Child and Family Health (Karitane) is to provide Registered Nurses and Registered Midwives with theoretical knowledge and associated skills that prepare them to work autonomously and across a variety of clinical settings with children and families. Graduates will be able to apply advanced nursing concepts and analysis and lead nursing practice to promote optimal health outcomes for children and families. This will involve among other things, design, implementation and evaluation of advanced clinical nursing care systems, analysis and synthesis of nursing concepts leading to a basis for advanced nursing practice and the facilitation of change.

Study Mode
Two years part-time.

Location

Campus	Attendance	Mode
Hawkesbury Campus	Part Time	Multi Modal

Inherent requirements
There are inherent requirements for this course that you must meet in order to complete your course and graduate. Make sure you read and understand the requirements for this course online.

Admission
Applicants must have:

Registered Nurse or Midwife (currently registered to practice with the Australian Health Practitioner Regulation Agency - Nursing and Midwifery). Any other type of registration (non-practicing, limited, or student) is not acceptable for this course

and

Successful completion of a Bachelor of Nursing, Bachelor of Midwifery or Bachelor of Health Science (Nursing)

or

Five years full-time equivalent recent (within the last 10 years) professional working experience

Applicants seeking admission on the basis of work experience MUST support their application with a Statement of Service for all work experience listed on the application.

Applications from Australian and New Zealand citizens and holders of permanent resident visas must be made via the Universities Admissions Centre (UAC).

Applicants who have undertaken studies overseas may have to provide proof of proficiency in English. Local and International applicants who are applying through the Universities Admissions Centre (UAC) will find details of minimum English proficiency requirements and acceptable proof on the UAC website. Local applicants applying

directly to UWS should also use the information provided on the UAC website.

Overseas qualifications must be deemed by the Australian Education International - National Office of Overseas Skills Recognition (AEI-NOOSR) to be equivalent to Australian qualifications in order to be considered by UAC and UWS.

Special Requirements
Special requirements are those stipulated by the NSW Health Department and UWS. These include: Prohibited Employment Declaration (PED); NSW Health Clinical Placement Authority (National Police Check); Adult Health Immunisation.

Course Structure
Qualification for this award requires the successful completion of 80 credit points including the units listed in the recommended sequence below.

Recommended Sequence

Part-time

Year 1

Autumn session

400971.1	Child & Family Health: Professional Practice and Frameworks
400972.2	Child & Family Health Practice: Supporting Growth and Development

Spring session

400830.3	Clinical Practice: Infant and Child Nutrition and Feeding
400831.2	Healthy Families and Communities

Year 2

Autumn session

400832.1	Partnership in Practice
400833.3	Perinatal Mental Health

Spring session

400206.2	Evidence-based Nursing

And one elective

Recommended electives

400834.1	Advanced practice: Infant and Child feeding and Nutrition
400835.1	Infant Mental Health

Graduate Certificate in Child and Family Health (Karitane) (exit only)

4683.1

The Graduate Certificate in Child & Family Health (Karitane) is an exit point for 4682 Master of Child and Family Health (Karitane).

Master of Mental Health Nursing (Nurse Practitioner)

4673.2

Students should follow the course structure for the course version relevant to the year they commenced. This version applies to students whose commencement year in this course is 2011 or later.

Nurse Practitioners are expected to be clinical leaders who work autonomously from a sound evidence base, instigate diagnostic investigations, prescribe medication within an approved formulary, and refer judiciously. Students of this course undertake units of study that will prepare them for the role of Nurse Practitioner in the specialist area of mental health. This study program incorporates areas of advanced health assessment, clinical leadership, evidence-based nursing, diagnostic skills, therapeutic management, psychopharmacology, evaluation and collaboration in care. Students also have the opportunity to complete specialist electives to suit their particular practice setting.

Study Mode

Four years part-time.

Location

Campus	Attendance	Mode
Parramatta Campus	Part Time	External

Accreditation

The Master of Mental Health Nursing (Nurse Practitioner) was initially accredited by the Nursing and Midwifery Board of Australia (NMBA). From 1st July 2010 the approval, recognition and accreditation of courses has been transferred to the Australian Nursing and Midwifery Accreditation Council (ANMAC). Course accreditation can be checked on their website. Http://www. nursingmidwiferyboard.gov.au/Accreditation.aspx

Inherent requirements

There are inherent requirements for this course that you must meet in order to complete your course and graduate. Make sure you read and understand the requirements for this course online.

Admission

All applicants must meet the following criteria to be eligible for entry:

- Registered Nurse or Midwife (currently registered with the Australian Health Practitioner Regulation Agency - Nursing and Midwifery)
- An undergraduate degree in Nursing or Health Science (Nursing) or minimum of five years full-time equivalent work experience in mental health nursing and graduate certificate in mental health nursing and
- three years full-time equivalent work experience as a registered nurse, of which 12 months full-time equivalent is in an advanced clinical role in mental health

Applicants seeking admission on the basis of work experience MUST support their application with a Statement of Service for all work experience listed on the application.

Successful applicants will need to arrange the following:

- Submission to the University of evidence of current clinical practice in an advanced clinical role in mental health, confirmed via 2 referee reports and
- Access to complete clinical experience in a mental health setting (as approved by the School or Nursing and Midwifery) and
- Contract with a University approved primary supervisor/mentor/assessor (PSMA) to meet the requirements of the course.

Applications from Australian and New Zealand citizens and holders of permanent resident visas must be made via the Universities Admissions Centre (UAC).

Applicants who have undertaken studies overseas may have to provide proof of proficiency in English. Local and International applicants who are applying through the Universities Admissions Centre (UAC) will find details of minimum English proficiency requirements and acceptable proof on the UAC website. Local applicants applying directly to UWS should also use the information provided on the UAC website.

Graduate Diploma in Nursing (Mental Health)

4654.2

Students should follow the course structure for the course version relevant to the year they commenced. This version applies to students whose commencement year in this course is 2011 or later.

The aim of the Graduate Diploma in Nursing (Mental Health) is to produce a graduate who can practise mental health nursing skilfully and within ethical and legal boundaries, and who can think abstractly and critically. The course encourages critical examination of issues such as mental health nursing knowledge, the evidence-based perspective of practice, the measurement of outcomes and the consumer movement. Research training and the study of the relationship between research, knowledge and practice is a key component of the course. Issues include learning how to use the self therapeutically, relationships with clients, understanding the experience of people who have mental illnesses, disorders and crises. Collaborative relationships and partnerships between nurses, multidisciplinary colleagues and stakeholders in the mental health care service are endorsed as a key value within the course. Students are challenged to conceptualise and articulate definitions of the unique role of mental health nursing, to ask difficult questions and to seek their answers.

Study Mode
Two years part-time.

Location

Campus	Attendance	Mode
Parramatta Campus	Part Time	External

Inherent requirements
There are inherent requirements for this course that you must meet in order to complete your course and graduate. Make sure you read and understand the requirements for this course online.

Specialisations

ST4011.1   Clinical Teaching

The Clinical Teaching specialisation provides students with an opportunity to gain formal education in clinical teaching to either enhance their existing teaching experience or provide skill development in this area.

Graduates who complete the Clinical Teaching specialisation will be prepared to take on a leadership role in clinical teaching in the roles such as clinical nurse educator, nurse educator, clinical nurse specialist and undergraduate placement facilitator.

ST4012.1   Research

The Research specialisation provides students with foundation level research training that will support them to increase their involvement in research within the clinical setting or seek admission to a research higher degree.

Graduates who complete the Research specialisation will be prepared to function as an active member of a research team or seek admission to a higher degree research program.

And two electives

Master of Nursing (Clinical Leadership)

4645.2

Students should follow the course structure for the course version relevant to the year they commenced. This version applies to students whose commencement year in this course is 2010 or later.

This course aims to provide development opportunities for nursing and midwifery leaders (expert clinicians, nursing and midwifery managers and leaders at all levels of health care) to develop their leadership capacity in a manner that enables them to lead transformative change. The course provides a focus on the knowledge and behaviours required to be a successful leader in a changing health care environment. Key knowledge areas include evidence-based practice, politics and policy, quality, safety and clinical governance, information and communication technology, leadership and organisational capacity, resource management, health services research and evaluation. Opportunities will be provided to undertake in-depth study into aspects of clinical leadership that are relevant to their area of practice.

The Master of Nursing (Clinical Leadership) is also preparation for doctoral studies, and candidates who successfully complete the program will be eligible to apply for the doctoral program at UWS.

Page 9

applies to students whose commencement year in this course is 2011 or later.

The Graduate Diploma in Midwifery is a year long course developed for registered nurses wishing to pursue a career in Midwifery.

The course is made up of theory and practice with an emphasis on the art and science of midwifery, health promotion, communication skills and continuity of care.

Students will gain essential clinical experience through paid employment in an affiliated maternity hospital for the duration of the course.

Study Mode
One year full-time.

Location

Campus	Attendance	Mode
Parramatta Campus	Full Time	Internal

Accreditation
The Graduate Diploma in Midwifery was initially accredited by the Nurses and Midwives Board (NMB) of New South Wales. From 1st July 2010 the approval, recognition and accreditation of courses has been transferred to the Australian Nursing and Midwifery Accreditation Council (ANMAC). Course accreditation can be checked on their website. Http://www.anmac.org.au/accreditation-services

Inherent requirements
There are inherent requirements for this course that you must meet in order to complete your course and graduate. Make sure you read and understand the requirements for this course online.

Admission
1. Registered Nurse (currently registered with the Australian Health Practitioner Regulation Agency - Nursing and Midwifery)

2. A clinical placement is required to be secured in an approved maternity hospital. The student is responsible for the application and securing of a position as a student midwife in one of the approved hospitals. Recruitment of student midwives occurs during July through a centralised online process.

Applicants for clinical placements must be a registered nurse at the time of attending the interview.

Applications from Australian citizens and holders of permanent resident visas must be made via the Universities Admissions Centre (UAC).

Applicants who have undertaken studies overseas may have to provide proof of proficiency in English. Local and International applicants who are applying through the Universities Admissions Centre (UAC) will find details of minimum English proficiency requirements and acceptable proof on the UAC website. Local applicants applying directly to UWS should also use the information provided on the UAC website.

Course Structure
Qualification for this award requires the successful completion of 80 credit points including the units listed in the recommended sequence below.

Recommended Sequence

Full-time - Start Year

Year 1

Quarter 1

| 400950.2 | Introduction to Midwifery 1 |
| 400951.2 | Introduction to Midwifery 2 |

Quarter 2

| 400953.3 | Complex Midwifery 1 |
| 400954.3 | Midwifery Knowledge and Practice 1 |

Quarter 3

| 400955.2 | Complex Midwifery 2 |
| 400082.6 | Essentials for Best Practice in Midwifery |

Quarter 4

| 400956.3 | Midwifery Knowledge and Practice 2 |

Full-time - Mid Year

Year 1

Quarter 3

| 400950.2 | Introduction to Midwifery 1 |
| 400951.2 | Introduction to Midwifery 2 |

Quarter 4

| 400953.3 | Complex Midwifery 1 |
| 400954.3 | Midwifery Knowledge and Practice 1 |

Year 2

Quarter 1

| 400955.2 | Complex Midwifery 2 |

Master of Primary Health Care

4569.3

Students should follow the course structure for the course version relevant to the year they commenced. This version applies to students whose commencement year in this course was 2009 or later.

This course aims to provide the opportunity for health, and other professionals with primary health care responsibilities to gain knowledge and understanding of primary health care that will enable leadership in this field. The course provides a focus on the knowledge and behaviour required to be a primary heath care provider in a changing community environment. Key knowledge areas include

Page 10

service delivery applying primary health care principles, health promotion, epidemiology, socio-political and health issues for aged care, mental health in communities, collaborative inquiry, supporting individuals and communities in crisis, leadership and change. Opportunities will be provided for students to undertake in-depth study into aspects of primary health care that are relevant to their specific areas of work/practice.

Study Mode
Two years part-time in distance education mode. This course is offered on campus in Hong Kong only.

Location

Campus	Attendance	Mode
Hong Kong Baptist University	Part Time	Internal

Inherent requirements
There are inherent requirements for this course that you must meet in order to complete your course and graduate. Make sure you read and understand the requirements for this course online.

Admission
Applicants must have successfully completed an undergraduate degree in biological sciences: human biological sciences, anatomy and physiology, chemistry, physics, biology, natural science, microbiology, medicine, dentistry, pharmacy, human science, naturopathy, complementary medicine.

or

A degree in arts/behavioural sciences - human behavioural and social sciences, psychology, sociology, human communications, human behaviour.

Applications from Australian and New Zealand citizens and holders of permanent resident visas must be made via the Universities Admissions Centre (UAC).

Applicants who have undertaken studies overseas may have to provide proof of proficiency in English. Local and International applicants who are applying through the Universities Admissions Centre (UAC) will find details of minimum English proficiency requirements and acceptable proof on the UAC website. Local applicants applying directly to UWS should also use the information provided on the UAC website.

Overseas qualifications must be deemed by the Australian Education International - National Office of Overseas Skills Recognition (AEI-NOOSR) to be equivalent to Australian qualifications in order to be considered by UAC and UWS.

Course Structure
Qualification for this award requires the successful completion of 80 credit points, including the units listed in the recommended sequence below.

Recommended sequence

Part-time (Distance Education Mode)

Year 1

Autumn session

400412.2	Primary Health Care and its Applications

400836.1	Health Promotion: A Primary Health Care Approach

Spring session

400856.1	Approaches to Epidemiology
400838.1	Supporting Individuals and Communities in Crisis

Year 2

Autumn session

400773.3	Mental Health for Communities
400837.3	Health and Socio-political Issues in Aged Care

Spring session

400414.2	Leadership and Change
400839.1	Collaborative Inquiry for Primary Health Care Action

Graduate Diploma
Students may elect to exit the program with a Graduate Diploma in Primary Health Care following successful completion of the following units

400412.2	Primary Health Care and its Applications
400836.1	Health Promotion: A Primary Health Care Approach
400856.1	Approaches to Epidemiology
400838.1	Supporting Individuals and Communities in Crisis
400773.3	Mental Health for Communities
400837.3	Health and Socio-political Issues in Aged Care

Graduate Diploma in Primary Health Care

Unit Sets

Specialisation - Clinical Teaching

ST4011.1

The Clinical Teaching specialisation provides students with an opportunity to gain formal education in clinical teaching to either enhance their existing teaching experience or provide skill development in this area. Graduates who complete the Clinical Teaching specialisation will be prepared to take on a leadership role in clinical teaching in the roles such as clinical nurse educator, nurse educator, clinical nurse specialist and undergraduate placement facilitator.

SCHOOL OF COMPUTING, ENGINEERING AND MATHEMATICS

Master of Building Surveying

2558.3

Students should follow the course structure for the course version relevant to the year they commenced. This version applies to students whose commencement year in this course is 2013 or later.

The course is designed to provide professionals with the special skills and knowledge to assess, evaluate and recommend building solutions. The course establishes a foundation for students to understand performance based building code, fire technology principles, building sustainability and other issues related to building surveying practice. The graduate will also acquire the skill to independently appraise the literature and address contemporary issues faced by the building industry. The course is relevant to professionals developing alternative building solutions under the National Construction Code of Australia and other relevant standards and guidelines.

Study Mode
Two years part-time.

Location

Campus	Attendance	Mode
Parramatta Campus	Part Time	External
Penrith Campus	Part Time	External

Accreditation
Accreditation with Australian Institute of Building Surveyors and recognition by Building Professionals Board will be sought.

Admission
Applicants must have an undergraduate degree, or higher, in building, building surveying, construction, engineering or architecture or a Graduate Diploma in Building Surveying.

Applications from Australian citizens and holders of permanent resident visas must be made via the Universities Admissions Centre (UAC).

Applicants who have undertaken studies overseas may have to provide proof of proficiency in English. Local and International applicants who are applying through the Universities Admissions Centre (UAC) will find details of minimum English proficiency requirements and acceptable proof on the UAC website. Local applicants applying directly to UWS should also use the information provided on the UAC website.

Overseas qualifications must be deemed by the Australian Education International - National Office of Overseas Skills Recognition (AEI-NOOSR) to be equivalent to Australian qualifications in order to be considered by UAC and UWS.

Course Structure

Qualification for this award requires the successful completion of 80 credit points as per the recommended sequence below. Students are required to complete two units in each session, Autumn and Spring, over the two years required to complete the course.

Core Units

Autumn session

300947.1	Building Regulations
300948.1	Fire Technology and Engineering Principles
300716.2	Building Studies

Spring session

300711.2	Building Fire Services
300708.3	Planning and Development Control

Autumn or Spring session

300597.2	Master Project 1
300598.3	Master Project 2

(Note that 300597 Master Project 1 must be completed at the same time or before 300598 Master Project 2)

Alternate Core
Choose one of

Autumn session

300713.2	Building Engineering

Spring session

200458.2	Building in Bushfire Prone Areas

Graduate Diploma in Building Surveying
Students may elect to exit early with a Graduate Diploma in Building Surveying following successful completion of 60 credit points as per the recommended sequence in 3686.1 Graduate Diploma in Building Surveying

Graduate Diploma in Building Surveying

3686.1

The course is designed to provide professionals with the advanced skills and knowledge to assess, evaluate and recommend building solutions. The course establishes a foundation for students to understand performance based building code, fire technology principles, building sustainability and other issues related to building surveying practice. The course is relevant to professionals developing alternative building solutions under the National Construction Code of Australia and other relevant standards and guidelines. This course sets a pathway for further learning at the advanced Masters level

Study Mode

Choose one of

Autumn session

300713.2	Building Engineering

Spring session

200458.2	Building in Bushfire Prone Areas

Graduate Diploma in Bushfire Protection

3650.2

Students should follow the course structure for the course version relevant to the year they commenced. This version applies to students whose commencement year in this course is from Spring 2013 or later.

This course caters for the need by building professionals to develop a comprehensive understanding of the behaviour and danger of bushfires in relation to local vegetation, land management and weather conditions. Students will gain the knowledge of the relevant planning and building regulations, standards and emergency management for bushfire protection. Graduates will be able to apply the knowledge and skills to conduct risk assessment, provide advice on developments in bushfire prone areas and develop alternative engineering design solutions.

Study Mode

One and a half years part-time.

Location

Campus	Attendance	Mode
Parramatta Campus	Part Time	External
Penrith Campus	Part Time	External

Accreditation

The course is recognised by the Fire Protection Association Australia as a qualification for accreditation under the Bushfire Planning and Design scheme.

Admission

Applicants must have an undergraduate, or higher, degree in engineering, building, building surveying, architecture, local government or public sector management, planning, natural resource management, emergency management, science or environmental studies.

OR

An AQF Diploma or higher in engineering, building, building surveying, architecture, local government or public sector management, planning, landscaping, natural resource management, emergency management, science or environmental studies PLUS 4 years professional work experience in the building industry including engineering, building surveying, planning, architecture, local government, environmental management or state fire services.

OR

A graduate certificate in bushfire protection, fire safety engineering, building surveying, urban studies, environmental or land-use planning or environmental studies.

Applicants seeking admission on the basis of work experience MUST support their application with a Statement of Service for all work experience listed on the application.

UWS Postgraduate Handbook , 2014

Course Structure

Qualification for this award requires the successful completion of 60 credit points as per the recommended sequence below.

Semester 1

200457.3   Bushfire Behaviour

Choose one of

200500.2   Bushfire Fighting
300948.1   Fire Technology and Engineering Principles

Semester 2

200458.2   Building in Bushfire Prone Areas
300708.3   Planning and Development Control

Semester 3

200459.2   Emergency Management for Bushfire Prone Areas
200499.3   Alternative Solutions for Bushfire Prone Areas

Note: Students with a building surveying background should undertake 200500 Bushfire Fighting. Students with qualifications in Bushfire Fighting are required to complete 300948 Fire Technology and Engineering Principles.

Graduate Certificate in Bushfire Protection

3651.3

Students should follow the course structure for the course version relevant to the year they commenced. This version applies to students whose commencement year in this course is Spring 2013 or later.

This course caters for the need by building professionals to develop a comprehensive understanding of the behaviour and danger of bushfires in relation to local vegetation, land management and weather conditions. Students will gain the knowledge of the relevant planning and building regulations, standards and emergency management for bushfire protection. Graduates will be able to provide advice on developments in bushfire prone areas, assess building designs against the deemed-to-satisfy provisions of the building code and standards. They will also be able to provide advice with respect to bushfire fighting techniques

This course is an early exit from the Graduate Diploma in Bushfire Protection.

Study Mode
One year part-time.

Master of Engineering

3623.5

Students should follow the course structure for the course version relevant to the year they commenced. This version applies to students whose commencement year in this course is Spring 2013 or later.

The Master of Engineering enables professionals in Engineering and recent graduates to adapt to a dynamically developing and changing technological environment through the upgrading of their skills and knowledge. The course provides students with training opportunities to foster a culture of life-long learning. Graduates of the course will have a firm foundation to maintain their skills as their specialised professional field evolves.

Study Mode
One year full time or two years part-time.

Location

Campus	Attendance	Mode
Penrith Campus	Full Time	Internal
Penrith Campus	Part Time	Internal

Admission
Students must possess an undergraduate degree in Engineering

Or

An undergraduate degree in an engineering related field and one year full time equivalent work experience in engineering.

Applicants seeking admission on the basis of work experience MUST support their application with a Statement of Service for all work experience listed on the application.

Applications from Australian and New Zealand citizens and holders of permanent resident visas must be made via the Universities Admission Centre (UAC).

International applicants must apply directly to the University of Western Sydney via UWS International.

Applicants who have undertaken studies overseas may have to provide proof of proficiency in English. Details of minimum English proficiency requirements and acceptable proof can be found on the Universities Admissions Centre (UAC) website.

Overseas qualifications must be deemed by the Australian Education International - National Office of Overseas Skills Recognition (AEI-NOOSR) to be equivalent to Australian qualifications in order to be considered by UAC and UWS.

Course Structure
Qualification for this award requires the successful completion of 80 credit points including the units listed below.

All students must enrol in a Specialisation before enrolling in their units
Students who wish to complete a Master of Engineering (General program) must complete the four core units and four specialisation units, which may be chosen in any combination from the specialisation lists below. These units are included in the SP3002.1 - General program and students will need to enrol in this Specialisation.

SP3004.1   Master of Engineering (General Program)

Students who wish to graduate with one of the following specialisations must complete the four core units and four specialisation units from one of the disciplines below. Students will need to enrol in one of the following Specialisations.

ST3018.1   Civil
ST3022.1   Electrical
ST3025.1   Environmental
ST3024.1   Mechatronic
ST3026.1   Telecommunication

Core Units

300513.2   Engineering Software Applications
300597.2   Master Project 1
300598.3   Master Project 2
300206.2   Sustainable Design

And four 10 credit point Engineering Specialist Alternate units

Engineering Specialist alternate units

Civil

300594.3   Advanced Structural Analysis
300595.2   Advanced Water Engineering
300604.2   Advanced Geotechnical Engineering
300605.2   Advanced Structural Design

Environmental

300595.2   Advanced Water Engineering
300602.2   Advanced Environmental Engineering
300604.2   Advanced Geotechnical Engineering
300939.1   Sustainability and Risk Engineering (PG)

Electrical

300603.2   Advanced Control Systems
300515.2   Instrumentation and Measurement (PG)
300173.2   Advanced Data Networks

Graduate Diploma in Engineering (exit only)

3624.5

Students should follow the course structure for the course version relevant to the year they commenced. This version applies to students whose commencement year in this course is Spring 2013 or later.

This is an exit award only. Students may choose to exit the Master of Engineering after completing 60 Credit Points with the degree of Graduate Diploma in Engineering.

The Graduate Diploma in Engineering provides an opportunity to professionals in Engineering and Industrial Design and recent graduates to adapt to a dynamically developing and changing technological environment through the upgrading of their skills and knowledge. The course provides students with opportunities to foster a culture of life-long learning. Graduates of the course will have a foundation to maintain their skills as their specialised professional field evolves.

Location

Campus	Attendance	Mode
Penrith Campus	Full Time	Internal
Penrith Campus	Part Time	Internal

Admission

Graduate Diploma in Engineering will not be offered to commencing students. It will be made available only as an exit point for Master of Engineering students.

Course Structure

The Graduate Diploma is a 60 Credit Point degree and it is completely embedded within the Master of Engineering. It has no prescribed sequence. Students are required to study:

| 300513.2 | Engineering Software Applications |
| 300206.2 | Sustainable Design |

And four 10 credit point Engineering Specialist Alternate units

For a list of Engineering Specialist Alternate units please refer to 3623 Master of Engineering.

Graduate Certificate in Engineering

3625.4

Students should follow the course structure for the course version relevant to the year they commenced. This version applies to students whose commencement year in this course is Spring 2013 or later.

The Graduate Certificate in Engineering enhances the specialist training of students at a postgraduate level and enables them to adapt to a dynamically developing and changing technological environment. The course also prepares students, especially those coming from a non-Australian learning background, for higher level postgraduate training.

Study Mode
One session full-time or one year part-time.

Location

Campus	Attendance	Mode
Penrith Campus	Full Time	Internal
Penrith Campus	Part Time	Internal

Admission

Applicants must have an Advanced Diploma in any discipline and three years full time equivalent work experience as an Engineer or Technical Supervisor
Or

An undergraduate degree in Science and one year full time equivalent work experience in an engineering field

Applicants seeking admission on the basis of work experience MUST support their application with a Statement of Service for all work experience listed on the application.

Applications from Australian and New Zealand citizens and holders of permanent resident visas must be made via the Universities Admissions Centre (UAC).

Applicants who have undertaken studies overseas may have to provide proof of proficiency in English. Local and International applicants who are applying through the Universities Admissions Centre (UAC) will find details of minimum English proficiency requirements and acceptable proof on the UAC website. Local applicants applying directly to UWS should also use the information provided on the UAC website.

International applicants must apply directly to the University of Western Sydney via UWS International.

International students applying to UWS through UWS International can find details of minimum English proficiency requirements and acceptable proof on the UWS International website.

Overseas qualifications must be deemed by the Australian Education International - National Office of Overseas Skills Recognition (AEI-NOOSR) to be equivalent to Australian qualifications in order to be considered by UAC and UWS.

Page 19

Course Structure

Qualification for this award requires the successful completion of 40 credit points including the units listed below.

300513.2   Engineering Software Applications
300206.2   Sustainable Design

And two 10 credit point Engineering Specialist Alternate units

For a list of Engineering Specialist Alternate units please refer to 3623 Master of Engineering.

Master of Fire Safety Engineering

2651.4

Students should follow the course structure for the course version relevant to the year they commenced. This version applies to students whose commencement year in this course is 2014 or later.

The course is designed to provide professionals with the skills and knowledge to assess, evaluate and recommend fire safety solutions. The course caters for the growing need to understand fire safety engineering principles, is relevant to professionals developing alternative solutions using the National Construction Code of Australia and the International Fire Engineering Guidelines and is a recognised qualification for professionals seeking accreditation as a Fire Safety Engineer.

Study Mode
Two years part-time.

Location

Campus	Attendance	Mode
Parramatta Campus	Part Time	External
Penrith Campus	Part Time	External

Admission

Applicants must have an undergraduate degree, or higher, in engineering, building, construction, building surveying, architecture or physical science;

Or

A Graduate Diploma in Fire Safety Engineering.

Applications from Australian citizens and holders of permanent resident visas must be made via the Universities Admissions Centre (UAC).

Applicants who have undertaken studies overseas may have to provide proof of proficiency in English. Local and International applicants who are applying through the Universities Admissions Centre (UAC) will find details of minimum English proficiency requirements and acceptable proof on the UAC website. Local applicants applying directly to UWS should also use the information provided on the UAC website.

Overseas qualifications must be deemed by the Australian Education International - National Office of Overseas Skills Recognition (AEI-NOOSR) to be equivalent to Australian qualifications in order to be considered by UAC and UWS.

Course Structure

Qualification for this award requires the successful completion of 80 credit points as per the recommended sequence below.

Semester 1

300947.1   Building Regulations
300709.2   Fire Engineering 1 (Fire Dynamics)

Semester 2

300717.2   Egress and Risk Assessment
300711.2   Building Fire Services

Semester 3

300710.2   Fire Engineering 2 (Fire Models)
300718.2   Fire Engineering Design and Assessment

Semester 4

300597.2   Master Project 1
300598.3   Master Project 2

Graduate Diploma in Fire Safety Engineering

2652.3

Students should follow the course structure for the course version relevant to the year they commenced. This version applies to students whose commencement year in this course is 2013 or later.

The course is designed to provide professionals with the skills and knowledge to assess, evaluate and recommend fire safety solutions. The course caters for the growing need to understand fire safety engineering principles, is relevant to professionals developing alternative solutions using the National Construction Code of Australia and the International Fire Engineering Guidelines.

Study Mode
One and a half years part time.

Location

Campus	Attendance	Mode
Parramatta Campus	Part Time	External
Penrith Campus	Part Time	External

Admission

Applicants must have an undergraduate degree, or higher, in engineering, building, construction, building surveying, architecture or physical science or An AQF Graduate Certificate in Fire Safety Engineering or An AQF Diploma in engineering, building, construction, building surveying, architecture or physical science and 4 years professional work experience in engineering, the building industry, architecture or local government.

Applicants seeking admission on the basis of work experience MUST support their application with a

| 300717.2 | Egress and Risk Assessment |
| 300711.2 | Building Fire Services |

Graduate Certificate in Health Informatics

3663.3

Students should follow the course structure for the course version relevant to the year they commenced. This version applies to students whose commencement year in this course is 2014 or later.

The Graduate Certificate in Health Informatics should appeal strongly to medicine/nursing/health graduates within ten years of graduation (who have some ICT foundation and are early enough in their career paths) who wish to acquire formal Health Informatics knowledge and competencies. It may also appeal to ICT, Engineering or Science graduates who are already working in the Health sector and wish to enhance their career options. It may further appeal to Health administration and management graduates who wish to develop or expand their capacity to take responsibilities in Health ICT services or projects.

UWS Postgraduate Handbook , 2014
Health and Science Schools - Postgraduate
This file was created on 12/03/2014 4:15:06 PM. Please check the online handbook for changes made after this date.

Page 21

The course will be offered normally in part-time format which will require at least one calendar year to complete. It will be available in full-time format only for students who qualify for exemption from the unit 300566 Introduction to Health Informatics. It will also be available in both on-campus and fully-external modes. Students will normally take four core units each of ten credit points. Teaching will be undertaken by UWS academic/casual staff and may be supplemented by guest lectures by Health sector staff with relevant expertise.

Study Mode
Six months full-time or one year part-time.

Admission
Students must have

an undergraduate or postgraduate coursework degree in any discipline

Or

Three years full-time equivalent employment in the health sector, such as health administration, health care or welfare, in a role involving use of IT for direct support of clinical operations (e.g. Nursing, radiography, pathology)

Applicants seeking admission on the basis of work experience MUST support their application with a Statement of Service for all work experience listed on the application.

Basic ability in use of common aspects of ICT systems will be assumed such as word processing, spreadsheets, web browsers. No formal programming knowledge will be assumed.

Applications from Australian citizens and holders of permanent resident visas must be made via the Universities Admissions Centre.

Applicants who have undertaken studies overseas may have to provide proof of proficiency in English. Details of minimum English proficiency requirements and acceptable proof can be found on the Universities Admissions Centre website

Overseas qualifications must be deemed by the Australian Education International - National Office of Overseas Skills

Recognition (AEI-NOOSR) to be equivalent to Australian qualifications in order to be considered by UAC and UWS.

Course Structure
Qualification for this award requires the successful completion of 40 credit points including the units listed in the recommended sequence below.

Recommended Sequence

Semester One

300566.2	Introduction to Health Informatics
300578.3	Professional Development

Semester Two

300955.1	Healthcare Data Environments
300956.1	Healthcare Software and Systems

Master of Information and Communications Technology

3642.1

The Master of Information and Communications Technology (Advanced) (MICT (Advanced)) course is a two year full-time/four year part-time course. It has three nested awards - Master of Information and Communications Technology, Postgraduate Diploma in Information and Communications Technology and Postgraduate Certificate in Information and Communications Technology - with exits available after completion of eight, six and four units respectively.

Completion of eight units will lead to the Master of Information and Communications Technology (MICT): a) as a generic degree; or b) with specialisation program in Web Engineering; or c) with specialisation program in Networking.

Completion of six units will lead to a Postgraduate Diploma in Information and Communications Technology, and completion of four units will lead to a Postgraduate Certificate in Information and Communications Technology.

The course has been designed to prepare computing professionals and recent graduates for work in the information and communications technology sector at the highest levels in today's highly globalised and networked environment. It will provide students with the knowledge, understanding and skills to enable them to deal effectively with advanced issues in information and communications technologies in general, and in the fields of Web engineering and networking in particular. Graduates of the course should possess a solid foundation that will allow them to maintain their skills as their specialised fields evolve.

Study Mode
One year full-time or two years part-time.

Accreditation

The Master of Information and Communications Technology is currently accredited with the Australian Computer Society (ACS) at Professional level.

Admission

Eligibility for admission to the Master of Information and Communications Technology is based on the following requirements:

An undergraduate degree in Computing

or

An undergraduate degree in any discipline and Graduate Diploma in ICT or higher

or

An undergraduate degree in any discipline and three years full-time equivalent work experience in Information and Communications Technologies which includes experience in applying skills in: programming; network administration; database design; data structure analysis.

Applicants seeking admission on the basis of work experience MUST support their application with a Statement of Service for all work experience listed on the application.

Applications from Australian and New Zealand citizens and holders of permanent resident visas must be made via the Universities Admissions Centre (UAC).

Applicants who have undertaken studies overseas may have to provide proof of proficiency in English. Local and International applicants who are applying through the Universities Admissions Centre (UAC) will find details of minimum English proficiency requirements and acceptable proof on the UAC website. Local applicants applying directly to UWS should also use the information provided on the UAC website.

International applicants must apply directly to the University of Western Sydney via UWS International.

International students applying to UWS through UWS International can find details of minimum English proficiency requirements and acceptable proof on the UWS International website.

Overseas qualifications must be deemed by the Australian Education International - National Office of Overseas Skills Recognition (AEI-NOOSR) to be equivalent to Australian qualifications in order to be considered by UAC and UWS

Course Structure

Qualification for this award requires the successful completion of eight units including the units listed below.

- Two core units.

- At least four units at postgraduate level from those offered by the School of Computing, Engineering and Mathematics, in either the generic specialisation or from the Web Engineering or Networking Specialisations, as listed below.

- Up to two units, at postgraduate level, offered by other Schools within Health and Science disciplines as approved by the School from time to time.

Common Core (20 credit points)

300695.2	Network Technologies
300693.2	Web Technologies

Non-specialisation (Generic) program

Information Communication Technology (ICT) units offered by the School of Computing and Mathematics (minimum 40 credit points - at least four of the following)

300252.3	Advanced Topics in Networking
300255.2	Network Management
300256.2	Multimedia Communication Systems
300260.2	IT Project Management
300389.2	Wireless Networking
300437.2	XML and Web Services
300443.2	Web Engineering
300692.2	Workflow Management Systems
300694.2	Advanced Topics in ICT
300696.2	Systems and Network Security
300697.2	Content Management Systems & Web Analytics
300769.2	Intelligent Agents for E-Markets
300770.2	Software Testing and Automation
300977.1	Systems Analysis and Database Management Systems

With approval of the Academic Course Advisor

300238.2	Computing Research Project A

Non-specialisation (Generic) program

Units offered by other Schools within UWS (maximum 20 credit points - at most two of the following)

Research Methods

Business Process Management

Enterprise Resource Planning

Business Process Integration

Web Engineering Specialisation (an additional 40 credit points)

ST3006.1	Web Engineering

Networking Specialisation (an additional 40 credit points)

ST3007.1	Networking

Master of Information and Communications Technology (Advanced)

3641.1

Students should follow the course structure for the course version relevant to the year they commenced. This version applies to students whose commencement year in this course was 2009 or later.

Postgraduate Diploma in Information and Communications Technology

3643.1

The Postgraduate Diploma in Information and Communications Technology (ICT) addresses the needs of the working professionals in ICT areas. We recognise that ICT professionals have clear goals and career paths in mind and hence are focused on improving their expertise in the areas that they choose rather than go through a fully pre-designed course. The two core units, Network Technologies and Web Technologies strongly address today's highly globalised and networked environment. The remaining four units can be freely chosen from those on offer to suit student's own background and future plans.

Study Mode
One year full-time or two years part-time.

Graduate Diploma in Information and Communications Technology

3645.1

Graduate Diploma in Information and Communications Technology (ICT) is a one-year full-time or two-years part-time course designed to open a pathway for non-ICT graduates, with or without professional experience in ICT field, to study ICT at master's level after the completion of the course.

Anecdotal evidence suggests that more than 80% of the ICT workforce have not had university-level qualifications in ICT. For such people, the Graduate Diploma offers a formal

UWS Postgraduate Handbook , 2014
Health and Science Schools - Postgraduate
This file was created on 12/03/2014 4:15:06 PM. Please check the online handbook for changes made after this date.

Page 26

training in the theoretical aspects of ICT and thus a solid base from which to continue their progression in the ICT field. They will also benefit from the University's policies on recognition of prior learning (RPL) by allowing a matching of an individual's professional experience against specific units that form part of the Graduate Diploma in Information and Communications Technology. The level of knowledge covered during this course also enables it to stand on its own, to suit an individual career path or specific needs of an industry.

The inexperienced non-ICT students will be able to forge a career in ICT. GradDipICT has an exit point, Graduate Certificate in ICT, which requires completion of any four of the eight units prescribed for the diploma. Fee-help will be available under SECT guidelines to the local students.

Study Mode

Accreditation
The Graduate Diploma in Information and Communications Technology is currently accredited with the Australian Computer Society (ACS) at Associate level.

Admission
Eligibility for admiison to the Graduate Diploma in Information and Communications Technology is based on the following requirements:

* An undergraduate degree in any discipline

Applications from Australian and New Zealand citizens and holders of permanent resident visas must be made via the Universities Admissions Centre (UAC).

Applicants who have undertaken studies overseas may have to provide proof of proficiency in English. Local and International applicants who are applying through the Universities Admissions Centre (UAC) will find details of minimum English proficiency requirements and acceptable proof on the UAC website. Local applicants applying directly to UWS should also use the information provided on the UAC website.

International applicants must apply directly to the University of Western Sydney via UWS International.

International students applying to UWS through UWS International can find details of minimum English proficiency requirements and acceptable proof on the UWS International website.

Overseas qualifications must be deemed by the Australian Education International - National Office of Overseas Skills Recognition (AEI-NOOSR) to be equivalent to Australian qualifications in order to be considered by UAC and UWS

Course Structure
Qualification for this award requires the successful completion of eight units as follows

Autumn session

300580.2	Programming Fundamentals

300585.2	Systems Analysis and Design
300582.2	Technologies for Web Applications
300578.3	Professional Development

Spring session

300565.2	Computer Networking
300144.4	Object Oriented Analysis
300104.4	Database Design and Development
300570.3	Human-Computer Interaction

To graduate with the Graduate Certificate in Information and Communications Technology, a student must complete a total of any four units from the list above.

Graduate Certificate in Information and Communications Technology

3646.1

Anecdotal evidence suggests that more than 80 percent of the Information Communication Technology (ICT) workforce have not had university-level qualifications in ICT. For such people, the Graduate Diploma offers a formal training in the theoretical aspects of ICT and thus a solid base from which to continue their progression in the ICT field. They will also benefit from the University's policies on recognition of prior learning (RPL) by allowing a matching of an individual's professional experience against specific units that form part of the Graduate Diploma in Information and Communications Technology. The level of knowledge covered during this course also enables it to stand on its own, to suit an individual career path or specific needs of an industry.

The inexperienced non-ICT students will be able to forge a career in ICT. GradDipICT has an exit point, Graduate Diploma in Information and Communications Technology, which requires completion of any four of the eight units prescribed for the diploma. Fee-help will be available under SECT guidelines to the local students.

Study Mode
Six months full-time or one year part-time.

Location

Campus	Attendance	Mode
Parramatta Campus	Full Time	Internal

Unit Sets

Specialisation - Master of Engineering (General Program)

SP3004.1

Unit Set Structure

Students who wish to complete a Master of Engineering (General program) must complete the four core units and four specialisation units, which may be chosen in any combination from the specialisation lists below.

Core units

300513.2	Engineering Software Applications
300597.2	Master Project 1
300598.3	Master Project 2
300206.2	Sustainable Design

And four 10 credit point Engineering Specialist Alternate units

Engineering Specialist alternate units

Civil Specialist units

300594.3	Advanced Structural Analysis
300595.2	Advanced Water Engineering
300604.2	Advanced Geotechnical Engineering
300605.2	Advanced Structural Design

Environmental Specialist units

300595.2	Advanced Water Engineering
300602.2	Advanced Environmental Engineering
300604.2	Advanced Geotechnical Engineering
300939.1	Sustainability and Risk Engineering (PG)

Electrical Specialist units

300603.2	Advanced Control Systems
300515.2	Instrumentation and Measurement (PG)
300173.2	Advanced Data Networks
300197.2	Power System Planning and Economics
300601.2	Advanced Electrical Machines and Drives
300596.2	Advanced Signal Processing

Telecommunication Specialist units

300515.2	Instrumentation and Measurement (PG)
300196.2	Personal Communication Systems
300596.2	Advanced Signal Processing
300173.2	Advanced Data Networks

Mechatronic Specialist units

300603.2	Advanced Control Systems
300599.2	Advanced Robotics
300601.2	Advanced Electrical Machines and Drives
300600.2	Mechatronic System Design

Specialisation - Web Engineering

ST3006.1

Unit Set Structure

Students must complete the following four units

300697.2	Content Management Systems & Web Analytics
300443.2	Web Engineering
300692.2	Workflow Management Systems
300437.2	XML and Web Services

Specialisation - Networking

ST3007.1

Unit Set Structure

Choose four units from the following

300252.3	Advanced Topics in Networking
300256.2	Multimedia Communication Systems
300255.2	Network Management
300696.2	Systems and Network Security
300389.2	Wireless Networking

Specialisation - Civil

ST3018.1

Specialisation - Clinical Teaching

ST4011.1

The Clinical Teaching specialisation provides students with an opportunity to gain formal education in clinical teaching to either enhance their existing teaching experience or provide skill development in this area. Graduates who complete the Clinical Teaching specialisation will be prepared to take on a leadership role in clinical teaching in the roles such as clinical nurse educator, nurse educator, clinical nurse specialist and undergraduate placement facilitator.

Location

Campus	Mode
Parramatta Campus	Internal

Unit Set Structure

Students must complete 80 credit points including the units listed in the recommended sequence below.

Recommended Sequence

Full-time

Year 1

Autumn session

400235.2	Leadership in Clinical Practice
400238.3	Policy, Power and Politics in Health Care Provision
400974.1	Clinical Teaching for Learning

And one elective

SCHOOL OF SCIENCE AND HEALTH

Master of Health (Research Studies)/PhD

4681.1

The Master of Health (Research Studies)/PhD program is designed for professionals working in a variety of settings including health care services, hospitals, the aged care sector and community organisations, enabling them to effectively assess and respond to emerging health planning and management issues. It allows students to undertake coursework study in areas of discipline specific interest as well as providing appropriate research skills training.

The Doctor of Philosophy (PhD) component provides training and education with the objective of producing graduates with the capacity to conduct research independently at a high level of originality and quality. A PhD candidate should uncover new knowledge either by the discovery of new facts, the formulation of theories or the innovative re-interpretation of known data and established ideas.

Study Mode
Four and a half years full-time (one and a half years for the Master of Health (Research Studies) plus three years for the PhD).

Location

Campus	Attendance	Mode
Parramatta Campus	Full Time	Internal

Admission
This course is only available to International students. Please contact the Course Advisor for further information.

Course Structure
The Master of Health (Research Studies)/PhD degree will include a 120 credit point Master degree that has a research training component of one third (40 credit points) with a coursework component of discipline based content of two thirds (80 credit points).

The PhD component of the course will be completed according to the current UWS Doctor of Philosophy policy.

The course will comprise the following

Core Units - 30 credit points

Research Training - 40 credit points

Alternate Health units - 40 credit points

One Elective unit - 10 credit points

Students must successfully complete the following

Core units - 30 credit points

400416.2	Public Health, Policy and Society
400967.2	Health Economics and Comparative Health Systems
400778.2	Leadership and the Development of Organisational Capacity

Research Training component - 40 credit points

300398.2	Methods of Researching
400850.2	Professional Topic
300742.2	Science and Health Research Project PG

Note: 300742 Science and Health Research Project is a 20 credit point unit

Alternate Health units - 40 credit points from the following

400417.2	Epidemiology and Quantitative Methods
400841.2	A Global Perspective on Social Determinants of Health
400840.3	Communicable Diseases
400418.3	Health Advancement and Health Promotion
400843.2	Health Workforce Planning
300391.2	Occupational Health Management
300677.2	Safety and Risk Management
300682.2	Occupational and Environmental Hygiene
400206.2	Evidence-based Nursing
400847.3	Surveillance and Disaster Planning
400837.3	Health and Socio-political Issues in Aged Care

Note: Enrolment in UWS units other than those listed above for the Master of Health (Research Studies) portion may be possible with Director of Academic Program permission.

And one elective unit - 10 credit points

In order for students to progress into the PhD research program, they must have an average grade of 75 percent or greater across all units and have obtained a unit grade of greater than 74 percent for 300742 Science and Health Research Project. The required research HRD documentation will be assessed by the College of Health and Science Research and Higher Degree Committee.

As part of this evaluation, successful candidature will be dependent on the availability of appropriate topics and available supervision. In order to facilitate this transition, students will be given ongoing academic advice regarding potential doctoral projects during the course of their Master's study.

Master of Health Science

4651.3

Students should follow the course structure for the course version relevant to the year they commenced. This version applies to students whose commencement year in this course is 2011 or later.

Areas of relevance to health employees in the public or private sector form the foundation subjects of this course: Health Policy; Leadership; Health Economics and Financial Management; Research Applications.

A choice of specialisations is offered: Health Services Management; Aged Care Management; Health Planning; International Health; Health Promotion; Occupational Health & Safety; Occupational & Environmental Hygiene; Research Studies.

Accreditation
Graduates of the Master of Health Science with specialisations in Health Services Management, Aged Care Management and Health Planning will be eligible for professional accreditation with the Australasian College of Health Service Management (ACHSM).

Admission
Applicants must have either:

an undergraduate degree, or higher, in a health, welfare or aged care discipline

or

a graduate diploma or graduate certificate in a health, welfare or aged care discipline plus at least three years work experience in a health, welfare or aged care discipline.

Applicants seeking admission on the basis of work experience MUST support their application with a Statement of Service for all work experience listed on the application.

Applications from Australian and New Zealand citizens and holders of permanent resident visas must be made via the Universities Admissions Centre (UAC).

Applicants who have undertaken studies overseas may have to provide proof of proficiency in English. Local and International applicants who are applying through the Universities Admissions Centre (UAC) will find details of minimum English proficiency requirements and acceptable proof on the UAC website. Local applicants applying directly to UWS should also use the information provided on the UAC website.

International applicants must apply directly to the University of Western Sydney via UWS International.

International students applying to UWS through UWS International can find details of minimum English proficiency requirements and acceptable proof on the UWS International website.

Overseas qualifications must be deemed by the Australian Education International - National Office of Overseas Skills Recognition (AEI-NOOSR) to be equivalent to Australian qualifications in order to be considered by UAC and UWS.

Course Structure
Qualification for the Master of Health Science requires the successful completion of eight units within the specialisations listed below. Students have the option to graduate with a Graduate Diploma in Health Science after completing the required six units within their chosen specialisation.

Specialisations

ST4013.1   Health Services Management

From 2010 this specialisation is offered in on-campus and external mode. This specialisation is designed for managers who require skills in contemporary management and their application in the health care setting. Particular emphasis is placed on critical and analytic skills in policy analysis, economic evaluation and epidemiology, thus providing graduates with the ability to respond creatively to changes as they arise. Health managers need to be current with developments in the general business area so potential in the health care setting can be evaluated and appropriate initiatives implemented. Particular specialty units include Strategic Analysis and Decision Making, Health Workforce Planning, as well as Quality and Safety in Health Care.

ST4001.1   Aged Care Management

From 2010 this specialisation is offered in on-campus and external mode. Staff working in health and aged care organisations, charitable and private sectors, especially those in supervisory and management positions, will find this exposes them to contemporary issues in aged care, allowing them to up-skill management knowledge to position themselves in the forefront of innovation in the delivery and organisation of quality aged care. Specialty units include Health and Socio-Political Issues in Aged Care, Leadership for Quality & Safety in Health Care and Health Workforce Planning. Students have an opportunity to undertake Professional Topic or an elective. Judicious selection of an elective means students can study in a second specialty area (e.g., Health Planning or Health Services Management)

ST4002.1   Health Planning

From 2010 this specialisation is offered in on-campus and external mode. All managers undertake forward planning to proactively manage future services and identify workforce and facility requirements. This specialty keeps students up-to-date with current forward planning approaches and initiatives in health and other sectors that work with health. Students are exposed to the process of planning, how to set goals and objectives, monitor and evaluate performance outcomes. Current issues are explored in the specialty units Health Services and Facilities Planning, Workforce Planning and also Quality and Safety in Health Care. Second specialty options include Health Services Management and Aged Care Management.

ST4003.1   International Health

This specialisation broadens the public health approach of looking at all determinants of health, which include broader social and environmental factors in addition to physical risk factors to include international health studies. For this, students will study a wide range of evaluation processes and research methods such as policy analysis, economic evaluation, epidemiology and qualitative methods. The focus of practical skills is in Communicable Diseases, and students will integrate research, analytical and practical skills in the evaluation of contemporary public health

Page 34

issues. A double specialty is possible with the Health Promotion specialty.

ST4004.1   Health Promotion

In addition to the four core units, this specialisation includes Health Promotion Health Advancement and A Global Perspective on Social Determinants of Health. Students are taken through the process of health needs analysis, risk and protective factors, planning, writing grant applications and evaluating interventions, based on identified competency requirements.

ST4005.1   Occupational Health & Safety

Specialisation units include Occupational Health Management and Safety and Risk Management which focus on the practice of occupational health within national and international frameworks. It explores issues such as the physical, social and mental impact of the occupational environment on health. Strategies for the management of occupational health are examined, together with methods of monitoring and evaluating occupational health programs. Students have the opportunity to develop a safety systems approach concentrating on hazard identification, risk assessment and devising control measures incorporating safety management principles. The legal underpinning of OHS requirements at the workplace are also covered. A double specialty with the Occupational and Environmental Hygiene is possible. Students may select two electives to suit their career aspirations.

ST4010.1   Research Studies

This specialisation is designed for students wishing to proceed to a higher degree in research. It includes specialty units in research philosophy and methodology and a 20 credit point unit in advanced thesis preparation, in addition to the core unit of Methods of Researching. This helps students understand how to identify a research problem, critically evaluate the literature and prepare a research proposal. It allows students to become familiar with the requirements of thesis writing from an early stage and develop an appreciation for ethical issues in research in higher degrees.

SP3001.1   Health Science (standard program)

This option offer students the most flexibilty in completing their Master of Health Science. After the completion of 4 required units, students can choose their remaining units from the list of recommended electives.

This specialisation is available to students who commenced prior to 2013

ST4006.1   Occupational & Environmental Hygiene

The specialisation includes the units Occupational and Enviro Hygiene as well as Air Water and Noise Management. They show students the methods involved in measuring potential hazards, how to compare results with current standards before recommending methods of control. Hazards such as chemical and biological pollutants, ergonomics, noise, heat, cold and lighting in both the workplace and general indoor environment, and the various methods are considered. A range of skills required to assess the environment in relation to air, water and noise and underpinning legislative framework are explored.

Graduate Diploma in Health Science

4652.3

Students should follow the course structure for the course version relevant to the year they commenced. This version applies to students whose commencement year in this course is 2011 or later.

Areas of relevance to health employees in the public or private sector form the foundation subjects of this course: Health Policy; Leadership; Health Economics and Financial Management; Research Applications. Choice of specialisations is offered: Health Services Management; Aged Care Management; Health Planning; International Health; Health Promotion; Occupational Health & Safety; Occupational & Environmental Hygiene.

A generic option, Health Science, is also available. (Students supplement the foundation subjects by choosing their remaining subjects from a pool).

Study Mode

Students are taken through the process of health needs analysis, risk and protective factors, planning, writing grant applications and evaluating interventions, based on identified competency requirements. Ts.

ST4005.1   Occupational Health & Safety

Specialisation units include Occupational Health Management and Safety and Risk Management which focus on the practice of occupational health within national and international frameworks. It explores issues such as the physical, social and mental impact of the occupational environment on health. Strategies for the management of occupational health are examined, together with methods of monitoring and evaluating occupational health programs. Students have the opportunity to develop a safety systems approach concentrating on hazard identification, risk assessment and devising control measures incorporating safety management principles. The legal underpinning of OHS requirements at the workplace are also covered. A double specialty with the Occupational and Environmental Hygiene is possible. Students may select two electives to suit their career aspirations.

ST4006.1   Occupational & Environmental Hygiene

The specialisation includes the units Occupational and Enviro Hygiene as well as Air Water and Noise Management. They show students the methods involved in measuring potential hazards, how to compare results with current standards before recommending methods of control. Hazards such as chemical and biological pollutants, ergonomics, noise, heat, cold and lighting in both the workplace and general indoor environment, and the various methods are considered. A range of skills required to assess the environment in relation to air, water and noise and underpinning legislative framework are explored.

SP3001.1   Health Science (standard program)

This option offer students the most flexibilty in completing their Master of Health Science. After the completion of 4 required units, students can choose their remaining units from the list of recommended electives.

Graduate Certificate in Health Science

4653.3

Students should follow the course structure for the course version relevant to the year they commenced. This version applies to students whose commencement year in this course is 2011 or later.

Areas of relevance to health employees in the public or private sector form the foundation subjects of this course: Health Policy; Leadership; Health Economics and Financial Management; Research Applications.

Study Mode
Six months full-time or 1 year part-time.

Location

Campus	Attendance	Mode
Parramatta Campus	Full Time	External
Parramatta Campus	Part Time	External
Parramatta Campus	Full Time	Internal
Parramatta Campus	Part Time	Internal

Admission
Applicants must have either:

an undergraduate degree, or higher, in a health, welfare or aged care discipline

or

a graduate diploma or graduate certificate in any discipline plus at least two years work experience in a health, welfare or aged care discipline

or

at least three years work experience in a health, welfare or aged care environment.

Applicants seeking admission on the basis of work experience MUST support their application with a Statement of Service for all work experience listed on the application.

Applications from Australian citizens and holders of permanent resident visas must be made via the Universities Admissions Centre (UAC).

Applicants who have undertaken studies overseas may have to provide proof of proficiency in English. Local and International applicants who are applying through the Universities Admissions Centre (UAC) will find details of minimum English proficiency requirements and acceptable proof on the UAC website. Local applicants applying directly to UWS should also use the information provided on the UAC website.

International applicants must apply directly to the University of Western Sydney via UWS International.

International students applying to UWS through UWS International can find details of minimum English

proficiency requirements and acceptable proof on the UWS International website.

Overseas qualifications must be deemed by the Australian Education International - National Office of Overseas Skills Recognition (AEI-NOOSR) to be equivalent to Australian qualifications in order to be considered by UAC and UWS.

Course Structure

Graduate Certificate in Health Science (generic option)
Qualifications for this award requires the successful completion of 40 credit points, including the units listed in the recommended sequence below.

Recommended Sequence

Generic Option

Full-time (Start year intake)

Autumn session

300398.2	Methods of Researching
400845.2	Health Financial Management

Choose one of

400416.2	Public Health, Policy and Society
400238.3	Policy, Power and Politics in Health Care Provision

Choose one of

400846.3	Building Organisational Capacity in Health Care
400778.2	Leadership and the Development of Organisational Capacity

Note 1: International students must select 400778 in the internal mode to ensure that they do not exceed the 25% limit of external units.

Note 2: Mid-year entry is possible, but not for student visa holders.

Part-time (Start year intake)

Autumn session

400845.2	Health Financial Management

Choose one of

Master of Health Science (Acupuncture)

4678.3

Students should follow the course structure for the course version relevant to the year they commenced. This version applies to students whose commencement year in this course is 2013 or later.

The Master of Health Science (Acupuncture) is a dynamic, postgraduate course designed for acupuncturists and Traditional Chinese Medicine practitioners wishing to strengthen their knowledge of acupuncture and better integrate in the health care system. Students will have an opportunity to develop an evidence-based approach to practice and may choose to specialise in a nominated clinical field. The integration of acupuncture with orthodox medical management and/or diagnostics is incorporated into many units. The course will be delivered via structured, intensive workshops with self-directed learning between workshops to allow maximum flexibility for busy practitioners.

Study Mode

Two years part-time. Early exit routes of a one and a half years part-time Graduate Diploma in Health Science (Acupuncture) and a one year part-time Graduate Certificate in Health Science (Acupuncture) are available.

Location

Campus	Attendance	Mode
Campbelltown Campus	Part Time	Internal

Advanced Standing

Applications for advanced standing will be assessed in accordance with current UWS policy.

Admission

Applicants must have

An undergraduate degree in Acupuncture or Traditional Chinese Medicine

Or

A Diploma, Advanced Diploma or Associate Degree in Traditional Chinese Medicine or Acupuncture

Or

Five years full-time equivalent clinical work experience in the field of Traditional Chinese Medicine or Acupuncture and recognition by an Australian professional association representing Chinese herbalists or acupuncturists.

Applicants seeking admission on the basis of work experience MUST support their application with a Statement of Service for all work experience listed on the application.

Applicants seeking admission on the basis of work experience MUST support their application with a Statement of Service for all work experience listed on the application.

Applicants holding full membership from any of associations in Group 1 will be accepted without additional assessment. Applicants holding any type of membership other than full membership from any associations in Group 1, or applicants holding any type of membership from any association in Group 2 will be further assessed. For each of these applicants, this assessment will be an interview by the Head of Program and a nominee of the Head of School. The interview will assess the applicant's prior learning, experience in the discipline and understanding of the assumed knowledge appropriate to entry into the course.

Course Structure

Qualification for this award requires the successful completion of 80 credit points including the two core units listed below.

Core units

400567.2	Evidence Based Practice in Chinese Medicine 1
400568.2	Evidence Based Practice in Chinese Medicine 2

Specialist Units

Students must complete six specialist units from the following pool.

400570.3	Women's Health in Chinese Medicine 1
400572.2	Dermatology in Chinese Medicine 1
400574.2	Musculoskeletal Health in Chinese Medicine 1
400575.2	Musculoskeletal Health in Chinese Medicine 2
400578.2	Advanced Acupuncture
400687.2	Chinese Medicine Specialities 1
400688.2	Mental Health in Chinese Medicine
400689.2	Neurological Disorders in Chinese Medicine

Graduate Diploma Exit Point

Students may exit from the Master of Health Science (Acupuncture) with a Graduate Diploma in Health Science (Acupuncture) upon the successful completion of the two core units plus four specialist units (60 credit points).

Graduate Certificate Exit Point

Students may exit from the Master of Health Science (Acupuncture) with a Graduate Certificate in Health Science (Acupuncture) upon the successful completion of any four core or specialist units (40 credit points).

Graduate Diploma in Health Science (Acupuncture) (exit only)

Master of Health Science (Traditional Chinese Medicine)

4675.3

Students should follow the course structure for the course version relevant to the year they commenced. This version applies to students whose commencement year in this course is 2013 or later.

The Master of Health Science (Traditional Chinese Medicine) (TCM) is a dynamic, postgraduate course designed for TCM practitioners wishing to strengthen their knowledge and better integrate in the health care system. Students will have an opportunity to develop an evidence-based approach to practice and may choose to specialise in a nominated clinical field. The integration of TCM with orthodox medical management and/or diagnostics is incorporated into many units. The course will be delivered via structured, intensive workshops with self-directed learning between workshops to allow maximum flexibility for busy practitioners.

Entry to some specialist units will be limited to practitioners with appropriate qualifications in Chinese herbal medicine.

Study Mode

Two years part-time. Early exit routes of a one and a half years part-time Graduate Diploma in Health Science (Traditional Chinese Medicine) and a one year part-time Graduate Certificate in Health Science (Traditional Chinese Medicine) are available.

Location

Campus	Attendance	Mode
Campbelltown Campus	Part Time	Internal

Advanced Standing

Applications for advanced standing will be assessed in accordance with current UWS policy.

Master of Occupational Therapy

4664.1

Occupational therapy is a highly regarded field in which you can apply your knowledge and skills to provide therapy for people who, because of illness, injury or circumstances, are limited in their ability to perform everyday tasks. The program promotes the value of human diversity, fundamental human rights and the dignity and worth of every client. Occupational therapists find employment in public and private hospitals, rehabilitation centres, insurance companies, schools and large corporations.

The Masters program is designed for graduates of health science and related disciplines seeking to enter the occupational therapy profession. The two year program covers the theory and practice of occupational therapy, practical experience in the field and specialised areas to develop the professional competencies important for ethical and safe practice and high quality care and the skills to work in multidisciplinary teams. Evidence-based practice is one of the most important trends in healthcare today and a strong feature of the program.

Study Mode
Two years full-time.

Location

Campus	Attendance	Mode
Campbelltown Campus	Full Time	Internal

Accreditation
The University of Western Sydney Master of Occupational Therapy is an accredited program of study and students are eligible to register with the Australian Health Practitioner Regulation Agency

Admission
Admission for Australian residents is through application via UAC.

Applicants who have undertaken studies overseas may have to provide proof of proficiency in English. Local and International applicants who are applying through the Universities Admissions Centre (UAC) will find details of minimum English proficiency requirements and acceptable proof on the UAC website. Local applicants applying directly to UWS should also use the information provided on the UAC website.

Prerequisites:
- Three year degree in Health Science or related discipline completed in the last ten years
- Grade point average greater than 5.0

All applicants will be assessed on their prior learning and given advice if additional units need to be completed in order to have the required background knowledge in behavioural and biological sciences.

International students apply directly to the University through the International Students Office.

International students applying to UWS through UWS International can find details of minimum English proficiency requirements and acceptable proof on the UWS International website.

In order to enrol in First Year Autumn units, all students must have:
- NSW Health National Criminal Record Check
- Prohibited Employment Declaration Form

In order to enrol in First Year Spring units, all students must have:
- First Aid Certificate

To be eligible to undertake fieldwork/ practice placements, students must comply with vaccination requirements and be prepared to submit a completed Adult Immunisation

Page 41

Card to placement institutions. Details of necessary vaccinations are available from NSW Health.

Course Structure

Qualification for this award requires the successful completion of 160 credit points including the units listed in the recommended sequence below.

Year 1

Autumn session

400911.1	Occupational Therapy Theory and Practice
400171.3	Occupation and Neurology
400169.3	Occupation and Mental Health
400912.1	Occupational Therapy Process

Spring session

400162.2	Child and Adolescent Occupations
400165.2	Occupation and the Environment
400865.2	Evidence-Based Practice
400176.3	Occupation and Ageing

Year 2

Autumn session

400913.1	Occupational Therapy Project
400916.2	Occupational Justice
400926.1	Ergonomics and Work Occupations
400917.1	Occupational Therapy Specialties

Spring session

400925.1	Professional Reasoning
400914.1	Occupational Therapy Practice 4
400915.1	Occupational Therapy Practice 4 Workshop

Master of Physiotherapy

4667.2

Physiotherapy is a highly regarded profession and demand for physiotherapists is strong. Physiotherapists work in private practice, aged care settings, private and public hospitals, workplaces, community based agencies, schools, rehabilitation centres and chronic health management clinics. Patients range across the life span, from birth to athletes and the elderly.

The Masters program is designed for graduates of health science and related disciplines seeking to enter the physiotherapy profession. The two year program covers the theory and practice of physiotherapy, practical experience in the field and specialised areas to develop the professional competencies important for ethical and safe practice, high quality care and the skills to work in multidisciplinary teams. Evidence-based practice is one of the most important trends in healthcare today and a strong feature of the program.

Students should follow the course structure for the course version relevant to the year they commenced. This course version applies to students whose commencement year in this course is 2013 or later.

Study Mode
Two years full-time.

Location

Campus	Attendance	Mode
Campbelltown Campus	Full Time	Internal

Accreditation
The program is designed to meet all the requirements for accreditation by the Australian Physiotherapy Council and accreditation is being sought.

Inherent requirements

There are inherent requirements for this course that you must meet in order to complete your course and graduate. Students must read and understand the requirements for this course online (see the relevant entries on the website).

Admission

Pre-requisites

Bachelors degree or higher in Health Science or related discipline completed in the last 10 years with a GPA of 5.0 (credit average) or higher, provided that prerequisite studies are completed. There is a quota of places available. All applicants with a GPA of 5.0 or greater will be considered. If places remain available, applicants with a GPA between 4.5 and 5.0 will be considered.

Prerequisite knowledge as follows:

- Human Anatomy and Physiology equivalent to the current UWS units 400868 - Human Anatomy and Physiology 1, 400869 - Human Anatomy and Physiology 2, 400881- Functional Anatomy
- Neuroscience equivalent to the current UWS unit of 300754
- Psychology equivalent to current UWS unit of 101614
- Research methods equivalent to current UWS units of 400863, 400864
- Biomechanics equivalent to current UWS unit of 400882

Knowledge in the following areas would be an advantage

- Pathophysiology
- Clinical Pharmacology

In order to enrol, all students must have:

- National Criminal History Record Check (National Police Certificate)
- A Prohibited Employment Declaration prior to 1 June 2010 OR a Working with Children Check Student Declaration after 1 June 2010
- First Aid Certificate (including cardiopulmonary resuscitation)

Admission for Australian residents is through application via UAC.

Applicants who have undertaken studies overseas may have to provide proof of proficiency in English. Local and International applicants who are applying through the Universities Admissions Centre (UAC) will find details of minimum English proficiency requirements and acceptable proof on the UAC website. Local applicants applying directly to UWS should also use the information provided on the UAC website.

Page 42

International students apply directly to the University through the International Students Office.

International students applying to UWS through UWS International can find details of minimum English proficiency requirements and acceptable proof on the UWS International website. Applicants must have IELTS equal to 7.0 or above, with a minimum of 6.5 in all of the components.

Overseas qualifications must be deemed by the Australian Education International - National Office of Overseas Skills Recognition (AEI-NOOSR) to be equivalent to Australian qualifications in order to be considered by UAC and UWS.

Special Requirements

Special note: Students in this program are required to participate fully in practical classes. This involves disrobing to shorts and singlet or swim-suit equivalent in mixed gender classes. Students will practice hands-on physiotherapy examination and treatment techniques on both genders, and will personally experience these techniques which will be performed on them by other students and relevant academic staff. To be eligible for clinical placements, students must comply with vaccination requirements and be prepared to submit a completed Adult Immunisation Card to placement institutions. NSW Health can provide details of necessary vaccinations. To be eligible to undertake field/work/practice placements, students must also comply with the NSW Health Records and Information Privacy Act (2004) and complete a relevant declaration. In clinical placement units, students must wear the UWS physiotherapy uniform, which complies with NSW uniform requirements.

Course Structure

Qualification for this award requires the successful completion of 160 credit points which include the units listed in the recommended sequence below.

Year 1

1H session

400984.1	Cardiorespiratory Physiotherapy
400987.1	Neurological Physiotherapy Practice
400983.1	Orthopaedic Physiotherapy

Autumn session

400985.1	Clinical Education A

Spring session

400997.3	Exercise Rehabilitation
400998.2	Neurological Rehabilitation
400865.2	Evidence-Based Practice
400999.3	Musculoskeletal Physiotherapy

Year 2

1H session

401047.1	Paediatric Physiotherapy
401048.1	Physiotherapy for Chronic Illness and Disease

2H session

401049.1	Complex Cases and Professional Issues
401050.1	Integrating Research into Physiotherapy Practice

Students must also complete the following four units in year 2 of the course. These units are available in both 1H and 2H sessions.

401051.1	Clinical Education B (Rehabilitation)
401052.1	Clinical Education C (Ambulatory Care)
401053.1	Clinical Education D (Paediatrics)
401054.2	Clinical Education E (Advanced Care)

Master of Podiatric Medicine

4665.2

Students should follow the course structure for the course version relevant to the year they commenced. This version applies to students whose commencement year in this course is 2012 or later.

Podiatrists are best known for treating problems that people experience with their feet, but they are increasingly playing an important role in addressing chronic conditions such as diabetes. As a podiatrist, your patients can range from children to active sportspeople to the ageing. There is a large focus on footwear, from everyday wear to workwear and athletic shoes, as well as common problems such as ingrown toenails or bunions. Podiatrists are employed in sports medicine, community centres to help the aged become more mobile, private practice, ensuring children have footwear that meets their needs, and hospital teams, addressing problems associated with chronic diseases and acute problems such as diabetes. You may also continue your training and become a podiatric surgeon.

The Masters program is designed for graduates of health science and related disciplines seeking to enter the podiatry profession. The two year program covers the theory and practice of podiatry, practical experience in the field and specialised areas to develop the professional competencies important for ethical and safe practice and high quality care and the skills to work in multidisciplinary teams. Evidence-based practice is one of the most important trends in healthcare today and a strong feature of the program.

Study Mode
Two years full-time.

programs of study accepted for general registration as a podiatrist by the Podiatry Board of Australia.

Admission

Prerequisites:

- Bachelor degree or equivalent in Health Science or related discipline completed in the last ten years with a Grade point average (GPA) of 5.0 (credit average) or higher, provided that prerequisite studies are completed.
- There is a quota of places available. All applicants with a GPA of 5.0 or greater will be considered. If places remain available, applicants with a GPA between 4.5 and 5.0 will be considered.
- Pre-requisite knowledge is required in Human Anatomy and Physiology (equivalent to the current UWS units 400868, 400869, 400881), Psychology (equivalent to the UWS unit 101614), Research methods (equivalent to the current UWS units of 400863, 400864), Neuroscience (equivalent to the current UWS unit of 300754) and Biomechanics (equivalent to the current UWS unit of 400882).
- In addition, assumed knowledge in pathophysiology and pharmacology would be an asset.

All applicants will be assessed on their prior learning and given advice if additional units need to be completed in order to have the pre-requisite knowledge in behavioural and biological sciences.

Applications from Australian citizens and holders of permanent resident visas must be made via the Universities Admissions Centre (UAC).

Applicants who have undertaken studies overseas may have to provide proof of proficiency in English. Local and International applicants who are applying through the Universities Admissions Centre (UAC) will find details of minimum English proficiency requirements and acceptable proof on the UAC website. Local applicants applying directly to UWS should also use the information provided on the UAC website.

International students must apply directly to the University of Western Sydney via UWS International.

International students applying to UWS through UWS International can find details of minimum English proficiency requirements and acceptable proof on the UWS International website.

Overseas qualifications must be deemed by the Australian Education International - National Office of Overseas Skills Recognition (AEI_NOOSR) to be equivalent to Australian qualifications in order to be considered by UAC and UWS.

Special Requirements

In order to enrol students must have: 1. National Criminal History Record Check (National Police Certificate), 2. Prohibited Employment Declaration Form prior to 1st June 2010 or a Working with Children Check Student Declaration after 1st June 2010. 3. First Aid Certificate (including cardiopulmonary resuscitation). To be eligible to undertake fieldwork placements in public hospitals, students must comply with vaccination requirements and be prepared to submit a completed Adult Immunisation Card to placement institutions. Details of necessary vaccinations are available from NSW Health.

Course Structure

Qualification for this award requires the successful completion of 160 credit points including the units listed in the recommended sequence below.

Year 1

Autumn session/1H session

400942.3	Introduction to Podiatry and Clinical Education
400935.3	Podiatric Techniques 1A
400936.3	Podiatric Techniques 1B
400929.2	Podiatric Practice 1

Spring session/2H session

400937.3	Podiatric Techniques 2A
400938.3	Podiatric Techniques 2B
400865.2	Evidence-Based Practice
400930.3	Podiatric Practice 2

Year 2

Autumn session/1H session

400939.2	Podiatric Techniques 3A
400940.2	Podiatric Techniques 3B
400941.2	Podiatric Techniques 3C
400931.2	Podiatric Practice 3

Spring session/2H session

400934.2	Podiatric Professional Practice Studies
400928.2	Podiatric Clinical Block
400932.2	Podiatric Practice 4

Master of Public Health

4571.3

Students should follow the course structure for the course version relevant to the year they commenced. This version applies to students whose commencement year in this course is 2010 or later.

The Master of Public Health course is designed for professionals working in a variety of settings, including health departments and community organisations. Emphasised is a comprehensive assessment of all determinants of health, which include broader social and environmental factors in addition to physical risk factors. Public health professionals are required to effectively assess and respond to emerging public health issues. For this, students will study a wide range of evaluation processes and research methods such as policy analysis, economic evaluation, epidemiology and qualitative methods. The focus of practical skills is in community development and health promotion programs. Students will integrate research, analytic and practical skills in the evaluation of contemporary public health issues.

Study Mode

One year full-time or two years part-time.

Admission

Applicants must have either:

an undergraduate degree, or higher, in a health, welfare or aged care discipline

or

a graduate diploma or graduate certificate in a health, welfare or aged care discipline plus at least three years work experience in a health, welfare or aged care discipline.

Applicants seeking admission on the basis of work experience MUST support their application with a Statement of Service for all work experience listed on the application.

Applications from Australian citizens and holders of permanent resident visas must be made via the Universities Admissions Centre (UAC).

Applicants who have undertaken studies overseas may have to provide proof of proficiency in English. Local and International applicants who are applying through the Universities Admissions Centre (UAC) will find details of minimum English proficiency requirements and acceptable proof on the UAC website. Local applicants applying directly to UWS should also use the information provided on the UAC website.

International applicants must apply directly to the University of Western Sydney via UWS International.

International students applying to UWS through UWS International can find details of minimum English proficiency requirements and acceptable proof on the UWS International website.

Overseas qualifications must be deemed by the Australian Education International - National Office of Overseas Skills Recognition (AEI-NOOSR) to be equivalent to Australian qualifications in order to be considered by UAC and UWS.

Course Structure

Qualification for this award requires the successful completion of 80 credit points including the units listed in the recommended sequence below.

Recommended Sequence

Full-time

Year 1

Autumn session

400416.2	Public Health, Policy and Society
400846.3	Building Organisational Capacity in Health Care
400841.2	A Global Perspective on Social Determinants of Health
300398.2	Methods of Researching

Spring session

400418.3	Health Advancement and Health Promotion

400847.3	Surveillance and Disaster Planning
400967.2	Health Economics and Comparative Health Systems
400417.2	Epidemiology and Quantitative Methods

Part-time

Year 1

Autumn session

400416.2	Public Health, Policy and Society
300398.2	Methods of Researching

Spring session

400847.3	Surveillance and Disaster Planning
400417.2	Epidemiology and Quantitative Methods

Students may exit with a Graduate Certificate in Public Health at this point.

Year 2

Autumn session

400841.2	A Global Perspective on Social Determinants of Health
400846.3	Building Organisational Capacity in Health Care

Spring session

400967.2	Health Economics and Comparative Health Systems
400418.3	Health Advancement and Health Promotion

Graduate Diploma in Public Health

4572.3

Students should follow the course structure for the course version relevant to the year they commenced. This version applies to students whose commencement year in this course is 2010 or later.

The Graduate Diploma course in public health is designed for health professionals who wish to extend and consolidate both practical and research skills for public health practice. For this, students will study a wide range of evaluation processes and research methods such as policy analysis, economic evaluation, epidemiology and qualitative methods. Practical program skills are developed in community development and health promotion.

Study Mode
One year full-time or one and a half years part-time.

Specialisation - Health Planning

ST4002.1

All managers undertake forward planning to proactively manage future services and identify workforce and facility requirements. This specialisation keeps students up-to-date with current forward planning approaches and initiatives in health and other sectors that work with health. Students are exposed to the process of planning, how to set goals and objectives, monitor and evaluate performance outcomes. Current issues are explored in the specialty units Health Services and Facilities Planning, Workforce Planning and also Quality and Safety in Health Care.

300682.2   Occupational and Environmental Hygiene
400418.3   Health Advancement and Health Promotion

Specialisation - International Health

ST4003.1

This specialisation broadens the public health approach of looking at all determinants of health, which include broader social and environmental factors in addition to physical risk factors to include international health studies. For this, students will study a wide range of evaluation processes and research methods such as policy analysis, economic evaluation, epidemiology and qualitative methods. The focus of practical skills is in Communicable Diseases, and students will integrate research, analytical and practical skills in the evaluation of contemporary public health issues.

Unit Set Structure

Master of Health Science (Health Promotion)

Qualification for this award requires the successful completion of 80 credit points including the units listed below. Students should plan their enrolment schedule from the beginning to ensure they can finish as planned. Many units are only available in Autumn or only available in Spring. Please click on each unit number to carefully check the timetable and mode of offering for each unit. Some units are only offered in the external mode. International students must plan carefully, as they can only take a maximum of 25% of their units in the external mode.

400416.2	Public Health, Policy and Society
400845.2	Health Financial Management
300398.2	Methods of Researching
400841.2	A Global Perspective on Social Determinants of Health
400418.3	Health Advancement and Health Promotion
400846.3	Building Organisational Capacity in Health Care

Students may exit with a Graduate Diploma in Health Science (Health Promotion) at this point on completion of the above units.

The following unit is offered in external mode

400840.3	Communicable Diseases

The following units are offered in both internal (on campus) and external mode

300391.2	Occupational Health Management
300677.2	Safety and Risk Management
300679.2	Air, Water and Noise Management
300682.2	Occupational and Environmental Hygiene
400837.3	Health and Socio-political Issues in Aged Care

400842.2	Quality and Safety in Health Care
400843.2	Health Workforce Planning
400844.2	Health Services and Facilities Planning

Specialisation - Occupational Health & Safety

ST4005.1

Specialisation units include Occupational Health Management and Safety and Risk Management which focus on the practice of occupational health within national and international frameworks. It explores issues such as the physical, social and mental impact of the occupational environment on health. Strategies for the management of occupational health are examined, together with methods of monitoring and evaluating occupational health programs. Students have the opportunity to develop a safety systems approach concentrating on hazard identification, risk assessment and devising control measures incorporating safety management principles. The legal underpinning of OHS requirements at the workplace are also covered. Students may select two electives to suit their career aspirations.

Specialisation - Occupational & Environmental Hygiene

ST4006.1

This specialisation is available to students who commenced prior to 2013. The specialisation includes the units Occupational and Environmental Hygiene as well as Air Water and Noise Management. They show students the methods involved in measuring potential hazards, how to compare results with current standards before recommending methods of control. Hazards such as chemical and biological pollutants, ergonomics, noise, heat, cold and lighting in both the workplace and general indoor environment, and the various methods are considered. A range of skills required to assess the environment in relation to air, water and noise and underpinning legislative framework are explored.

Specialisation - Clinical Teaching

ST4011.1

The Clinical Teaching specialisation provides students with an opportunity to gain formal education in clinical teaching to either enhance their existing teaching experience or provide skill development in this area. Graduates who complete the Clinical Teaching specialisation will be prepared to take on a leadership role in clinical teaching in the roles such as clinical nurse educator, nurse educator, clinical nurse specialist and undergraduate placement facilitator.

Specialisation - Health Services Management

ST4013.1

This specialisation is designed for managers who require skills in contemporary management and their application in the health care setting. Particular emphasis is placed on critical and analytic skills in policy analysis, economic evaluation and epidemiology, thus providing graduates with the ability to respond creatively to changes as they arise. Health managers need to be current with developments in the general business area so potential in the health care setting can be evaluated and appropriate initiatives implemented. Particular specialty units include Strategic Analysis and Decision Making, Health Workforce Planning as well as Quality and Safety in Health Care.

Page 57

Units

400841.2   A Global Perspective on Social Determinants of Health

Credit Points 10 **Level** 7

....

Evidence is mounting that the health of individuals, groups and whole populations is significantly determined by social factors - the social determinants. The related research has its origins in concern for the growing inequalities in health both within and between countries. This unit examines the framework of the social determinants of health in a global perspective and includes a reflection on the phenomenon of globalisation and its impact, both positive and negative on people's health. Students will critically reflect on this relatively new and emerging body of knowledge and research which clearly situates the maintenance of health and healthy societies within their socioeconomic and socio-cultural contexts. They will also examine implications for policy, health systems and different groups within society.

400578.2   Advanced Acupuncture

Credit Points 10 **Level** 7

Assumed Knowledge

Equivalent to undergraduate studies in acupuncture.

....

This is a practical unit that helps strengthen graduate acupuncture skills in the management of a range of illnesses. This unit will deepen the practitioners' understanding of the ancient acupuncture theories and techniques and their application in contemporary practice. Practitioners will extend their understanding of different theoretical approaches in the design of acupuncture point prescriptions and examine the strengths and weaknesses of each approach. Evidence in support of acupuncture practice will be explored.

300603.2   Advanced Control Systems

Credit Points 10 **Level** 7

Assumed Knowledge

Knowledge is assumed in Continuous time control systems, the use of Laplace and Z-transforms, Analog to digital, digital to analog conversion, Vector matrix difference equations, State variable models and familiarity with Matlab or similar software

Incompatible Units

300211 - Digital Control, 300172 - Advanced Control Systems

Special Requirements

Students must have competence in the use of test equipment, components and data sheets.

....

This unit covers continuous and discrete control systems. It reviews and builds on the fundamental concepts of the

theory of feedback in continuous and discrete time to examine the analysis and design of advanced continuous and discrete time linear control systems. Transfer function and state variable methods are employed. Instruction makes use of extensive experimental tasks. There is also considerable use of Matlab simulations.

300173.2   Advanced Data Networks

Credit Points 10 **Level** 7

Assumed Knowledge

Communication Systems / Digital Communication

....

This unit covers all major network technologies: asynchronous transfer mode (ATM), Internet, and telephony. Essential networking topics such as protocol layering, multiple access, switching, scheduling, routing, congestion control, error and flow control, and network security are covered in detail. An engineering approach is taken to provide insight into network design.

300601.2   Advanced Electrical Machines and Drives

Credit Points 10 **Level** 7

Assumed Knowledge

Electric Circuits and Basic Electro magnetics.

Incompatible Units

300208 - Variable Speed Electric Drives, 300204 - Special Electrical Machines

....

The subject covers various types of electrical motors and drive systems, their applications and control. The unit aims to introduce an advanced study of electrical machines and drives. It also covers application considerations and modern developments in high performance drive systems. This course covers various types of the speed control, the starting, the braking and the dynamics of different electrical machines and drives.

300602.2   Advanced Environmental Engineering

Credit Points 10 **Level** 7

Assumed Knowledge

University level Mathematics, Chemistry and Fluid Mechanics.

....

The unit provides advanced materials on ecological sustainability (e.g. life cycle analysis of water sensitive urban design components, water recycling and reuse and rainwater tanks), water quality modelling (stormwater pollution build up and washoff and contaminant transport in natural rivers) and wastewater treatment using traditional and new techniques. This involves application of software packages and computer programs to analyse and design a number of real world environmental engineering projects. The unit is delivered on a project-based learning mode.

UWS Postgraduate Handbook , 2014
Health and Science Schools - Postgraduate
This file was created on 12/03/2014 4:15:06 PM. Please check the online handbook for changes made after this date.

Page 58

300604.2 Advanced Geotechnical Engineering

Credit Points 10 **Level** 7

Assumed Knowledge

Fundamental knowledge of soil mechanics.

Equivalent Units

300520 - Foundation Engineering (PG)

....

This unit will provide an overview of soil mechanics concepts required for the solution of practical geotechnical engineering problems. Students will be taught soil and foundation analysis including design techniques. The topics will cover shallow foundations, pile foundations, the stability of earth retaining structures, excavations, soft soils, groundwater flow and stability of slopes. Practical engineering cases will be emphasized.

400859.2 Advanced Mental Health Nursing Clinical Practice 1

Credit Points 20 **Level** 7

Assumed Knowledge

Registered nurse students are expected to be working at an advanced practice level in a mental health setting and thus to have knowledge of a range of assessment and clinical intervention skills and knowledge commensurate with their clinical role in this area.

Prerequisite

400228.3 Assessment for Advanced Practice Mental Health Nurses AND **400858.3** Psychopharmacology for Advanced Practice Mental Health Nurses

Incompatible Units

400229 - Advanced Mental Health Nursing Clinical Practice 1

Special Requirements

Students must be registered nurses working in mental health services at an advanced clinical practice level, must nominate a clinical supervisor and must nominate a clinical panel.

....

Students are required to demonstrate the capacity to work autonomously in a mental health setting and to be able to utilise various forms of supervision. Students undertake at least 150 hours supervised advanced practice in assessment, treatment planning and provision of care for clients in a mental health setting. Supervision is provided by a primary supervisor/mentor/assessor and a multidisciplinary clinical panel who can support and review the student's work in respect of working at an advanced level of clinical practice. The requirement for primary supervision and a review panel is mandated by the NSW Nurses and Midwives Board.

400860.2 Advanced Mental Health Nursing Clinical Practice 2

Credit Points 20 **Level** 7

Assumed Knowledge

This is an advanced level clinical nursing unit. Students are expected to be working in situations where they can demonstrate this level of practice. They will have advanced skills in mental health nursing assessment, clinical decision-making and treatment planning; knowledge of mental disorders and illnesses; human response to mental illness; the development of relationships with people with mental illness and their families; and a range of treatments for mental illness.

Prerequisite

400228.3 Assessment for Advanced Practice Mental Health Nurses AND **400858.3** Psychopharmacology for Advanced Practice Mental Health Nurses AND **400859.2** Advanced Mental Health Nursing Clinical Practice 1

Incompatible Units

400231 - Advanced Mental Health Nursing Clinical Practice 2

Special Requirements

Students are working in mental health services at an advanced clinical practice level, are required to have previously nominated a Primary Supervisor/Mentor/Assessor and a clinical support group.

....

Students are required to demonstrate the capacity to work autonomously in a mental health setting and to be able to utilise supervision to support achievement of unit learning objectives. Students undertake at least 150 hours supervised advanced clinical practice in assessment, treatment planning and provision of care for clients in a mental health setting. Clinical practice setting supervision is provided by a Primary Supervisor/Mentor/Assessor and a multidisciplinary clinical support group who will support and review the student's work in respect of working at an advanced level of clinical practice towards the attainment of a Nurse Practitioner qualification. A clinical assessment peer review panel that complies with NMB guidelines will be convened at the end of the session to assess the student's knowledge, clinical decision-making, understanding of therapeutic interventions including pharmacological and non-pharmacological agents, as well as their capacity to meet all requirements of the National Competency Standards for the Nurse Practitioner.

400834.1 Advanced practice: Infant and Child feeding and Nutrition

Credit Points 10 **Level** 7

Assumed Knowledge

Basics of breastfeeding including techniques for positioning and attachment and common breastfeeding problems; socio-cultural and political context of infant feeding; normal newborn behaviour, infant-parent attachment, factors that influence the transition to parenthood and parenting styles; skills required to critcally appraise research literature and high level communication skills and capacity to work in partnership with families.

UWS Postgraduate Handbook , 2014
Health and Science Schools - Postgraduate
This file was created on 12/03/2014 4:15:06 PM. Please check the online handbook for changes made after this date.

Page 59

Special Requirements

Registered Nurse, Registered Midwife or health professional due to public safety issues.

....

This unit provides students with advanced theoretical knowledge around infant and young child feeding. The unit is predominantly theoretical although students will also be expected to gain practical skills including developing the capacity to undertake comprehensive breastfeeding assessments and assessment of nutritional status in children 0 to 5 years of age. Topics covered include management of complex breastfeeding problems and skills to support women who have unexpected birth outcomes with breastfeeding; the impact of acute and chronic infant and childhood illness on nutritional status and feeding; evidence based strategies and approaches to facilitate good nutritional practices including breastfeeding among disadvantaged and vulnerable populations and working effectively in multidisciplinary teams and with peer or volunteer support groups to promote and support healthy infant and young child feeding practices. This unit provides students with the theoretical background required to undertake the examination set by the International Board of Clinical Lactation Consultants. There are 120 hours of theoretical content of which approximately 90 hours is directly related to breastfeeding and human lactation. The role of the lactation consultant and legal and ethical issue are addressed for those who wish to work towards this exam.

300599.2   Advanced Robotics

Credit Points 10 **Level** 7

Assumed Knowledge

Basic knowledge in mechanics.

Incompatible Units

300176 - Advanced Robotics, 300192 - Mobile Robotic Systems

....

To develop an understanding of the advanced concepts involved in Robotics. The kinematics, dynamics, control and sensing aspects in robotics will be studied. In addition, the current development in the mobile robotics area will be introduced. There will be a considerable use of MATLAB in the unit.

300596.2   Advanced Signal Processing

Credit Points 10 **Level** 7

Assumed Knowledge

Engineering mathematics, circuit theory, signals and systems.

Equivalent Units

300200 - Signal Processing 1

....

This unit covers the principles and techniques in signal processing. Topics include sampling and quantisation of analogue signals, analysis of digital signals in the time domain and frequency domain, digital filter design, multi-rate signal processing, signal processing hardware and

finite word-length effects in hardware implementation. Students develop skills of analysing and designing digital signal processing systems.

300594.3   Advanced Structural Analysis

Credit Points 10 **Level** 7

Assumed Knowledge

Students must have knowledge in engineering mathematics, engineering mechanics at intermediate level and structural analysis at fundamental level.

Incompatible Units

300205 - Linear and Nonlinear Analysis of Structures, 300367 - Advanced Structural Engineering, 300195 - Numerical and Finite Element Methods

....

This unit introduces students to the aspects of structural analysis of beams, trusses, frames and plates. It covers several displacement based methods for the analysis of trusses, beams and frames, i.e. slope deflection method and matrix method. The basic concepts of plate bending analysis will be discussed. This unit aims to teach students to master necessary skills in structural analysis as well as skills in using computer software to analyse complex structures.

300605.2   Advanced Structural Design

Credit Points 10 **Level** 7

Assumed Knowledge

Students must have knowledge in engineering mechanics and structural analysis at intermediate level.

Incompatible Units

88131 - Concrete Structures (UG), 88121 - Steel Structures (UG)

....

This unit introduces students to advanced topics in the structural design of reinforced concrete, pre-stressed concrete and steel structures. It will discuss the stiffness, stability and strength of structural elements and structural systems composed of these materials.

300694.2   Advanced Topics in ICT

Credit Points 10 **Level** 7

Assumed Knowledge

300693 Web Technologies and 300695 Network Technology are the two core units for Master of Information and Communications Technologies. Without the basic understanding of these technologies, students will not be able to deal with the advanced topics.

Prerequisite

300693.2 Web Technologies AND **300695.2** Network Technologies

Special Requirements

Students must be enrolled in a postgraduate course.

....

UWS Postgraduate Handbook , 2014
Health and Science Schools - Postgraduate
This file was created on 12/03/2014 4:15:06 PM. Please check the online handbook for changes made after this date.

Page 60

The information and communications technologies are advancing at an ever-increasing rate. The whole world is now interconnected. The World Wide Web community is actively engaged in developing the next generation of the Web, called Web 2.0. Social networking on the Internet is facilitated by the latest developments such as Facebook, YouTube and MySpace. Large scale storage technologies are leading to Cloud Computing where data and applications may reside anywhere in the world. Research in how to access meaningful data from the vast amounts on the Web have led to initiatives such as Semantic Web and Linked Data. Mashups mix data from disparate sources to enable users to work more efficiently. Event Web and Second Life promise to change the way we interact. Wireless and mobile computing are changing the market place. All of these trends are still in their early stages. To make sense of all these developments, the top echelon of the World Wide Web Consortium are actively engaged in creating a new discipline called Web Science. Advanced Topics in ICT will enable the students to appreciate the scale of new developments and create prototypes of applications in their desired ambit.

300252.3   Advanced Topics in Networking

Credit Points 10 **Level** 7

Assumed Knowledge

Students should be familiar with the fundamentals of computer networking. In particular, students should have a good understanding of the OSI model, the TCP/IP protocol suite, and current Internet and networking technologies. Therefore, it is strongly advised that students must have either taken an appropriate unit in computer networking (e. g., 300695 Network Technologies), or have equivalent knowledge.

Special Requirements

Students must be enrolled in a postgraduate course

....

This unit focuses on the advanced features of networked systems and the emerging network technologies and services. The unit provides students with an in-depth understanding of relevant protocols, the emerging standards, and standards organisations. The emphasis of the unit is on development of the student skills to enable them to do proficient research and development works and studies in the computer networking discipline.

300595.2   Advanced Water Engineering

Credit Points 10 **Level** 7

Assumed Knowledge

Students must have a background in water and related technology at tertiary level

Equivalent Units

300519 - Drainage Engineering (PG)

....

This unit exposes students to the concepts of drainage analysis. It focuses on the surface water components of a hydrologic cycle. The hydrologic theories will be integrated with the hydraulic principles to enable holistic analysis of a catchment.

300679.2   Air, Water and Noise Management

Credit Points 10 **Level** 7

Assumed Knowledge

Students should have a basic understanding on air, water and noise environmental issues and the science that underpins them.

Equivalent Units

EY810A- Aquatic Resource Management, EY813A - Management of Aquatic Environments, EH837A - Air Quality Assessment and Management.

....

This unit introduces the student to a range of skills required to assess the environment in relation to air, water and noise. Students will be introduced to the legislative framework that supports pollution control and environmental management in NSW. Methods of controlling air, water and noise pollution will be covered. The concept of indicators and their use will be introduced. Students will select either an air, water or noise issue to undertake a more in-depth study for assessment purposes.

401063.1   Allergic Sciences

Credit Points 20 **Level** 7

Assumed Knowledge

Must have completed a medical degree (MBBS, MBChB or equivalent qualification) and be practising as a clinician.

Equivalent Units

400988 - Allergic Sciences 1 AND 400989 - Allergic Sciences 2

Special Requirements

Students must be enrolled in 4689 - Graduate Certificate in Allergic Diseases. Students must be practising medical practitioners and be able to access a specialist Immunology and Allergy clinic. Students will need to attend the ASCIA Annual Scientific Meeting and annual Macarthur Series in Immunology/Allergy and take part in the specific program run for students of this program. Students will need a computer and internet access to use the e-learning platform vUWS at https://vuws.uws.edu.au/. Skype software will be required to participate in online group discussions.

....

This unit will consist of eight online modules dealing with the basic science of allergic disease. The modules will cover Immunology, Allergic Skin Disease, Food Hypersensitivity, Food Related Gastrointestinal Disease and Anaphylaxis, Allergic Airways Disease, Allergic Rhinoconjunctivitis, Drug and Insect Allergy, and Paediatric Allergy. These modules will provide a sound basis for later clinical experiences. Support will be available from an experienced Clinical Immunologist and Allergist. Students will need to attend the Australasian Society of Clinical Immunology and Allergy (ASCIA) Annual Scientific Meeting and the annual Macarthur Series in Immunology/Allergy and take part in the specific program run for students of this program.

Page 61

200499.3 Alternative Solutions for Bushfire Prone Areas

Credit Points 10 **Level** 7

Assumed Knowledge

Students must have prior knowledge of bushfire behaviour, planning, building and bushfire fighting and emergency management.

Prerequisite

200457.3 Bushfire Behaviour AND **200458.2** Building in Bushfire Prone Areas AND **300708.3** Planning and Development Control AND **200500.2** Bushfire Fighting OR **300948.1** Fire Technology and Engineering Principles

Corequisite

200459.2 Emergency Management for Bushfire Prone Areas

....

This unit describes the processes and techniques available to develop alternative approaches and solutions to the planning and building of structures within bushfire prone areas. The course builds on other units in the course to consider the concept of measures in combination so as to reduce the effects of bushfire on life, property and the environment. It also introduces the concepts of "bushfire engineering guidelines" and processes similar to that used in developing alternative solutions under the Building Code of Australia. Students are required to develop an alternative solution for bushfire affected premises.

400200.2 Applied Nursing Research

Credit Points 10 **Level** 7

Assumed Knowledge

A basic knowledge of research methods at undergraduate level or equivalent.

Special Requirements

Students must be enrolled in a postgraduate course.

....

Research is a necessary undertaking toward the continued development of nursing knowledge as well as personal professional development. The aim of this unit is to both broaden and deepen students' understanding of research methods and to extend their ability to discuss, appraise the work of others and participate in their own research.

400856.1 Approaches to Epidemiology

Credit Points 10 **Level** 7

Equivalent Units

HC812A - Approaches to Epidemiology

Special Requirements

Students must be enrolled in 4569 Master of Primary Health Care or 4570 Graduate Diploma in Primary Health Care.

....

This unit presents the principles, strategies and activities associated with social epidemiology and the contribution that this epidemiology makes to the understanding of health and illness of individuals, families and communities. Consideration of social epidemiology in supplementing classical approaches is included, as is consideration of primary health care epidemiology in relation to health service delivery and planning. Students will explore the consequences of primary health care decision making that will enable evidence-based health care practice and relate it to their practice.

400228.3 Assessment for Advanced Practice Mental Health Nurses

Credit Points 10 **Level** 7

Special Requirements

Students must be enrolled in a postgraduate course. Students enrolled in course 4673 must have passed the following three units before they can enrol in this unit - 400238 Policy, Power and Politics in Health Care Provision and 400777 Leadership for Quality and Safety in Health Care and 400957 Biological Considerations in Mental Health and Mental Illness for Advanced Practice.

....

This unit examines assessment and treatment planning practices for advanced practice nurses. Components of the unit include advanced assessment skills, diagnostic decision making, judicious ordering, reading and interpretation of pathology and radiology tests, triaging and prioritisation, pharmacology, intervention and referral skills. These skills will be addressed in a range of assessment and decision-making situations, to include assessment across the lifespan and recognizing deviation from the norm. Nurses working at an advanced practice level are expected to be able to autonomously undertake comprehensive mental health assessments, and to apply clinical judgement to decision making and treatment planning.

400957.3 Biological Considerations in Mental Health and Mental Illness for Advanced Practice

Credit Points 10 **Level** 7

Special Requirements

Students must be enrolled in a postgraduate course. Students enrolled in course 4673 must have passed the following three units before they can enrol in this unit - 400220 Contemporary Professional Practice in Mental Health Nursing and 400206 Evidence-based Nursing and 400235 Leadership in Clinical Practice.

....

This unit examines neuroanatomy and neurophysiology as they apply to altered thought, mood, perception and behaviour associated with mental illness; biological contributors to mental illness including hormones, genes, immune mechanisms, nutrition, and sleep disturbance; and the application of an understanding of biological contributors to advanced mental health practice.

UWS Postgraduate Handbook , 2014
Health and Science Schools - Postgraduate
This file was created on 12/03/2014 4:15:06 PM. Please check the online handbook for changes made after this date.

Page 62

300713.2   Building Engineering

Credit Points 10 **Level** 7

Equivalent Units

EN808A - Building Engineering

....

The aim of this unit is to provide students with an understanding of the factors that contribute to decisions in building design in respect of compliance with building regulations and standards. Topics include soil classification for construction, footing systems, loadings and their evaluation, structural materials and systems, structural behaviour and strength, and failure and rectification.

300711.2   Building Fire Services

Credit Points 10 **Level** 7

Assumed Knowledge

Building surveying, fire safety engineering and related disciplines.

Equivalent Units

PE806A - Building Fire Services

....

This unit describes the various types and application of building services and fire safety systems. It introduces appropriate standards for building fire service system design and the methods of applying recommendations of fire engineering assessments with respect to building services and fire safety systems.

200458.2   Building in Bushfire Prone Areas

Credit Points 10 **Level** 7

....

This unit describes the basis for the design and construction of buildings to withstand bushfire attack, the measures that can be incorporated into building design to achieve this and the legislative building requirements affecting bushfire environments. The unit examines the mechanisms of bushfire attack on structures, the role of landscaping on building survival and how materials perform in the presence of a bushfire event. The unit describes the role of the Building Code of Australia (BCA) and Australian Standards in the construction of various building types and the legislative and regulatory environment in which this operates.

400846.3   Building Organisational Capacity in Health Care

Credit Points 10 **Level** 7

Equivalent Units

400778 - Leadership and the Development of Organisational Capacity in Health Care

Special Requirements

Students must be enrolled in a postgraduate course.

....

The concept, form and structure of health care organisations are explored. Organisational theory is used to analyse contemporary health care structures. Factors which influence organisational design, function and effectiveness are discussed including: organisational behaviour, strategy, culture, power and politics, technology, sustainability and effectiveness. A major focus is planning for strategic organisational development to meet the challenges of rapid change and the need for performance improvements in patient care delivery. Concepts related to the strategic development of workforce capacity in the health care arena considered through the application of theories including the learning organisation. Leadership is examined with emphasis on change management.

300947.1   Building Regulations

Credit Points 10 **Level** 7

Assumed Knowledge

This unit assumes that the student has undertaken coursework in building construction, building surveying, engineering, architecture or a related area or has the relevant AQF qualification and gained basic building regulation knowledge by working in the construction industry in an appropriate capacity for at least four years.

Equivalent Units

300719 - Fire and Building Regulations

....

This unit introduces the role and functions of the building surveyor and the National Construction Code of Australia (NCCA). The topics include building legislation, NCCA general provisions, structure and philosophy. Students are required to understand the objectives, the function statements and the performance requirements of various sections of Volume One of NCCA. The concept of performance based approach is discussed and compared with the prescriptive approach. The content covers the relationship between research in the development of building codes and the role played by approval/certifying authorities in building assessment and approval. Legal obligations of building surveyors, their tasks of assessment, enforcement and documentation are also explained.

300716.2   Building Studies

Credit Points 10 **Level** 7

Assumed Knowledge

This subject assumes that the student has undertaken undergraduate coursework in building surveying, planning or related areas or has gained the equivalent building construction knowledge by working in the construction industry in an appropriate capacity for at least four years.

Equivalent Units

BG812A - Building Studies

....

This unit describes and analyses the technological, socio-economic and sustainability factors that influence the building industry. The topics include advances in contemporary issues affecting sustainability and energy conservation, access and adaptable housing, safety in special areas and building design in accordance with the

UWS Postgraduate Handbook , 2014
Health and Science Schools - Postgraduate
This file was created on 12/03/2014 4:15:06 PM. Please check the online handbook for changes made after this date.

Page 63

relevant legislative requirements. Use of assessment tools for sustainability is covered. Discussions are also made on development management, the roles and the relationship between building owners /occupiers, developers and building surveyors.

200457.3   Bushfire Behaviour

Credit Points 10 **Level** 7

Assumed Knowledge

This unit assumes that the student has undertaken undergraduate coursework in building surveying, planning or related areas or has gained the equivalent building construction knowledge by working in the construction industry in an appropriate capacity for at least four years.

....

This unit describes the factors affecting bushfire behaviour and the models which are used to predict bushfire behaviour, the principles of fire ecology, and the assessment of bushfire hazards on property and the environment. Topics include the measurement of fuel, rates of spread and flame length equations, fire danger indices and landscape issues, topographical influences on fire behaviour, the importance of fire regimes and fire thresholds on flora and fauna, habitat and fire impacts on environmental services such as soils and water catchments. The role of fire behaviour in determining impacts on structures is also described.

200500.2   Bushfire Fighting

Credit Points 10 **Level** 7

Assumed Knowledge

This subject assumes that the student has undertaken undergraduate coursework in building surveying, planning or related areas or has gained the equivalent building construction knowledge by working in the construction industry in an appropriate capacity for at least four years

....

This unit describes the techniques, hardware and extinguishing agents used to fight and control bushfires and focuses on the logistics involved in ensuring safe, efficient and effective control. The content includes bushfire fighting strategies in the context of rural and interface environments, hazard reduction, brigade structure and incident control arrangements. The role of planning in supporting fire fighting is also considered.

400984.1   Cardiorespiratory Physiotherapy

Credit Points 10 **Level** 3

Prerequisite

400982.1 Core Competencies in Physiotherapy Practice AND **400981.1** Clinical Pharmacology AND **400870.1** Population Health and Society AND **400864.2** Research Methods (Quantitative and Qualitative)

Corequisite

400984.1 Cardiorespiratory Physiotherapy AND **400986.1** Neurological Physiotherapy AND **400985.1** Clinical Education A

Special Requirements

Students must be enrolled in 4662 Bachelor of Health Science/Master of Physiotherapy, 4668 Bachelor of Health Science (Honours)/Master of Physiotherapy or Graduate Entry Master of Physiotherapy programs. Students in this program are required to participate fully in practical classes. This involves disrobing to shorts and singlet or swim-suit equivalent in mixed gender classes. Students will practice hands-on physiotherapy examination and treatment techniques on both genders, and will personally experience these techniques which will be performed on them by other students and relevant academic staff. Students cannot enrol in Year 3 Physiotherapy units until they have completed 160 credit points in the Bachelor of Health Science/Master of Physiotherapy and 4668 Bachelor of Health Science (Honours)/Master of Physiotherapy programs.

....

This unit builds on the knowledge and skills developed in the first two years of physiotherapy study. It focuses on client assessment and evidence-based management in acute cardiorespiratory physiotherapy contexts. This will require strong communication skills, ethical and professional behaviour and an appreciation of interprofessional care. Professional competencies addressed in this unit include introductory skills in cardiorespiratory physiotherapy assessment, interpretation and prioritisation of findings along with the implementation and evaluation of appropriate treatment strategies.

400972.2   Child & Family Health Practice: Supporting Growth and Development

Credit Points 10 **Level** 7

Assumed Knowledge

Students require basic knowledge of infant and child health at an undergraduate level, augmented with clinical experience as a general Registered Nurse or Registered Midwife.

Equivalent Units

400207 - Childhood in Child and Family Health Nursing, 400829 - Child and Family Health Nursing: Supporting Child Growth and Development

Special Requirements

Due to clinical placement requirements for this unit, students must be enrolled in 4682 Master of Child and Family Health (Karitane) or 4683 Graduate Certificate in Child and Family Health (Karitane). Patient safety issues are associated. Students must complete the NSW Health Special Requirements for clinical practicum attendance. At present these include: Prohibited Employment Declaration prior to 1 June 2010 or a Working with Children Check Student Declaration after 1 June 2010, Criminal Record Check form prior to 1 June 2010 or a Student Undertaking Form after 1 June 2010 and have applied for a National Police Certificate, Adult Health Immunisation Schedule. NSW Ministry of Health may request additional documents according to policy changes. Students outside NSW are expected to meet any other state requirements for clinical placement

....

UWS Postgraduate Handbook , 2014
Health and Science Schools - Postgraduate
This file was created on 12/03/2014 4:15:06 PM. Please check the online handbook for changes made after this date.

Page 64

This unit provides the student with knowledge of the theories of child development and the foundational knowledge and skills to be applied in the screening, surveillance and promotion of health and well-being of young children and families. This includes current immunisation schedules and use of evidence-based developmental screening tools. Content will focus on the normal physical, social and emotional growth and development of young children (0-5 years). The importance of the early years in brain development including infant-parent attachment will be linked to an exploration of child behaviour, sleep and settling, play and safety issues. The child and family health nurses' role in supporting families experiencing infant sleep and settling difficulties and behaviour problems will be addressed. The application of knowledge gained in this unit will be applied through a 40 hr clinical placement in a primary level child and family health facility.

400971.1 Child & Family Health: Professional Practice and Frameworks

Credit Points 10 **Level** 7

Assumed Knowledge

An understanding of professional frameworks and competencies for the Registered Nurse or Registered Midwife at a undergraduate level, augmented with clinical experience at a general Registered Nurse or Registered Midwife level.

Equivalent Units

400828 - Child & Family Health Nursing :Professional Practice and Frameworks

Special Requirements

Students must be enrolled in 4682 Master of Child and Family Health (Karitane) or 4683 Graduate Certificate in Child and Family Health (Karitane) (exit only).

....

Child and family health is a diverse speciality area with child and family health professionals required to work autonomously across a variety of clinical settings. This unit will focus on the scope and standards of practice of Child and family health practise exploring; historical beginnings and current models of care, appropriate legal & ethical issues and government policies and initiatives that influence practice. Informed by the principles of Primary Health Care, the student will gain skills in supporting families and children within the context of a strengths based partnership model. Health promotion, public health, health surveillance and cultural competence are introduced in this unit. The various strategies for the appropriate support of child and family health professionals will be addressed. In this unit emphasis is also placed on critical thinking and the development of scholarly writing.

400162.2 Child and Adolescent Occupations

Credit Points 10 **Level** 3

Assumed Knowledge

First and second Year specialty occupational therapy units or Occupational Therapy Theory and Practice.

Special Requirements

Students must be enrolled in 4663 Bachelor of Health Science/Masters of Occupational Therapy or 4664 Master of Occupational Therapy. Students must comply with the following special requirements: Prior to enrolling in this unit students must have: 1) successfully completed an approved Child Protection Workshop 2) submitted a Prohibited Employment Declaration prior to 1 June 2010 or a Working with Children Check Student Declaration after 1 June 2010 3) if students are visiting a NSW Health facility they will need to comply with the occupational screening and immunisation policy of NSW Health.

....

Students learn about paediatric and adolescent occupational therapy practice in different practice settings. This unit examines child development and explores the occupations of childhood and adolescence. Occupational therapy models, frames of reference, assessments and interventions are applied to practice scenarios. Family-centred practice is a key focus of this unit. There will be a self directed and reflective learning approach in this unit.

400576.2 Chinese Medicine Classics

Credit Points 10 **Level** 7

Assumed Knowledge

Equivalent to undergraduate training in Traditional Chinese Medicine (TCM) including Chinese Herbal Medicine (Materia Medica and Medicinal Formulae) and Chinese medicine classics including Shang Han Lun (Treatise on Cold Induced Disorders).

....

This unit will explore in detail the applications of one of the classic texts of Chinese medicine literature, the Shang Han Lun (Treatise of Cold Induced Disorders), in the treatment of a range of illnesses. The unit will cover the essential features of diseases of the ' six channels' (stages of pathogenesis) and modifications and combinations of key medicinal formulae.

400687.2 Chinese Medicine Specialities 1

Credit Points 10 **Level** 7

....

This unit will enable practitioners to extend their understanding of the Traditional Chinese Medicine (TCM) diagnosis and management of a range of gastrointestinal and paediatric disorders. A feature of this unit is the integration of TCM and western medical approaches. Treatment will focus on acupuncture with common patent Chinese herbal medicine treatments included.

401064.1 Clinical Allergy

Credit Points 20 **Level** 7

Assumed Knowledge

Must have completed a medical degree (MBBS, MBChB or equivalent qualification) and be practising as a clinician.

Prerequisite

400988.1 Allergic Sciences 1 AND **400989.1** Allergic Sciences 2 OR **401063.1** Allergic Sciences

UWS Postgraduate Handbook , 2014
Health and Science Schools - Postgraduate
This file was created on 12/03/2014 4:15:06 PM. Please check the online handbook for changes made after this date.

Page 65

Equivalent Units

400990 - Clinical Allergy 1, 400991 - Clinical Allergy 2

Special Requirements

Students must be enrolled in 4689 - Graduate Certificate in Allergic Diseases. Students must be practising medical practitioners and be able to access a specialist Immunology and Allergy clinic. Such clinics are located in accredited teaching hospitals in the Australian and New Zealand public health systems. Students must undergo routine employment screening and checks according to hospital policy and meet institutional requirements for honorary clinicians before they can attend the clinic.

....

This unit will consist of 50 hours of supervised consultation of patients with allergic disease within the setting of a specialist Immunology and Allergy clinic. Students will be under the supervision of experienced Clinical Immunologists and Allergists and will develop their skills in the diagnosis and management of allergic diseases. Students will need to attend the Australasian Society of Clinical Immunology and Allergy (ASCIA) Annual Scientific Meeting and the annual Macarthur Series in Immunology/ Allergy and take part in the specific program run for students of this program.

400985.1   Clinical Education A

Credit Points 10 **Level** 3

Prerequisite

400982.1 Core Competencies in Physiotherapy Practice AND **300754.1** Neuroanatomy AND **400981.1** Clinical Pharmacology AND **400864.2** Research Methods (Quantitative and Qualitative)

Corequisite

400983.1 Orthopaedic Physiotherapy AND **400986.1** Neurological Physiotherapy AND **400984.1** Cardiorespiratory Physiotherapy AND **400987.1** Neurological Physiotherapy Practice

Special Requirements

Students must be enrolled in 4662 Bachelor of Health Science/Master of Physiotherapy, 4668 Bachelor of Health Science (Honours) / Master of Physiotherapy or 4667 Master of Physiotherapy. Prior to enrolling in this unit students must have: 1) submitted a Criminal Record Check form prior to 1 June 2010 or a Student Undertaking Form after 1 June 2010 and have applied for a National Police Certificate 2) submitted a Prohibited Employment Declaration prior to 1 June 2010 or a Working with Children Check Student Declaration after 1 June 2010. 3) A senior first aide certificate which includes cardiopulmonary resuscitation. If students are visiting a NSW Health facility they will need to comply with the NSW Health Occupational Screening and Vaccination Against Infectious Diseases Policy. Students are required to wear the UWS physiotherapy uniform which complies with NSW Health uniform requirements. Students cannot enrol in Year 3 Physiotherapy units until they have completed 160 credit points in the Bachelor of Health Science/Master of Physiotherapy and 4668 Bachelor of Health Science (Honours)/Master of Physiotherapy programs.

....

This unit focuses on the core competencies of physiotherapy professional practice in acute care settings. These competencies will be developed through a supervised, community-based clinical education placement. Professional competencies addressed in this unit include communication, documentation, reflection, professional and ethical behaviour. In addition, students will develop skills in physiotherapy assessment and treatment in acute care settings which may span the musculoskeletal, neurological and cardiorespiratory domains.

401051.1   Clinical Education B (Rehabilitation)

Credit Points 10 **Level** 7

Prerequisite

400997.1 Exercise Rehabilitation AND **400998.1** Neurological Rehabilitation

Special Requirements

Students must be enrolled in 4662 Bachelor of Health Science/Master of Physiotherapy, 4667 Master of Physiotherapy or 4668 -achelor of Health Science (Honours)/Master of Physiotherapy. Prior to enrolling in this unit students must have: 1) submitted a Criminal Record Check form prior to 1 June 2010 OR a Student Undertaking Form after 1 June 2010 and have applied for a National Police Certificate 2) submitted a Prohibited Employment Declaration prior to 1 June 2010 OR a Working with Children Check Student Declaration after 1 June 2010. 3) A senior first aide certificate which includes cardiopulmonary resuscitation. If students are visiting a NSW Health facility they will need to comply with the NSW Health Occupational Screening and Vaccination Against Infectious Diseases Policy. Students are required to wear the UWS physiotherapy uniform which complies with NSW Health uniform requirements.

....

This clinical education placement will operationalise the theoretical and research knowledge and skills learnt in 400997 Exercise Rehabilitation and 400998 Neurological Rehabilitation. Students will be required to assess and treat clients in rehabilitation settings. Treatments will be focused on improving client mobility and function that is altered by illness, injury, chronic disease or a disability. This will assist in preparation for client discharge home or to an appropriate residential facility, as well as enhance functioning at home or in the community. Assessment and treatments will tend to have a neurological physiotherapy focus, but clients may also present with cardiorespiratory and musculoskeletal conditions which require intervention. Students will, therefore, be expected to integrate knowledge and skills learnt across all physiotherapy-specific units in their provision of client-centred care as well as draw on their more general knowledge from earlier stages of the course.

UWS Postgraduate Handbook , 2014
Health and Science Schools - Postgraduate
This file was created on 12/03/2014 4:15:06 PM. Please check the online handbook for changes made after this date.

Page 66

401052.1   Clinical Education C (Ambulatory Care)

Credit Points 10 **Level** 7

Prerequisite

400983.1 Orthopaedic Physiotherapy AND **400997.1** Exercise Rehabilitation AND **400999.1** Musculoskeletal Physiotherapy

Special Requirements

Students must be enrolled in 4662 Bachelor of Health Science/Master of Physiotherapy, 4667 Master of Physiotherapy or 4668 Bachelor of Health Science (Honours)/Master of Physiotherapy. Prior to enrolling in this unit students must have: 1) submitted a Criminal Record Check form prior to 1 June 2010 OR a Student Undertaking Form after 1 June 2010 and have applied for a National Police Certificate 2) submitted a Prohibited Employment Declaration prior to 1 June 2010 OR a Working with Children Check Student Declaration after 1 June 2010. 3) A senior first aide certificate which includes cardiopulmonary resuscitation. If students are visiting a NSW Health facility they will need to comply with the NSW Health Occupational Screening and Vaccination Against Infectious Diseases Policy. Students are required to wear the UWS physiotherapy uniform which complies with NSW Health uniform requirements.

....

This clinical education placement will operationalise the theoretical and research knowledge and skills learnt in 400983 Orthopaedic Physiotherapy, 400999 Musculoskeletal Physiotherapy and 400997 Exercise Rehabilitation. Students will be required to assess and treat clients who present in hospital outpatient departments, community settings and private practices. This involves the assessment of the client's impairments, function and disability within their home and community environment. Interventions may include manual and exercise therapy; use of electrophysical agents, taping and bracing; and education regarding both prevention and management of conditions. Assessment and treatment will tend to have a musculoskeletal physiotherapy focus, however, clients may also present with neurological and cardiorespiratory conditions that require intervention. Students will therefore integrate knowledge and skills learnt across all physiotherapy-specific units in their provision of client-centred care as well as draw on their more general knowledge from earlier stages of the course.

401053.1   Clinical Education D (Paediatrics)

Credit Points 10 **Level** 7

Prerequisite

400985.1 Clinical Education A OR **401051.1** Clinical Education B (Rehabilitation) OR **401052.1** Clinical Education C (Ambulatory Care)

Corequisite

401047.1 Paediatric Physiotherapy

Special Requirements

Students must be enrolled in 4662 Bachelor of Health Science/Master of Physiotherapy, 4667 Master of Physiotherapy or 4668 Bachelor of Health Science

(Honours)/Master of Physiotherapy. Prior to enrolling in this unit students must have: 1) submitted a Criminal Record Check form prior to 1 June 2010 OR a Student Undertaking Form after 1 June 2010 and have applied for a National Police Certificate 2) submitted a Prohibited Employment Declaration prior to 1 June 2010 OR a Working with Children Check Student Declaration after 1 June 2010. 3) A senior first aide certificate which includes cardiopulmonary resuscitation. If students are visiting a NSW Health facility they will need to comply with the NSW Health Occupational Screening and Vaccination Against Infectious Diseases Policy. Students are required to wear the UWS physiotherapy uniform which complies with NSW Health uniform requirements.

....

This clinical education placement will operationalise the knowledge (theory and research) and skills learnt in Paediatric Physiotherapy. Students will also apply the knowledge and skills learnt in musculoskeletal, cardiorespiratory and neurological physiotherapy units to provide appropriate and holistic care to paediatric clients. Students will be required to assess and treat paediatric clients in acute hospital, rehabilitation or community settings. This involves the consideration of a child's age, development, and diagnosis during assessment and treatment. Advanced communication skills are required to educate parents and children on the prevention and management of the conditions. Students will therefore be expected to integrate knowledge and skills learnt all physiotherapy-specific units in their provision of client-centred care as well as draw on their more general knowledge from earlier stages of the course.

401054.2   Clinical Education E (Advanced Care)

Credit Points 10 **Level** 7

Prerequisite

400997.2 Exercise Rehabilitation AND **400985.1** Clinical Education A

Corequisite

401048.1 Physiotherapy for Chronic Illness and Disease AND **401051.1** Clinical Education B (Rehabilitation) OR **401052.1** Clinical Education C (Ambulatory Care)

Special Requirements

Students must be enrolled in 4662 Bachelor of Health Science/Master of Physiotherapy, 4667 Master of Physiotherapy or 4668 Bachelor of Health Science (Honours)/Master of Physiotherapy. Prior to enrolling in this unit students must have: 1) submitted a Criminal Record Check form prior to 1 June 2010 OR a Student Undertaking Form after 1 June 2010 and have applied for a National Police Certificate 2) submitted a Prohibited Employment Declaration prior to 1 June 2010 OR a Working with Children Check Student Declaration after 1 June 2010. 3) A senior first aide certificate which includes cardiopulmonary resuscitation. If students are visiting a NSW Health facility they will need to comply with the NSW Health Occupational Screening and Vaccination Against Infectious Diseases Policy. Students are required to wear the UWS physiotherapy uniform which complies with NSW Health uniform requirements.

Page 67

....

This clinical unit involves the integration of musculoskeletal, neurological and cardiorespiratory physiotherapy assessment and treatment skills in an advanced physiotherapy care environment. Advanced problem-solving skills will be required to manage complicated client presentations in various clinical environments. Advanced care environments may include speciality areas such as burns, spinal, emergency, intensive care and aged care units within a hospital, or private practice and community-based services where the physiotherapist is the primary care practitioner. Student preferences and prior clinical placement experience will be considered in the clinical placement allocation process. This will help to ensure all students are given the opportunity to explore the breadth of practice of physiotherapy in different environments.

400993.2 Clinical Minimally Invasive Gynaecological Surgery 1

Credit Points 30 **Level** 7

Special Requirements

Students must be an advanced trainee in Obstetrics and Gynaecology undertaking a fellowship at Blacktown Hospital. Students undertaking this unit must be enrolled in 4690 Master of Surgery in Advanced Gynaecological Surgery.

....

Students undertaking this unit will have a detailed knowledge of open abdominal surgery at commencement. This unit will extend their knowledge in the practical aspects of laparoscopic surgery. This unit will be completed in Year 1 of the program.

401057.2 Clinical Minimally Invasive Gynaecological Surgery 2

Credit Points 30 **Level** 7

Prerequisite

400993.2 Clinical Minimally Invasive Gynaecological Surgery 1

Special Requirements

All students must be advanced trainees in Obstetrics and Gynaecology undertaking a Fellowship in Minimally Invasive Gynaecological Surgery at Blacktown Hospital or other accredited site. Students undertaking this unit must be enrolled in 4690 M Surgery in Advanced Gynaecological Surgery

....

Students undertaking this unit will have a detailed knowledge of open abdominal surgery at commencement. This unit will extend their knowledge in the practical aspects of laparoscopic surgery. This unit will be completed in Year 2 of the program.

400830.3 Clinical Practice: Infant and Child Nutrition and Feeding

Credit Points 10 **Level** 7

Special Requirements

Clinical requirements for this course preclude students other than those enrolled in 4682 Master of Child and Family Health (Karitane) and 4683 Graduate Certificate in Child and Family Health (Karitane) from taking this unit. Patient safety issues are associated. Students will need to have completed the NSW Health Special Requirements for clinical practicum attendance. At present these include: Prohibited Employment Declaration prior to 1 June 2010 or a Working with Children Check Student Declaration after 1 June 2010, Criminal Record Check form prior to 1 June 2010 or a Student Undertaking Form after 1 June 2010 and have applied for a National Police Certificate, Adult Health Immunisation Schedule. NSW Ministry of Health may request additional documents according to policy changes. Students outside NSW are expected to meet any other state requirements for clinical placement.

....

This unit focuses on infant feeding including breast feeding as a significant social and cultural process not just an issue of physiology and nutrition. The theoretical component of this unit will focus on the age-appropriate nutrition of infants and young children linked to developmental stages and the role the child and family health professional in supporting families manage associated issues. All areas of early nutrition will be covered including breastfeeding, use of breast-milk substitutes, introduction of solids and toddler nutrition. The knowledge gained in this unit will be consolidated through an 80 hour clinical placement in a primary, secondary or tertiary child and family health facility.

400973.1 Clinical Teaching and Professional Development

Credit Points 10 **Level** 7

Equivalent Units

400724 - Clinical Teaching and Professional Development

Special Requirements

Students must be enrolled in a postgraduate course

....

This unit prepares educators and clinicians for their role in clinical education through critical appraisal of their scope of practice, competence and professional practice environment. Students will identify and operationalise key priorities for learning and teaching in their organisation and address these by providing appropriate and relevant teaching and learning experiences that build the capacity of colleagues.. Theoretically informed, experiential strategies will enable students to explore the potential that clinical teaching has in transforming practices and workplaces.

400974.1 Clinical Teaching for Learning

Credit Points 10 **Level** 7

Special Requirements

Students must be enrolled in a postgraduate course

UWS Postgraduate Handbook , 2014
Health and Science Schools - Postgraduate
This file was created on 12/03/2014 4:15:06 PM. Please check the online handbook for changes made after this date.

Page 68

....

This unit prepares educators, clinical facilitators and clinicians for their role in clinical teaching and learning. Students will identify learner needs and create and initiate evidence based teaching interventions and assessment strategies. Theoretically informed, experiential strategies will enable students to develop their expertise as clinical teachers and assessors in the workplace.

400839.1   Collaborative Inquiry for Primary Health Care Action

Credit Points 10 **Level** 7

Equivalent Units

400775 - Project Proposal PHC

Special Requirements

Students must be enrolled in 4569 Master of Family Health Care

....

This unit provides the opportunity for students to apply the principles of primary health care in a proposal to address an issue of primary health care concern in their workplace or community. The student will gain comprehensive knowledge of the process of action research, participatory action research and cooperative inquiry. Each student will have the opportunity to write a proposal using a collaborative inquiry approach that involves planning a genuine partnership to examine and make changes to improve an identified issue in the student's specific area of work / practice.

400840.3   Communicable Diseases

Credit Points 10 **Level** 7

Special Requirements

Students must be enrolled in a postgraduate course.

....

This unit will encompass clinical aspects, epidemiology, prevention and control of important communicable diseases, both in Australia, and globally. Specific topics covered include causative agents, routes of transmission, host responses, risk factors, environmental influences, vector- and food-borne diseases, vaccine-preventable diseases, legislative requirements, surveillance, outbreak investigations, bioterrorism, strategies for prevention and control and emerging challenges.

401049.1   Complex Cases and Professional Issues

Credit Points 10 **Level** 7

Prerequisite

400984.1 Cardiorespiratory Physiotherapy AND **400999.1** Musculoskeletal Physiotherapy AND **401048.1** Physiotherapy for Chronic Illness and Disease AND **400985.1** Clinical Education A

Corequisite

401051.1 Clinical Education B (Rehabilitation) OR **401052.1** Clinical Education C (Ambulatory Care) OR

401053.1 Clinical Education D (Paediatrics) OR **401054.1** Clinical Education E (Advanced Care)

Special Requirements

Students must be enrolled in 4662 Bachelor of Health Science/Master of Physiotherapy, 4667 Master of Physiotherapy or 4668 Bachelor of Health Science (Honours)/Master of Physiotherapy.

....

In this unit, students will further develop their clinical reasoning with respect to clients with complex presentations. A framework will be presented, which synthesises complex information such as the theory, research and skills in musculoskeletal, cardiorespiratory and neurological physiotherapy across the lifespan, and theories related to professionalism, ethics, safety and communication. This framework will be applied to the area of Intensive Care, where students will develop further knowledge and skills in specific cardiorespiratory techniques such as manual hyperinflation and suctioning. This unit also contains the discussion of a range of recent professional developments in physiotherapy, which are relevant to entry level practitioners. These include registration as a physiotherapist, continuing education, workload control strategies, duty of care responsibilities and quality improvement processes (including critical reflection), employment strategies and career pathways.

400953.3   Complex Midwifery 1

Credit Points 10 **Level** 7

Prerequisite

400950.2 Introduction to Midwifery 1 AND **400951.2** Introduction to Midwifery 2

Incompatible Units

400078 - Complications of Pregnancy and the Postnatal Period; 400079 - Complications of Labour/Birth and the Newborn.

Special Requirements

Students must be enrolled in 4505 Graduate Diploma in Midwifery. This unit can only be undertaken by a registered nurse employed in a participating health facility in the position of a midwifery student.

....

This unit provides students with an in depth knowledge of complex conditions that may arise during pregnancy, labour, birth and the postnatal period. Emphasis will be placed on the biological and physiological aspects of these conditions. The unit also integrates psychosocial and cultural aspects relating to a woman experiencing a complex pregnancy, labour, birth or postnatal period. The unit demonstrates the role of the midwife in maintaining partnerships with women even when childbearing experiences are complex.

400955.2   Complex Midwifery 2

Credit Points 10 **Level** 7

Prerequisite

400950.2 Introduction to Midwifery 1 AND **400951.2** Introduction to Midwifery 2

UWS Postgraduate Handbook , 2014
Health and Science Schools - Postgraduate
This file was created on 12/03/2014 4:15:06 PM. Please check the online handbook for changes made after this date.

Page 69

Incompatible Units

400078 - Complications of Pregnancy and the Postnatal Period; 400079 - Complications of Labour/Birth and the Newborn.

....

This unit provides students with an in depth knowledge of complex conditions that may arise during pregnancy, labour, birth, the postnatal period and the newborn period. Emphasis will be placed on the biological and physiological aspects of such conditions. The unit also integrates psychological and cultural aspects relating to a woman experiencing a complex pregnancy, labour, birth and postnatal period. The role of the midwife in providing holistic woman centred care is an important component of the unit, as any obstacles that arise will have an impact on the management of pregnancy, labour, birth, the postnatal period and the newborn period.

300565.2 Computer Networking

Credit Points 10 **Level** 2

Assumed Knowledge

Fundamentals of computer architecture, binary and hexadecimal numbering systems, and programming principles. They should also have a working knowledge of the World Wide Web.

Equivalent Units

300094 - Computer Networking Fundamentals, 300086 - Applied Data Communications and Networking, 700012 - Computer Networking (UWSC)

....

Computer Networking is an introductory unit in computer systems networking. It covers basic networking technologies, Ethernet fundamentals, ISO OSI model, routing, switching and subnetting, the Internet architecture, networking protocols including TCP/IP, important OSI layer 2 and 3 networking device fundamentals, basic network management and security issues. This unit is also the first of three units, which will prepare students for industry based networking certification (CCNA).

300238.2 Computing Research Project A

Credit Points 10 **Level** 7

Assumed Knowledge

Fundamentals of software, networking or information systems management

Equivalent Units

54919 - Computing Project A

Special Requirements

Students must be enrolled in a postgraduate course.

....

This unit entails a substantial investigation and practical work on a topic in an area of current research interest in computing and information technology that is relevant to candidates' professional and intellectual development. Candidates are encouraged to select topics they envisage to be of value to their future careers. Candidates undertake individual project-based study under guidance of a project supervisor.

400220.2 Contemporary Professional Practice in Mental Health Nursing

Credit Points 10 **Level** 7

Assumed Knowledge

Students are required to be registered nurses with basic knowledge of mental health, mental illness and assessment processes augmented with experience in mental health settings.

Special Requirements

Students must be enrolled in a postgraduate course.

....

Professional practice in Mental Health Nursing is continually evolving to meet changing social, political and legal requirements related to mental health issues. These requirements include changes in social and political understandings of mental illness and the rights and responsibilities of consumers, carers and providers. There has also been increased emphasis on health promotion, prevention and education in population specific contexts (eg, aged care, child and family, adolescent mental health, alcohol and other drugs services). Mental Health Nurses thus face challenges to develop practice that is congruent with the context of these changing requirements. This unit aims to provide a basis of inquiry into contemporary practice (s) from which the nurse can build an ongoing understanding and appreciation of changing influences.

300697.2 Content Management Systems & Web Analytics

Credit Points 10 **Level** 7

Assumed Knowledge

Web development and HTML basics.

Equivalent Units

300264 Web Site Management and Security

Special Requirements

Students must be enrolled in a postgraduate course.

....

Content management systems (CMS) is a collective name for a wide range of web applications used by organisations/ institutions/enterprises and social communities in establishing a continuing web presence. They may connect to backend systems and can provide complete web application services. This unit builds on both the conceptual and practical skills/knowledge to develop and utilise CMS's; in their management; in technical, legal, ethical and security issues; and in utilising web analytics to obtain business intelligence of their operation and impact.

300104.4 Database Design and Development

Credit Points 10 **Level** 2

Assumed Knowledge

Basic programming skills, including variable declaration, variable assignment, selection statement and loop structure.

UWS Postgraduate Handbook , 2014
Health and Science Schools - Postgraduate
This file was created on 12/03/2014 4:15:06 PM. Please check the online handbook for changes made after this date.

Page 70

Equivalent Units

700011 - Database Design and Development (UWSC)

Incompatible Units

200129 - Database Management System for Business Information Systems.

....

The main purpose of this unit is to provide students with an opportunity to gain a basic knowledge of database design and development including data modeling methods, techniques for database design using a set of business rules that are derived from a case study and finally implementation of the database using a commercial relational database management system. The unit also examines a number of important database concepts such as database administration, concurrency, backup and recovery and security. At the same time student learning and intercommunication skills are enhanced by running tutorial presentations and group assignments.

400572.2   Dermatology in Chinese Medicine 1

Credit Points 10 **Level** 7

Special Requirements

Students must be enrolled in Master of Health Science (Traditional Chinese Medicine) or Master of Health Science (Acupuncture).

....

This unit along with Dermatology in Chinese Medicine 2 will enable practitioners to develop an in-depth understanding of Traditional Chinese Medicine (TCM) diagnosis and management of a wide range of skin diseases using acupuncture and Chinese herbal medicine. This unit includes orthodox medical diagnosis and management of common skin disorders and the integration of this with TCM theory, diagnosis and management. Dermatology in Chinese Medicine 1 and 2 together provide a strong specialist clinical focus on the management of skin disorders with Chinese medicine.

400573.2   Dermatology in Chinese Medicine 2

Credit Points 10 **Level** 7

Assumed Knowledge

Equivalent to undergraduate training in Traditional Chinese Medicine (TCM).

....

This unit extends students' knowledge and understanding developed in Dermatology in Chinese Medicine 1. The focus of this unit includes the orthodox medical diagnosis and management of common and systemic skin disorders and the integration of TCM theory, diagnosis and management. Dermatology in Chinese Medicine 1 and 2 together provide a strong specialist clinical focus on the management of skin disorders with TCM.

300717.2   Egress and Risk Assessment

Credit Points 10 **Level** 7

Assumed Knowledge

This unit assumes that the student has undertaken coursework in building construction, building surveying, engineering, science, architecture or a related area or has gained the equivalent knowledge by working in the construction industry in an appropriate capacity for at least four years.

Equivalent Units

BG810A - Fire Safety Systems 1 (Property)

....

This unit introduces the concept of risk assessment for fire safety systems relevant to life safety and property protection. The unit helps students develop an understanding of building occupant characteristics and human behaviour during fire emergencies. Parameters, methods and criteria for risk and economic assessments are covered in this unit.

200459.2   Emergency Management for Bushfire Prone Areas

Credit Points 10 **Level** 7

Assumed Knowledge

Bushfire behaviour, planning, building and bushfire fighting units

....

This unit describes the organisational and administrative arrangements for the management of emergency events in Australia, including the role of States and local government and the techniques available to develop risk management strategies in order to minimise loss of life and property arising from bushfire emergencies. The unit describes how the three tiers of Government interact during major emergency events, the role of community engagement in emergency management and the process of developing a risk management plan for bushfire emergencies. The unit also discusses the role of post-event survey and emergency and evacuation planning at the property scale.

401058.1   Endometriosis

Credit Points 10 **Level** 7

Special Requirements

All students must be advanced trainees in Obstetrics and Gynaecology undertaking a Fellowship in Minimally Invasive Gynaecological Surgery at Blacktown Hospital or other accredited site. Students undertaking this unit must be enrolled in 4690 M Surgery in Advanced Gynaecological Surgery

....

Students undertaking this unit will have a detailed knowledge of endometriosis at commencement. This unit will extend their knowledge in theoretical and practical terms so that they have a solid foundation for developing their skills at minimally invasive surgery for endometriosis.

UWS Postgraduate Handbook , 2014
Health and Science Schools - Postgraduate
This file was created on 12/03/2014 4:15:06 PM. Please check the online handbook for changes made after this date.

Page 71

University of Western Sydney

300513.2 Engineering Software Applications

Credit Points 10 **Level** 7

Assumed Knowledge

Graduate of a recognised engineering or industrial design degree or equivalent.

....

This unit offers several streams of practical applications in engineering and industrial design software. Students get to choose a software application stream depending on their key program. Lectures and assignments are delivered online and are enhanced by face to face contact with stream coordinators. Emphasis is placed on teaching students practical software applications skills relevant to industry needs.

400417.2 Epidemiology and Quantitative Methods

Credit Points 10 **Level** 7

Equivalent Units

E7228 - Epidemiology and Quantitative Methods.

Special Requirements

Students must be enrolled in a postgraduate course.

....

In this unit, students will study the fundamental concepts and principles of epidemiology and biostatistics and will be given the opportunities through exercise and tutorials to apply these concepts and principles to published public health literature. The unit is designed to give students the skills to interpret and critically evaluate public health literature and to equip the students with the skills for public health research. A range of research studies is examined, including studies of occurrence and risk factors for disease, and studies evaluating intervention treatments or programs. Both the epidemiological and statistical evidence for the findings are critically assessed.

400926.1 Ergonomics and Work Occupations

Credit Points 10 **Level** 7

Assumed Knowledge

Human anatomy, functional anatomy.

Special Requirements

Students must be enrolled in 4663 Bachelor of Health Science/Masters of Occupational Therapy or 4664 Master of Occupational Therapy. To undertake this unit, students must comply with the following special requirements: Prior to enrolling in this unit students must have: 1) successfully completed an approved Child Protection Workshop 2) submitted a Prohibited Employment Declaration prior to 1 June 2010 or a Working with Children Check Student Declaration after 1 June 2010 3) possess a current WorkCover Authority approved First Aid Certificate.

....

The productivity role is a key aspect of adult life for most people. Occupational therapists play a major role in assisting clients who have had their productivity role affected in some way. This unit explores the importance of productivity for adults, in particular those engaged in paid employment. The focus of this unit is the rehabilitation of the injured worker within the context of the OH&S legislation and the WorkCover case management system. In addition, this unit will explore vocational counselling and rehabilitation for clients with psychosocial, cognitive and physical disabilities.

400082.6 Essentials for Best Practice in Midwifery

Credit Points 10 **Level** 7

Prerequisite

400950.2 Introduction to Midwifery 1 AND **400951.2** Introduction to Midwifery 2

Special Requirements

Students must be enrolled in 4505 Graduate Diploma in Midwifery. This unit can only be undertaken by a registered nurse employed in a participating health facility in the position of a midwifery student.

....

This unit is replaced by 401092 - Essentials of Best Practice Midwifery from Spring 2015. This unit provides students with the opportunity to critically evaluate and apply an evidence-based approach to midwifery practice. The unit addresses the value of evidence-based midwifery practice, overviews the contribution of different research approaches to midwifery knowledge development and assists students to develop skills to locate and critique sources of evidence including systematic reviews, meta-analysis, meta-synthesis, integrative reviews, and clinical guidelines. Students are encouraged to become critical consumers of evidence relevant to midwifery practice and to appreciate the process of practice development and practice change.

400975.1 Ethics in Health Research

Credit Points 10 **Level** 7

Special Requirements

Students must be enrolled in a postgraduate course.

....

This unit equips students to explore ethical issues impacting on the conduct of research in the health setting. Students will critically explore ethical issues and their implications in health research, understand the process of gaining Human Research Ethics Approval for research, gain practical experience of developing an ethically sound research plan and application for human ethics approval.

400567.2 Evidence Based Practice in Chinese Medicine 1

Credit Points 10 **Level** 7

Assumed Knowledge

Equivalent to undergraduate training in Traditional Chinese Medicine or acupuncture

....

This unit will provide the student with the opportunity to develop the skills necessary to search, understand and

UWS Postgraduate Handbook , 2014
Health and Science Schools - Postgraduate
This file was created on 12/03/2014 4:15:06 PM. Please check the online handbook for changes made after this date.

Page 72

critically appraise scientific literature related to Chinese medicine. Basic research methods will be introduced sufficient to support the student through this unit. This unit will introduce and develop concepts and principles of evidence-based practice applied to Chinese medicine and explore specific research developments in Chinese medicine.

400568.2 Evidence Based Practice in Chinese Medicine 2

Credit Points 10 **Level** 7

Assumed Knowledge

Equivalent to undergraduate training in Traditional Chinese Medicine or acupuncture

....

This unit will focus on the integration of Traditional Chinese Medicine (TCM) and Western medicine in the diagnosis and management of disease. A significant focus of this unit will be on the interpretation and integration of medical diagnostic tests with TCM diagnosis, and will include an examination of the research that attempts to validate TCM theory and diagnostic techniques. Students will learn how to integrate and prioritise clinical information and undertake the development of a research proposal.

400206.2 Evidence-based Nursing

Credit Points 10 **Level** 7

Assumed Knowledge

A basic knowledge of research methods at undergraduate level plus basic nursing knowledge and clinical nursing experience.

Special Requirements

Students must be enrolled in a postgraduate course.

....

This unit is designed to develop students' knowledge of the principles and processes necessary for evidence-based clinical practice. General concepts associated with evidence-based nursing are explored. In addition students are assisted to formulate focussed clinical questions and conduct a comprehensive literature search for research evidence that may assist in answering such questions. Issues and techniques involved in the rigorous appraisal of research reports are addressed. The importance of clinical significance and individual patient preferences when making clinical judgments about the implementation of research findings are also explored.

400865.2 Evidence-Based Practice

Credit Points 10 **Level** 3

Assumed Knowledge

Knowledge and skills of Foundations of Research & Evidence-based Practice and Research Methods (Qualitative and Quantitative).

Prerequisite

400864.3 Research Methods (Quantitative and Qualitative)

Equivalent Units

400154 - Integrating Evidence into Practice

....

In this unit, students incorporate previous research and biostatistics knowledge to develop new skills for using evidence to inform all aspects of their professional practice. Evidence-based practice uses an enquiry led approach to manage expanding and uncertain knowledge by formulating answerable questions, effectively searching literature, critically appraising evidence validity and results, and to assess its significance in clinical practice and healthcare decision-making.

400997.3 Exercise Rehabilitation

Credit Points 10 **Level** 3

Assumed Knowledge

Knowledge of Human anatomy, human physiology, pathophysiology.

Prerequisite

400985.1 Clinical Education A

Special Requirements

Students must be enrolled in 4662 Bachelor of Health Science/Master of Physiotherapy, 4667 Master of Physiotherapy, and 4668 Bachelor of Health Science (Honours)/Master of Physiotherapy. Students in 4662 Bachelor of Health Science/Master of Physiotherapy and 4668 Bachelor of Health Science (Honours)/Master of Physiotherapy are to complete prerequisite unit 400985 - Clinical Education A. Students in this program are required to participate fully in practical classes. This involves disrobing to shorts and singlet or swim-suit equivalent in mixed gender classes. Students will practice hands-on physiotherapy examination and treatment techniques on both genders, and will personally experience these techniques which will be performed on them by other students and relevant academic staff.

....

Exercise Rehabilitation focuses on client management with exercise in a variety of settings across the lifespan. This will require effective communication skills, ethical and professional behaviour and an appreciation of interprofessional care. Professional competencies addressed in this unit include an understanding of the normal physiological responses to exercise, the implications of pathology and exercise and the integration of exercise based interventions with other physiotherapy modalities.

300709.2 Fire Engineering 1 (Fire Dynamics)

Credit Points 10 **Level** 7

Assumed Knowledge

Physics, chemistry, engineering mathematics.

Equivalent Units

EN806A - Fire Engineering 1 (Fire Dynamics)

....

This unit aims to develop a detailed knowledge of fire behaviour and dynamics in the built environment. Students will be able to understand fuels and combustion processes; the chemistry of combustion; flammability limits; ignition characteristics; and different types of flames and fire plumes. The content also covers the burning of liquids and

Units

UWS Postgraduate Handbook , 2014
Health and Science Schools - Postgraduate
This file was created on 12/03/2014 4:15:06 PM. Please check the online handbook for changes made after this date.

Page 73

solids; flammable vapour/air mixtures; extinction and extinguishment; flame spread mechanisms and modeling; flashover; fire resistance and fire severity; projection of flames from burning compartment openings; spread of fire from a compartment; production and measurement of smoke; and smoke movement.

300710.2 Fire Engineering 2 (Fire Models)

Credit Points 10 **Level** 7

Assumed Knowledge

Physics, chemistry, engineering mathematics, building regulations, fire dynamics, building fire services.

Equivalent Units

PH703A - Fire Engineering 2 (Fire Models)

....

This unit aims to develop an understanding of various types of computational tools used in engineering design of fire safety systems. The fundamentals of control volume, applications of conservations laws in modeling and the form of predictive equations are explained. The content includes evaluations of fire severity, fire resistance levels of various types of building structures and elements. Hand calculation equations, zone models and field models are covered. The limitations of the models in representing the real phenomena are also discussed.

300718.2 Fire Engineering Design and Assessment

Credit Points 10 **Level** 7

Assumed Knowledge

Fire safety engineering principles, building regulations, fire dynamics, building fire services, fire modelling and human behaviour in fires.

Equivalent Units

BG811A - Fire Safety Systems (Life Safety)

....

This unit helps to develop a high level of knowledge of fire safety systems relevant to life protection and the design and assessment of such systems. The unit covers the process of fire safety engineering design and assessment including the fire engineering brief, conceptual design, regulatory objectives, fire safety engineering subsystems, verification methods, timeline analysis, design fires, evaluation of performance of passive and active fire protection systems, risk analysis and fire engineering project reporting.

300948.1 Fire Technology and Engineering Principles

Credit Points 10 **Level** 7

Assumed Knowledge

This subject assumes that the student has undertaken undergraduate coursework in building surveying, planning or related areas or has gained the equivalent building construction knowledge by working in the construction industry in an appropriate capacity for at least four years.

Incompatible Units

300712 - Fire Technology Principles, 300714 - Fire Engineering Principles

....

The unit introduces students to the basic principles of fire behaviour and fire safety design so that they can appreciate fire safety systems and interpret fire safety engineering design concepts. The unit covers the basics of combustion, building fire characteristics, smoke movement, responses of fire safety devices, building fire resistance, response of building occupants, fire safety engineering design and assessment methodology. The unit provides the basis for understanding fire safety engineering and the techniques and tools used in fire safety engineering.

401059.1 Gynaecological Surgery Ergonomics

Credit Points 10 **Level** 7

Special Requirements

All students must be advanced trainees in Obstetrics and Gynaecology undertaking a Fellowship in Minimally Invasive Gynaecological Surgery at Blacktown Hospital or other accredited site. Students undertaking this unit must be enrolled in 4690 M Surgery in Advanced Gynaecological Surgery

....

Students undertaking this unit develop their knowledge in the practical aspects of the ergonomic use of laparoscopic equipment to reduce fatigue and improve patient safety.

400418.3 Health Advancement and Health Promotion

Credit Points 10 **Level** 7

Special Requirements

Students must be enrolled in a postgraduate course.

....

By investigating and addressing the multilevel determinants of health outcomes and inequalities, health promotion initiatives aim to improve the health and wellbeing of individuals and societies. In this unit, we will nurture an understanding of concepts and models of health promotion, evaluate the relative successes of recent and classic initiatives within Australia and overseas, and critically engage with debates concerned with the most appropriate strategies for tackling health inequalities in the context of major societal challenges (e.g. population ageing, urbanisation and climate change). Core competencies are nurtured (e.g. Plan and evaluate an intervention) to prepare students for practicing and further study in the field of health promotion.

400837.3 Health and Socio-political Issues in Aged Care

Credit Points 10 **Level** 7

Equivalent Units

400239 - Contemporary Issues in Aged Care

UWS Postgraduate Handbook , 2014
Health and Science Schools - Postgraduate
This file was created on 12/03/2014 4:15:06 PM. Please check the online handbook for changes made after this date.

Page 74

Special Requirements

Students must be enrolled in a postgraduate course.

....

This unit examines health and socio political issues in aged care within a social capital framework. Social constructs and contexts of ageing are explored and issues of social and economic disadvantage are examined. Equity and access to health care services and the experiences of older people within these services are also highlighted. The role of health professionals and managers in actively engaging in and influencing health and social policy debate for ethically just care and services for older people is presented.

400967.2 Health Economics and Comparative Health Systems

Credit Points 10 **Level** 7

Equivalent Units

E7232 - Economics and Organisation of Health Services, 400420 - Health Economics and Comparative Health Systems

Special Requirements

Students must be enrolled in a postgraduate course.

....

The unit explores contemporary examples of the role of economics in the organisation, funding and provision of health services. Case examples include, Australia, America, China, Hong Kong, Scandinavia, United Kingdom and India. Students use the principles of economics to assess funding of health with a focus on the interface between economics, ethics and equity in decision making. They also consider the tendency for health systems to be organised around economic principles in areas such as, contracting out, health insurance and pharmaceuticals. Students are encouraged to reflect on the challenges and future directions of their own health system in the context of the unit components.

400845.2 Health Financial Management

Credit Points 10 **Level** 7

Equivalent Units

400420 - Health Economics and Comparative Health Systems, 400544 - Resources management in Aged Care

....

This unit provides health leaders with an introduction to financial management in health and aged care settings as a basis for understanding the impact of leadership decision-making on financial outcomes and how financial decision-making impacts on clinical service delivery. Content includes an overview of health economics and economic evaluation, health care funding models, the principles, practices and tools for financial planning and management, basic accounting principles and financial terminology and using financial information and reporting for negotiating financial plans, tracking and evaluating financial performance and using financial information in decision-making within the clinical environment.

400210.2 Health Promotion and the Nurse

Credit Points 10 **Level** 7

Assumed Knowledge

Students require fundamental knowledge and understanding of health and wellness concepts at the undergraduate level, with experience as a registered nurse in health care settings.

Special Requirements

Students must be enrolled in a postgraduate course.

....

The challenge for nursing in terms of health promotion is to acknowledge the complex interrelatedness between a person's social and economic situation, their sense of power and control over their life and their physical, emotional and spiritual well-being, i.e. To understand that health is determined by the totality of a person's life circumstances and their inherent traits. This unit uses a social health perspective to examine evidence-based health promotion strategies that can be implemented in the context of nursing practice.

400836.1 Health Promotion: A Primary Health Care Approach

Credit Points 10 **Level** 7

Equivalent Units

400413 - Context of Health Promotion

Special Requirements

Students must be enrolled in 4569 Master of Primary Health Care or 4570 Graduate Diploma in Primary Health Care.

....

An individual's personal characteristics and their family, social and community environments have complex interrelationship with their health and health behaviours. The challenge for health professionals is to understand this complexity and encourage the practice of health promotion within a primary health care framework so enabling people to achieve a sense of power and control over their lives. The unit explores the health of individuals and communities in the context of health promotion. Evidence-based health promotion strategies are examined using social health and ecological perspectives.

400844.2 Health Services and Facilities Planning

Credit Points 10 **Level** 7

Equivalent Units

51109 - Strategic Analysis and Decision Making

....

Planning occurs at all levels within all health organisations, government, non-government and in the private sector. There is a hierarchy in planning health services with some global overarching policy documents, national agreed priorities which affect corporate and regional plans as well as local services and projects. Planning focuses on future directions for health, is value based and resource allocation

UWS Postgraduate Handbook , 2014
Health and Science Schools - Postgraduate
This file was created on 12/03/2014 4:15:06 PM. Please check the online handbook for changes made after this date.

Page 75

driven. The process of planning will be outlined including how to conduct a needs analysis, develop an evidence based approach, consult with stakeholders including the community, document an implementation plan and evaluate outcomes.

400843.2   Health Workforce Planning

Credit Points 10 **Level** 7

Equivalent Units

46518 - Human Resources Management; 400545 - Workforce Planning and HR Issues in Aged Care, 200718 - Human Resource Management

....

This is a flexible learning unit looking at Human Resources Management (HRM) as a strategic activity of health organisations especially as workforce shortages pose significant challenges to the health, welfare and aged care sectors. The workforce, with appropriate knowledge and expertise, is essential to the efficient and effective delivery of quality health services. Successful organisations shape their workforce to anticipate current and future business directions and goals. Workforce planning is a crucial element of this approach and its success.

300955.1   Healthcare Data Environments

Credit Points 10 **Level** 3

Prerequisite

300566.1 Introduction to Health Informatics

Equivalent Units

300567 - e-Health

Special Requirements

Students in 3663 - Graduate Certificate in Health Informatics are not required to complete the pre-requisite unit 300566 - Introduction to health Informatics before enrolling in 300955 - Healthcare Data Environments.

....

This unit extends the students knowledge of Health Informatics by introducing concepts relating to electronic communications within the Health Industry. It exposes students to a variety of environments used to create, store, transfer and deliver healthcare data. Areas include minimum data sets, data linkage, messaging concepts/ standards, terminologies, healthcare evaluation, electronic health records and related Standards, security, privacy and trust, epidemiology and population health together with TeleHealth/ TeleMedicine approaches, methodologies, tools and techniques.

300956.1   Healthcare Software and Systems

Credit Points 10 **Level** 3

Prerequisite

300566.2 Introduction to Health Informatics

Equivalent Units

300568 Services Computing in Healthcare

....

In this unit students will learn the concepts underpinning the services computing paradigm of "bridging the gap between Business Services and IT Services". Services Computing technology includes Web services and serviceoriented architecture (SOA), business consulting methodology and utilities, business process modelling, transformation and integration. Students will learn, through the development of practical examples, how to utilise these technologies within a healthcare context

400831.2   Healthy Families and Communities

Credit Points 10 **Level** 7

Assumed Knowledge

Knowledge of Primary Health Care and families in Australian society at an undergraduate level, augmented with clinical experience at a general Registered Nurse or Registered Midwife level.

....

This unit explores the diversity and complexity of families and communities by examining differing cultural and social values, beliefs and practices relating to family structure, functioning and parenting practices. Students will be encouraged to reflect on their own cultural values and beliefs and how these influence practice when working with children and families. The unit will provide an introduction to community needs, assessment and principles of community development. Focusing on contemporary issues, content includes transition to parenthood, father inclusive practice, parenting children with disabilities, the changing role of gradnparents and carers in Australian society and how neighbourhood and communities influence outcomes for children. This unit will provide students with foundational knowledge in identifying and supporting families with vulnerabilities and fostering resilience. Child protection issues will be addressed.

300570.3   Human-Computer Interaction

Credit Points 10 **Level** 3

Equivalent Units

300160 - Software Interface Design

....

A key component to the discipline of Information Systems is the understanding and the advocacy of the user in the development of IT applications and systems. IT graduates must develop a mind-set that recognizes the importance of users and organizational contexts. They must employ user-centered methodologies in the development, evaluation, and deployment of IT applications and systems. This unit examines human-computer interaction in order to develop and evaluate software, websites and information systems that not only look professional but are usable, functional and accessible.

400835.1   Infant Mental Health

Credit Points 10 **Level** 7

Assumed Knowledge

Fundamental concepts of infant and child physical and mental health at undergraduate degree level.

UWS Postgraduate Handbook , 2014
Health and Science Schools - Postgraduate
This file was created on 12/03/2014 4:15:06 PM. Please check the online handbook for changes made after this date.

Page 76

Equivalent Units

400209 - Introduction to Infant Mental Health - Child and Family Health Nursing

....

This unit will provide an overview of the issues that impact on infant mental health. Theoretical frameworks influencing the study of infant-parent relationships will be discussed. Nursing management strategies relating to infant mental health disorders and the promotion of positive parent-child relationships will be examined. These form a focal point of this unit.

300515.2 Instrumentation and Measurement (PG)

Credit Points 10 **Level** 7

....

This unit covers all topics associated with the measurement and presentation of physical parameters. A wide range of transducers are presented in detail, while instrumentation includes a detailed analysis of a multitude of analog and digital circuits used to amplify, transmit and display electrical signals. The application of these modules in modern measurement equipment is discussed.

401050.1 Integrating Research into Physiotherapy Practice

Credit Points 10 **Level** 7

Prerequisite

400865.2 Evidence-Based Practice OR **400944.1** Evidence-Based Practice (Advanced) AND **401051.1** Clinical Education B (Rehabilitation) OR **401052.1** Clinical Education C (Ambulatory Care) OR **401053.1** Clinical Education D (Paediatrics) OR **401054.1** Clinical Education E (Advanced Care)

Special Requirements

Students must be enrolled in 4662 Bachelor of Health Science/Master of Physiotherapy, 4667 Master of Physiotherapy or 4668 Bachelor of Health Science (Honours)/Master of Physiotherapy.

....

In this unit, students will further develop their evidence based practice skills and knowledge by applying it in practice settings. This will involve applying the academic knowledge and skills from three prior evidence based practice and research units by synthesising it with client goals and values, and experience gained during an advanced level clinical placement. Students will be allocated a topic area from which they will identify a clinical "problem" or health-related issue. Students will then plan and execute a clinical evidence based research investigation. This will involve the formulation of a clinical question, identification and appraisal of best available research evidence, and synthesis of this information to develop a client-group specific, evidence-based management strategy. Students will be expected to reflect on the barriers and facilitators of evidence based practice, and present the outcomes of their research at a student conference. This unit also involves students developing

leadership skills by facilitating and participating in a journal club.

300769.2 Intelligent Agents for E-Markets

Credit Points 10 **Level** 7

Assumed Knowledge

This unit requires basic skills in programming with either JAVA or C++ as the programming language.

Incompatible Units

300245 Intelligent Agents; 300385 Automated Negotiation and e-trading

....

This unit introduces the intelligent agent technology and its applications to e-business. Students will learn the basic theories and algorithms that are used in intelligent agent design and electronic market development. A specific electronic market simulation system will be introduced. Students will have the chance to use this system to build up and practise their skills in developing automated trading agents and e-markets.

300566.2 Introduction to Health Informatics

Credit Points 10 **Level** 2

Assumed Knowledge

Familiarity with use of common business software, eg word proceesing, spreadsheets, database.

....

This introductory unit aims to give the student an insight into the key knowledge and skill set required in the emerging domain of Health Informatics. Critical topics include: The Australian healthcare system, health care improvement modelling, health information systems and management, paper-based v's electronic health records, clinical documentation and data quality, health information management, consumer information security, privacy and ethics, decision support and clinical delivery support systems, healthcare data representation and interchange standards, telehealth and Information Communication technologies (ICT). This will be complemented by practical exercises and assessment support sessions. Through these experiences students will gain an understanding of the application of ICT to the healthcare domain and the skills necessary to play a pivotal role in the design and delivery of healthcare systems and health information management.

400950.2 Introduction to Midwifery 1

Credit Points 10 **Level** 7

Corequisite

400951.2 Introduction to Midwifery 2

Equivalent Units

400076 - Fundamentals of Pregnancy and Birth

....

This unit provides students with an understanding of normal pregnancy and birth. Emphasis will be placed on the biological, physiological, psychosocial and cultural aspects of pregnancy and birth. Students will engage in critical

UWS Postgraduate Handbook , 2014
Health and Science Schools - Postgraduate
This file was created on 12/03/2014 4:15:06 PM. Please check the online handbook for changes made after this date.

Page 77

analysis of midwifery care of women during normal pregnancy and birth and apply principles of primary health care. The unit provides an understanding of the role of the midwife in caring for a woman within a continuity of care model.

400951.2 Introduction to Midwifery 2

Credit Points 10 **Level** 7

Corequisite

400950.2 Introduction to Midwifery 1

Equivalent Units

400077 - Fundamentals of the Postnatal Period and the Newborn

....

This unit provides students with an understanding of the normal postnatal and newborn period. Emphasis will be placed on the biological, physiological, psychosocial and cultural aspects of the postnatal period. The unit also examines the adaptation of the newborn to extra uterine life and care within the neonatal period. Students will engage in critical analysis of midwifery care of women during the puerperium and of the newborn and apply aspects of primary health care. The unit provides an understanding of the role of the midwife in maintaining a woman and family focus within a continuity of care model during the postnatal period.

400942.3 Introduction to Podiatry and Clinical Education

Credit Points 10 **Level** 7

Assumed Knowledge

Anatomy, Pathophysiology 1

Special Requirements

Prior to enrolling in this unit students must have: 1) submitted a Criminal Record Check form prior to 1 June 2010 or a Student Undertaking Form after 1 June 2010 and have applied for a National Police Certificate 2) submitted a Prohibited Employment Declaration prior to 1 June 2010 or a Working with Children Check Student Declaration after 1 June 2010. 3) Hold a Senior First Aid Certificate and completed the OxyViva Resuscitation and EpiPen components as administration by a work cover accredited educational body 4) NSW Health Department Category A Vaccinations

....

This is the first unit to introduce Master's entry students to some basic theoretical and practical components related to podiatric practice with an emphasis on clinical competencies in patient communication and management that will be reinforced in the one week clinical placement in either a private practice or public sector setting. In addition, a clinical component will introduce students to skills required to treat basic skin conditions and evaluate the functional anatomy, gait and cursory examination as well as communication skills which are necessary components for the Podiatric Practice clinical units. Furthermore, general clinical treatment techniques will be covered such as chair side devices, strapping and removable pads to more

complex skills such as the manufacture of non-cast orthotic devices will be covered.

300260.2 IT Project Management

Credit Points 10 **Level** 7

Special Requirements

Students must be enrolled in a postgraduate course.

....

This unit is designed to provide students with an opportunity to learn and apply the knowledge, values and skills of consultancy, project management, and research by undertaking an approved computer-related project, preferably on behalf of a client. The unit covers preparing and presenting project proposals in web-engineering and design and e-business areas, project management, time management, communication skills, and the evolving legal, ethical, and social responsibilities of IT professionals. Students may work in teams or individually, under the supervision of a staff member, to plan and investigate their project. In this unit students prepare and begin projects that they implement the following session in 300261IT Project Implementation. Both units are compulsory for MIT candidates.

401060.1 Laparoscopic Adnexal Surgery

Credit Points 10 **Level** 7

Special Requirements

All students must be advanced trainees in Obstetrics and Gynaecology undertaking a Fellowship in Minimally Invasive Gynaecological Surgery at Blacktown Hospital or other accredited site. Students undertaking this unit must be enrolled in 4690 M Surgery in Advanced Gynaecological Surgery.

....

Students undertaking this unit will have a detailed knowledge of open adnexal surgery at commencement. This unit will extend their knowledge in theoretical and practical terms so that they have a solid foundation for developing their skills in laparoscopic adnexal surgery.

400994.2 Laparoscopic Hysterectomy

Credit Points 10 **Level** 7

Special Requirements

Students must be an advanced trainee in Obstetrics & Gynaecology undertaking a fellowship at Blacktown Hospital. Students undertaking this unit must be enrolled in 4690 Master Surgery in Advanced Gynaecological Surgery

....

Students undertaking this unit will have a detailed knowledge of open hysterectomy at commencement. This unit will extend their knowledge in theoretical and practical terms so that they have a solid foundation for developing their skills in laparoscopic hysterectomy.

UWS Postgraduate Handbook , 2014
Health and Science Schools - Postgraduate
This file was created on 12/03/2014 4:15:06 PM. Please check the online handbook for changes made after this date.

Page 78

400414.2 Leadership and Change

Credit Points 10 **Level** 7

Equivalent Units

NU806A - Processes of Change

Special Requirements

Students must be enrolled in 4569 Master of Primary Health Care, 4602 Master of Aged Care Management or 4603 Graduate Diploma in Aged Care Management.

....

Within the context of a society where change is ongoing, leadership is required in order to achieve optimum outcomes. Students in this unit will be encouraged to critically explore leadership styles, leadership and change theories, leadership in learning organisations and the community within a primary health care framework. This unit will enable students to assess both the internal and external environments of organisations, communities and individuals as the need for change is identified, planned and implemented. The unit identifies the central strategies necessary for the development of leaders who are able to achieve sustainable change outcomes.

400778.2 Leadership and the Development of Organisational Capacity

Credit Points 10 **Level** 7

Assumed Knowledge

Understanding of the principles of leadership and management theories and the attributes of effective leadership in a changing health care environment.

Special Requirements

Students must be enrolled in a postgraduate course.

....

This unit examines the concept, form and structure of health care organisations. Organisational theory is explored and used to analyse a range of structures used in nursing and contemporary health care. Factors which influence organisational design, function and effectiveness are explored and discussed including: organisational behaviour, strategy, culture, power and politics, technology, sustainability and effectiveness. A major focus in the unit is planning for strategic organisational development to meet the challenges of rapid change and the need for performance improvements in patient care delivery. Concepts related to the strategic development of workforce capacity in the health care arena are considered through the application of a range of theories including the learning organisation. Leadership will be examined within the context of the unit with a particular emphasis on change management.

400777.3 Leadership for Quality and Safety in Health Care

Credit Points 10 **Level** 7

Equivalent Units

400842 - Quality and Safety in Health Care

Special Requirements

Students must be enrolled in a postgraduate course. Students enrolled in course 4673 must have passed the following three units before they can enrol in this unit - 400220 Contemporary Professional Practice in Mental Health Nursing and 400206 Evidence-based Nursing and 400235 Leadership in Clinical Practice.

....

Increasingly clinical leaders, practitioners and health service managers are being held accountable for improving the quality and safety of patient care and for developing a culture of quality improvement within their teams. In this unit students learn about quality, patient safety and governance frameworks and strategies that they can employ within healthcare to improve system performance, patient safety and patient outcomes. The main approaches used to address quality of care and patient safety are examined and their applications critiqued. Students will explore leadership issues for developing systematic, coherent quality improvement frameworks and quality initiatives that can be applied within their own sphere of practice.

400235.2 Leadership in Clinical Practice

Credit Points 10 **Level** 7

Special Requirements

Students must be enrolled in a postgraduate course.

....

We are all confronted with the challenge of leadership, regardless of nursing speciality, role or status. Encompassed within leadership is knowledge of self, relevant theories, skills and political awareness which are developed through higher education. By developing leadership skills and knowledge we can influence better outcomes for our patients/clients and create more positive working environments. In the unit, Leadership in Clinical Practice, nursing leadership arising from expert clinical practice is explored as a general notion rather than as one arising from within any particular clinical speciality. Content includes theories, concepts and styles of leadership, the development of leadership potential, motivation, coaching, and mentorship, concepts of power, authority and empowerment and discussion of contemporary leadership issues. Assignments provide students with the opportunity to apply new knowledge about leadership to their practice, whether they be in management, education or clinical roles.

300597.2 Master Project 1

Credit Points 10 **Level** 7

Assumed Knowledge

Knowledge in engineering, construction, built environment and related disciplines.

Equivalent Units

300189 - Master of Engineering Specialist Reading, 200327 - Built Environment Project, 200328 - Built Environment Research Project

....

Units

UWS Postgraduate Handbook , 2014
Health and Science Schools - Postgraduate
This file was created on 12/03/2014 4:15:06 PM. Please check the online handbook for changes made after this date.

Page 79

This unit is a problem based project unit. Students are expected to conduct self studies under supervision by academic staff. Students will identify research topics in consultation with supervisors, carry out literature survey in the fields of engineering and building construction, define research objectives and scope, establish research methodology and prepare a research plan.

300598.3   Master Project 2

Credit Points 10 **Level** 7

Assumed Knowledge

Knowledge in engineering, construction, built environment and related disciplines.

Corequisite

300597.2 Master Project 1

Equivalent Units

300188 - Master of Engineering Project, 200328 - Built environment Research Project

....

This unit is a continuation of unit Master Project 1 and is a problem based project unit. Students are expected to conduct self studies under supervision by academic staff and deliver the final outcomes of the research topics that are proposed in Master Project 1. Students will employ the identified methodologies to carry out the research plans and fulfill the research objectives with the defined scope. Each individual student is required to produce an oral presentation and a final written report in the fields of engineering and building construction. Students will acquire problem solving skills in this unit.

300600.2   Mechatronic System Design

Credit Points 10 **Level** 7

Assumed Knowledge

Equivalent Bachelor of Engineering degree.

Incompatible Units

300512 - Servo Systems Design (PG), 300191 - Mechatronic System Design

....

This unit will advance the skills of mechanics, mechanical systems and automation in the practice of engineering design as applied to mechatronic devices and systems. The ability to perform detailed design analysis of machine elements as well as control systems as applicable to manufacturing and process machinery is the intended outcome of undertaking this unit and project-based tasks will form part of the learning process and team work experience.

400217.3   Mental Health Assessment and Application

Credit Points 10 **Level** 7

Assumed Knowledge

Students must be registered nurses with a basic knowledge of mental health, mental illness, and assessment processes

at undergraduate level, augmented with experience in mental health settings.

Special Requirements

Students must be enrolled in 4654 Graduate Diploma in Nursing (Mental Health).

....

Assessment is an essential component of the nurse/client interaction in mental health/psychiatric nursing. Effective nursing depends on comprehensive, accurate, systematic and continuous data collection. This assists the nurse and client to accurately identify and document critical client issues and formulate management strategies. This unit prepares the student in the area of mental health assessment, in identifying the factors that affect individual/family mental health and applying this knowledge to decisions about appropriate interventions.

400773.3   Mental Health for Communities

Credit Points 10 **Level** 7

Special Requirements

Students must be enrolled in 4569 Master of Primary Health Care, 4570 Graduate Diploma in Primary Health Care, 4673 Master of Mental Health Nursing (Nurse Practitioner) or 4654 Graduate Diploma in Nursing (Mental Health).

....

Evolving diversity and changes within societies mean that what are understood as adaptive and maladaptive lifestyles, behaviours and attitudes towards mental illness and traditional healing approaches will vary greatly. This unit presents an outline of the themes and topics central to discussions of mental health and illness within a community. It examines the influences of stereotype and stigma, environment, culture, adaptive ability and support systems for psychological well-being while considering approaches which focus on and promote resilience, attachment, a sense of belonging and empowerment. Contemporary mental health and illness issues relating to selected vulnerable groups will be explored.

400688.2   Mental Health in Chinese Medicine

Credit Points 10 **Level** 7

Special Requirements

Students must be enrolled in Master of Health Science (Traditional Chinese Medicine) or Master of Health Science (Acupuncture).

....

This unit will enable practitioners to extend their understanding of the Traditional Chinese Medicine (TCM) diagnosis and management of a range of mental health conditions that are common in the community. A feature of this unit is the integration of TCM and western approaches. Treatment will focus on acupuncture with Chinese herbal medicine treatments included.

UWS Postgraduate Handbook , 2014
Health and Science Schools - Postgraduate
This file was created on 12/03/2014 4:15:06 PM. Please check the online handbook for changes made after this date.

Page 80

400218.2   Mental Health Nursing Practice 1

Credit Points 10 **Level** 7

Assumed Knowledge

Students are required to be registered nurses with basic knowledge of mental health, mental illness, and assessment processes, augmented with experience in mental health settings.

Special Requirements

Students must be enrolled in the Graduate Diploma in Nursing (Mental Health)

....

This unit will assist the student to develop a comprehensive understanding of the nurse-client relationship in mental health nursing, presenting this relationship in its multiple contexts, (e.g., the interpersonal, cultural and socio-political), in order to appreciate factors influencing this relationship and the way it might be 'lived out' in practice. The unit assists students to understand: (1) the nurse-client relationship and its development; (2) the nature of the relationship between the client and nurse; (3) how skilled nurses use this relationship to assist their clients; and (4) how the type of relationship the nurse develops with the client frequently determines the quality of work they do together.

400219.3   Mental Health Nursing Practice 2

Credit Points 10 **Level** 7

Assumed Knowledge

Students must be registered nurses with a basic knowledge of mental health, mental illness, and assessment processes, augmented with experience in mental health settings.

Special Requirements

Students must be enrolled in 4654 Graduate Diploma Nursing (Mental Health).

....

This unit is designed to challenge the student to consider evidence-based practice in mental health nursing. Nurses are required to be accountable for their clinical practice and to be able to argue the evidence for specific nursing interventions. Students undertake critical analysis of evidence-based practice in mental health nursing as a concept, a means of accountability, as a means of defining nursing knowledge. Students will apply evidence-based practice concepts to specific psychiatric disorders and problems.

300398.2   Methods of Researching

Credit Points 10 **Level** 7

Assumed Knowledge

Library research skills, project design and management, an area of science.

Equivalent Units

ASC411 - Research Methodology & Experimental Design, SC808A - Research Methodology & Experimental Design, NU808A - Introduction to Research PHC, EH838A - Research methods: science in context, 300277 - Professional Praxis - Inquiring in Context

Special Requirements

Students must be enrolled in a postgraduate course.

....

In this unit postgraduate students develop a proposal for a research study in an area of interest, drawing upon their knowledge and experiences from other units in their program of study. Students learn how to apply research methods to a variety of research situations and questions; to understand how research questions are developed and answered empirically through suitable choice of research methodology, design and method; and how research findings are validated and communicated. The unit is taught through self-paced, self-directed learning. Class contact is three days of workshops, in the first and second half of the session.

400954.3   Midwifery Knowledge and Practice 1

Credit Points 10 **Level** 7

Prerequisite

400950.2 Introduction to Midwifery 1 AND **400951.2** Introduction to Midwifery 2

Equivalent Units

400080 - Practice of Midwifery 1

Special Requirements

Students must be enrolled in 4505 Graduate Diploma in Midwifery to enrol in this unit. This unit can only be undertaken by a registered nurse employed in a participating health facility in the position of a midwifery student.

....

This unit explores the key concepts and principles underpinning midwifery practice such as primary health care, public health and working in partnership. Students will explore historical development of midwifery and examine contemporary models of midwifery care. The unit will also increase awareness of, and ability to critique, the construct of culture in relation to childbirth. Legal and ethical issues in midwifery practice will also be explored. Students will develop also be gaining clinical midwifery skills development within the practice clinical setting.

400956.3   Midwifery Knowledge and Practice 2

Credit Points 20 **Level** 7

Prerequisite

400953.3 Complex Midwifery 1 AND **400955.2** Complex Midwifery 2 AND **400954.3** Midwifery Knowledge and Practice 1 AND **400082.5** Essentials for Best Practice in Midwifery

Special Requirements

Students must be enrolled in 4505 Graduate Diploma in Midwifery. This unit can only be undertaken by a registered nurse employed in a participating health facility in the position of a midwifery student.

UWS Postgraduate Handbook , 2014
Health and Science Schools - Postgraduate
This file was created on 12/03/2014 4:15:06 PM. Please check the online handbook for changes made after this date.

Page 81

....

In this unit students will draw on their clinical midwifery and personal experience to explore the diverse meanings of birth and the transition to parenthood. Students will be encouraged to develop skills as reflective practitioners, recognising the impact of personal beliefs and how to develop these beliefs in ways that enhance midwifery practice. Students will strengthen their skills in undertaking psychosocial assessment, effectively engaging women in services, facilitating groups and working in collaboration with other professionals to support women. This unit also addresses the professional needs of midwives. Students will complete their clinical requirements.

300256.2 Multimedia Communication Systems

Credit Points 10 **Level** 7

Assumed Knowledge

Basic knowledge in digital compression and coding, digital communication systems and fundamentals of data communication and networking.

Special Requirements

Students must be enrolled in a postgraduate course.

....

This unit covers advanced concepts and technologies used in emerging multimedia communication systems. Theory, practice and standards for IT professionals endeavouring to build data compression systems for multimedia applications are emphasised.

400574.2 Musculoskeletal Health in Chinese Medicine 1

Credit Points 10 **Level** 7

Assumed Knowledge

Equivalent to undergraduate training in Traditional Chinese Medicine.

....

This unit along with Musculoskeletal Health in Chinese Medicine 2 will enable practitioners to develop an in-depth understanding of the diagnosis and management of musculoskeletal conditions using acupuncture and Chinese herbal medicine. This unit presents a systematic approach to the assessment of musculoskeletal disorders using Traditional Chinese Medicine (TCM) and specific medical tests and includes a focus on common musculoskeletal disorders, sports injuries and rehabilitation. Musculoskeletal Health in Chinese Medicine 1 and 2 together, provide a strong specialist clinical focus on the management of musculoskeletal health disorders with acupuncture and Chinese herbal medicine.

400575.2 Musculoskeletal Health in Chinese Medicine 2

Credit Points 10 **Level** 7

Assumed Knowledge

Equivalent to undergraduate training in Traditional Chinese Medicine (TCM).

....

This unit extends students' knowledge and understanding developed in Musculoskeletal Health in Chinese Medicine 1. This unit includes a systematic approach to the assessment and treatment of fractures, systemic and inflammatory disorders. Musculoskeletal Health in Chinese Medicine 1 and 2 together provide a strong specialist clinical focus on the management of musculoskeletal health disorders with TCM.

400999.3 Musculoskeletal Physiotherapy

Credit Points 10 **Level** 3

Assumed Knowledge

Human anatomy, human physiology, and pathophysiology

Prerequisite

400985.1 Clinical Education A

Special Requirements

Students must be enrolled in 4662 Bachelor of Health Science/Master of Physiotherapy, 4667 Master of Physiotherapy, and 4668 Bachelor of Health Science (Honours)/Master of Physiotherapy programs. Students in courses 4662 Bachelor of Health Science/Master of Physiotherapy and 4668 Bachelor of Health Science (Honours)/Master of Physiotherapy are to complete prerequisite unit 400982 - Core Competencies in Physiotherapy Practice. Students in course 4667 Master of Physiotherapy are required to complete prerequisite unit 400987 Neurological Physiotherapy Practice. Students in this program are required to participate fully in practical classes. This involves disrobing to shorts and singlet or swim-suit equivalent in mixed gender classes. Students will practice hands-on physiotherapy examination and treatment techniques on both genders, and will personally experience these techniques which will be performed on them by other students and relevant academic staff.

....

This unit focuses on client assessment and treatment using manual physiotherapy techniques. An emphasis is placed on diagnostic reasoning and evaluation, understanding the implications of pathology in a physiotherapy context, prioritising problems and integrating manual therapy with other physiotherapy treatments. This requires strong communication skills, ethical and professional behaviour and an appreciation of interprofessional care.

300255.2 Network Management

Credit Points 10 **Level** 7

Assumed Knowledge

Familiar with the fundamentals of computer networking and data communications. In particular, a good understanding of the OSI model, the internet protocol suite and current internet technologies.

Equivalent Units

54947 - Management of Networked Systems

Special Requirements

Students must be enrolled in a postgraduate course.

....

UWS Postgraduate Handbook , 2014
Health and Science Schools - Postgraduate
This file was created on 12/03/2014 4:15:06 PM. Please check the online handbook for changes made after this date.

Page 82

University of Western Sydney

The performance of any modern organization is heavily dependent on their networked systems and how these systems are managed. The increasing demand for ICT services and the huge growth of the Internet have resulted in large heterogeneous networks. This unit addresses the issues relevant to management of such networks and the services that run on them. It covers the principles and current practices pertinent to integrated management of networks, systems, and services. The unit helps the students to understand relevant protocols, standards, and standards organizations. It also introduces them to trends and key research areas in management of networked systems.

300695.2   Network Technologies

Credit Points 10 **Level** 7

Assumed Knowledge

The students should be familiar with the fundamentals of computer architecture and programming principles. They should also have a working knowledge of the World Wide Web.

Equivalent Units

300254 Network Technology and Data Communications

Special Requirements

Students must be enrolled in a postgraduate course.

....

Computer networking is probably among the fastest growing technologies of our times. The Internet interconnects millions of computers providing many new exciting opportunities and challenges. The Internet and the World Wide Web have provided the communication and infrastructure needed for global collaboration and information exchange. As a result of the rapid growth of networked systems and the diverse applications that run on them, success in many professions depends on a sound understanding of the technologies underlying these systems and applications. This unit explores these issues further and provides the students with such an understanding. It covers the principles and current practices pertinent to computer networking and communications. It describes some of the important technologies and devices used in modern networks for information distribution and data sharing. The unit helps the students to understand important relevant models, protocols and standards in networking and internetworking.

400689.2   Neurological Disorders in Chinese Medicine

Credit Points 10 **Level** 7

Special Requirements

Students must be enrolled in Master of Health Science (Traditional Chinese Medicine) and/or Master of Health Science (Acupuncture).

....

This unit will enable practitioners to extend their understanding of Traditional Chinese Medicine (TCM) diagnosis and management of a range of neurological disorders. A feature of this unit is the integration of TCM and western medical approaches. Treatment will focus on acupuncture with common patent Chinese herbal medicine treatments included.

400987.1   Neurological Physiotherapy Practice

Credit Points 10 **Level** 7

Assumed Knowledge

Neuroanatomy and research methods. Knowledge of clinical pharmacology would be an advantage

Corequisite

400983.1 Orthopaedic Physiotherapy AND **400984.1** Cardiorespiratory Physiotherapy AND **400985.1** Clinical Education A

Special Requirements

Students must be enrolled in the 4667 Master of Physiotherapy. Students in this program are required to participate fully in practical classes. This involves disrobing to shorts and singlet or swim-suit equivalent in mixed gender classes. Students will practice hands-on physiotherapy examination and treatment techniques on both genders, and will personally experience these techniques which will be performed on them by other students and relevant academic staff.

....

This unit introduces the scope of physiotherapy practice in Australia and around the world as well as ethical and professional behaviours and communication skills required by physiotherapists. Students will develop skills in conducting simple subjective and objective examinations of posture, range of movement, muscle strength and length and providing gait rehabilitation. These knowledge and skills will be applied to the physiotherapy management of clients with acute neurological disorders. physiotherapy contexts. Neurological competencies addressed in this unit include introductory skills in neurological physiotherapy assessment, interpretation and prioritisation of findings along with the selection and implementation and evaluation of appropriate treatment strategies.

400998.2   Neurological Rehabilitation

Credit Points 10 **Level** 3

Assumed Knowledge

Human anatomy, human physiology, neuroanatomy, and pathophysiology

Prerequisite

400985.1 Clinical Education A

Special Requirements

Students must be enrolled in 4662 Bachelor of Health Science/Master of Physiotherapy, 4668 Bachelor of Health Science (Honours)/Master of Physiotherapy and 4667 Master of Physiotherapy. Students in this program are required to participate fully in practical classes. This involves disrobing to shorts and singlet or swim-suit equivalent in mixed gender classes. Students will practice hands-on physiotherapy examination and treatment techniques on both genders, and will personally experience these techniques which will be performed on them by other students and relevant academic staff.

UWS Postgraduate Handbook , 2014

Page 83

....

This unit focuses on client assessment and evidence-based physiotherapy management in neurological rehabilitation. This will require strong communication skills, ethical and professional behaviour and an appreciation of interprofessional care. Professional competencies addressed in this unit include clinical reasoning in neurological physiotherapy assessment and treatment, implementation and evaluation of evidence-based interventions and management of complex conditions.

300144.4   Object Oriented Analysis

Credit Points 10 **Level** 2

Assumed Knowledge

General understanding of what an information system is and how information systems development is undertaken and; Introductory knowledge about system analysis and design, including - basic problem solving experience in computerised information systems - ability to derive systems requirements from problem definitions - ability to produce system models using process, data, object and network modelling. - understanding design and implementation issues include, (but may not be limited to), elementary database design, input, output and user interface design and prototyping.

....

Analyzing and modeling requirements using the object-oriented (OO) approach is the core strength of this unit. The system analysis is taken to greater depths within the context of Object Orientation. The Unified Modeling Language version 2.0 (notably use cases, activity diagrams, class diagrams and sequence diagrams) is used as a modeling standard for creating OO models in the problem space. This unit also covers methodologies for OO analysis work through practical case studies.

400176.3   Occupation and Ageing

Credit Points 10 **Level** 3

Prerequisite

400912.1 Occupational Therapy Process

Special Requirements

Students must be enrolled in courses 4663 Bachelor of Health Science/Masters of Occupational Therapy and 4664 Master of Occupational Therapy. To undertake this unit, students must comply with the following special requirements: Prior to enrolling in this unit students must have: 1) submitted a Criminal Record Check form prior to 1 June 2010 or a Student Undertaking Form after 1 June 2010 and have applied for a National Police Certificate 2) submitted a Prohibited Employment Declaration prior to 1 June 2010 or a Working with Children Check Student Declaration after 1 June 2010 3) possess a current WorkCover Authority approved First Aid Certificate.

....

The process of ageing will be examined critically using the biopsychosocial model. Students will use research evidence to prepare occupational therapy intervention for older people and their families that promotes quality of life and maximum social participation. Students will reflect on

their own attitudes towards ageing and how social stereotypes of older people must be challenged to promote a positive view of this stage of life.

400169.3   Occupation and Mental Health

Credit Points 10 **Level** 3

Special Requirements

Students must be enrolled in 4663 Bachelor of Health Science/Masters of Occupational Therapy or 4664 Master of Occupational Therapy. Prerequisite requirements for students enrolled in 4663: 300754 - Neuroanatomy, 101614 - Psychology and Health and 400908 - People, Environment and Occupations. Corequisite requirement for students enrolled in 4664: 400911 - Occupational Therapy Theory and Practice.

....

This unit provides an understanding of the impact of major mental illnesses and disorders on occupational participation. These illnesses/disorders are examined from varying perspectives including consumer, recovery, population health and biomedical. Mental health legislation, policies, strategies and standards are examined in relation to clinical practice in this field. Occupational therapy theory, assessments, interventions and outcomes are incorporated together with cross-disciplinary approaches and current evidence in order to provide a foundation for practice in mental health settings.

400171.3   Occupation and Neurology

Credit Points 10 **Level** 3

Special Requirements

Students must be enrolled in 4663 Bachelor of Health Science/Masters of Occupational Therapy or 4664 Master of Occupational Therapy. Prerequisite requirements for students enrolled in 4663: 300754 - Neuroanatomy and 400908 - People, Environment and Occupations. Corequisite requirement for students enrolled in 4664: 400911 - Occupational Therapy and Practice.

....

This unit prepares occupational therapy students to work in a variety of settings with individuals who have a neurological condition. The impact of common neurological conditions on the person, their environment and their occupations will be examined. Students will be exposed to a variety of assessments, interventions and evaluation tools suitable for this client population.

400165.2   Occupation and the Environment

Credit Points 10 **Level** 3

Prerequisite

400908.1 People, Environment and Occupations OR
400911.1 Occupational Therapy Theory and Practice

Special Requirements

Students must be enrolled in 4663 Bachelor of Health Science/Masters of Occupational Therapy or 4664 Master of Occupational Therapy. To undertake this unit, students must comply with the following special requirements: Prior to enrolling in this unit students must have: 1) successfully completed an approved Child Protection Workshop 2)

UWS Postgraduate Handbook , 2014
Health and Science Schools - Postgraduate
This file was created on 12/03/2014 4:15:06 PM. Please check the online handbook for changes made after this date.

Page 84

submitted a Prohibited Employment Declaration prior to 1 June 2010 or a Working with Children Check Student Declaration after 1 June 2010 3) possess a current WorkCover Authority approved First Aid Certificate.

....

Students will demonstrate skills in the analysis and modification of the environment using principles of ergonomics and appropriate Australian standards in building design. The ICF will provide the context for assessment and modification of the environment to enable individuals with impairments to overcome activity limitations or restrictions in participation.

300682.2   Occupational and Environmental Hygiene

Credit Points 10 **Level** 7

Assumed Knowledge

Basic understanding of chemistry, physics, biology, workplace hazards OHS law.

Equivalent Units

300394 - Occupational Environment: Assessment and Control, EH845A - Hazardous Chemical Assessment, EH840A - Ergonomics

Special Requirements

Field visits may limit the numbers in any particular activity for OHS reasons. Students will need appropriate PPE such as safety shoes, laboratory coats and safety glasses.

....

The unit will expose students to the various methods used in measuring exposures to chemical pollutants, biological pollutants, ergonomics, noise, heat & cold and lighting in both the workplace and general indoor environment. In addition to assessing the exposures student will explore the various methods available of controlling the different types of exposures. The unit will involve measuring various types of potential hazards and comparing the results to current standards before recommending methods of controlling the hazard/s.

300391.2   Occupational Health Management

Credit Points 10 **Level** 7

Equivalent Units

EH831A - Occupational Health Management

Special Requirements

Students must be enrolled in 3602 - Master of Environmental Management, 3605 - Master of Occupational Safety, Health and Environmental Management, 3606 - Graduate Diploma in Occupational Safety, Health and Environmental Management, 3607 - Graduate Certificate in Occupational Safety, Health and Environmental Management, 3647 - Master of Science, 3648 - Graduate Diploma in Science (exit only), 3649 - Graduate Certificate in Science, 4651 - Master of Health Science, 4652 - Graduate Diploma in Health Science or 4653 - Graduate Certificate in Health Science

....

This unit focuses on the practice of occupational health within national and international frameworks. It explores issues such as the physical, social and mental impact of the occupational environment on health and includes the human body's response to occupational health hazard exposure through toxicological and epidemiological principles. Strategies for the management of occupational health are examined, together with methods of monitoring and evaluating occupational health programs.

400916.2   Occupational Justice

Credit Points 10 **Level** 7

Prerequisite

400165.2 Occupation and the Environment AND **400169.3** Occupation and Mental Health

Equivalent Units

400170 - Occupation & Social Participation

Special Requirements

Students must be enrolled in 4663 Bachelor of Health Science/Masters of Occupational Therapy or 4664 Master of Occupational Therapy. If students are visiting a NSW Health facility they will need to comply with the occupational screening and immunisation policy of NSW Health.

....

This unit critically examines practice in the community with a focus on social inclusion and occupational justice. Life perspectives of people experiencing occupational injustice are explored. Current and historical ideologies which underpin global and national legislation and policies on human rights are examined. The promotion of occupational participation through occupational therapy practice is outlined. This unit challenges popular myths and stereotypes of people with disabilities. Issues such as de-institutionalisation, duty of care, dignity of risk, choice-making, rights and negligence are critiqued against legal, ethical and personal perspectives. This unit assists students to develop critical thinking and reflection skills for practice.

400914.1   Occupational Therapy Practice 4

Credit Points 20 **Level** 7

Assumed Knowledge

Completion of all core Occupational Therapy units.

Equivalent Units

400179 - Occupational Therapy Clinical Practice 4

Special Requirements

Students must be enrolled in 4663 Bachelor of Health Science/Masters of Occupational Therapy or 4664 Master of Occupational Therapy. Prerequisite requirements: 400910 - Occupational Therapy Practice 3 (for students enrolled in 4663) or 400911 - Occupational Therapy Theory and Practice (for students enrolled in 4664). Students must comply with the following special requirements: Prior to enrolling in this unit students must have: 1) successfully completed an approved Child Protection Workshop 2) submitted a Prohibited Employment Declaration prior to 1 June 2010 or a Working with Children Check Student Declaration after 1 June 2010 3) provide evidence of

UWS Postgraduate Handbook , 2014
Health and Science Schools - Postgraduate
This file was created on 12/03/2014 4:15:06 PM. Please check the online handbook for changes made after this date.

Page 85

compliance with the occupational screening and immunisation policy of NSW Health 4) possess a current WorkCover Authority approved First Aid Certificate.

....

This unit will allow students to consolidate academic knowledge and practice skills in preparation for becoming a competent beginning practitioner. Students will be expected to actively participate in assessment, analysis, goal setting, intervention and evaluation under the supervision of an occupational therapist. Students will complete practice hours in accordance with World Federation of Occupational Therapy accreditation guidelines.

400915.1   Occupational Therapy Practice 4 Workshop

Credit Points 10 **Level** 7

Assumed Knowledge

Completion of all core Occupational Therapy units.

Prerequisite

400913.1 Occupational Therapy Project

Equivalent Units

400179 - Occupational Therapy Clinical Practice 4

Special Requirements

Students must be enrolled in 4663 Bachelor of Health Science/Masters of Occupational Therapy or 4664 Master of Occupational Therapy. Students must comply with the following special requirements: Prior to enrolling in this unit students must have: 1) submitted a Criminal Record Check form prior to 1 June 2010 or a Student Undertaking Form after 1 June 2010 and have applied for a National Police Certificate 2) submitted a Prohibited Employment Declaration prior to 1 June 2010 or a Working with Children Check Student Declaration after 1 June 2010. If students are visiting a NSW Health facility they will need to comply with the NSW Health Occupational Screening and Vaccination Against Infectious Diseases Policy.

....

This unit will facilitate the transition from student to occupational therapy practitioner. The unit will allow students to consider employment opportunities for their future and strategies for career and professional development.

400912.1   Occupational Therapy Process

Credit Points 10 **Level** 3

Special Requirements

Students must be enrolled in 4663 Bachelor of Health Science/Masters of Occupational Therapy or 4664 Master of Occupational Therapy. Pre-requisite for 4663 is 400160 - Introduction to Occupational Therapy. Co-requisite for 4664 is 400911 - Occupational Therapy Theory and Practice

....

This unit provides students with the knowledge and skills to apply the occupational therapy problem-solving process in an evidence-based way, across a diverse range of practice situations. Students will gain knowledge in the application of each stage of the occupational therapy process, learn

skills in the selection and implementation of assessments and outcome measures, and undertake intervention planning to suit clients with different occupational needs and health trajectories. Different occupational therapy approaches will be reviewed and students will gain skills in tailoring intervention approaches to suit client need and practice context.

400913.1   Occupational Therapy Project

Credit Points 10 **Level** 7

Assumed Knowledge

Knowledge of issues and concerns relevant to the occupational therapy profession and occupational therapy clients and consumers. This knowledge will ideally have been gained in part by undertaking several fieldwork experiences in preceding years of the course.

Prerequisite

400912.1 Occupational Therapy Process AND **400865.2** Evidence-Based Practice

Special Requirements

Students must be enrolled in 4663 Bachelor of Health Science/Masters of Occupational Therapy or 4664 Master of Occupational Therapy. This is a specialty unit offered as a compulsory core unit of the occupational therapy program. It is profession specific, preparing students to practice as an occupational therapist and not relevant as an elective for non-occupational therapy students.

....

The aim of this unit is for students to critically apply their knowledge of professional theory, practice, research and evaluation skills to the investigation of an occupational therapy professional issue of interest or concern. Students will apply unobtrusive research methods to investigate their chosen topic. Students develop an extensive knowledge of their chosen topic and critically analyse the implications of their findings in terms of theory, policy and contemporary health care practice. Students will synthesise their findings into a scholarly research project report and present their findings at a professional-level capstone student conference.

400917.1   Occupational Therapy Specialties

Credit Points 10 **Level** 7

Assumed Knowledge

It is assumed that students entering this unit will have completed all previous occupational therapy units from the third year of the Bachelor of Health Science/Masters of Occupational Therapy.

Prerequisite

400912.1 Occupational Therapy Process

Special Requirements

Students must be enrolled in 4663 Bachelor of Health Science/Masters of Occupational Therapy or 4664 Master of Occupational Therapy. Students must comply with the following special requirements: Prior to enrolling in this unit students must have: 1) successfully completed an approved Child Protection Workshop 2) submitted a Prohibited Employment Declaration prior to 1 June 2010 or a Working with Children Check Student Declaration after 1

UWS Postgraduate Handbook , 2014
Health and Science Schools - Postgraduate
This file was created on 12/03/2014 4:15:06 PM. Please check the online handbook for changes made after this date.

Page 86

June 2010 3) possess a current WorkCover Authority approved First Aid Certificate.

....

This unit provides occupational therapy students with the opportunity to select from, and undertake advanced study in, a range of occupational therapy clinical specialty areas. Several streams will run concurrently in this unit representing key clinical areas of specialisation in occupational therapy. Students will be able to focus their study, by selecting a combination of clinical specialty streams. Streams will cover relevant clinical content, examining the unique occupational therapy contribution in each specialty area.

400911.1 Occupational Therapy Theory and Practice

Credit Points 10 **Level** 7

Special Requirements

Students must be enrolled in 4664 Master of Occupational Therapy. To undertake this unit, students must comply with the following special requirements: Prior to enrolling in this unit students must have 1) successfully completed an approved Child Protection Workshop; 2) submitted a Prohibited Employment Declaration prior to 1 June 2010 or a Working with Children Check Student Declaration after 1 June 2010; 3) provide evidence of compliance with the occupational screening and immunisation policy of NSW Health; and 4) possess a current First Aid Certificate.

....

This unit introduces master's entry students to the theory and practice of occupational therapy. Students will explore the unique contribution of occupational therapists in the health care setting, apply theoretical and philosophical principles underpinning the profession to client groups, and learn analytical skills to examine the relationship between a person, their environment and their participation in daily occupations. The occupational therapy problem solving process will be briefly introduced. In addition, students will study clinical and professional competencies related to practice as a health professional. Finally, the above knowledge and skills will be applied during supervised fieldwork experience.

400983.1 Orthopaedic Physiotherapy

Credit Points 10 **Level** 3

Prerequisite

400982.1 Core Competencies in Physiotherapy Practice AND 400981.1 Clinical Pharmacology AND 400871.1 Professional Health Competencies AND 101614.1 Psychology and Health AND 400864.2 Research Methods (Quantitative and Qualitative)

Corequisite

400984.1 Cardiorespiratory Physiotherapy AND 400986.1 Neurological Physiotherapy AND 400985.1 Clinical Education A

Special Requirements

Students must be enrolled in 4662 Bachelor of Health Science/Master of Physiotherapy, 4668 Bachelor of Health Science (Honours)/Master of Physiotherapy or 4667

Graduate Entry Master of Physiotherapy programs. Students in this program are required to participate fully in practical classes. This involves disrobing to shorts and singlet or swim-suit equivalent in mixed gender classes. Students will practice hands-on physiotherapy examination and treatment techniques on both genders, and will personally experience these techniques which will be performed on them by other students and relevant academic staff. Students cannot enrol in Year 3 Physiotherapy units until they have completed 160 credit points in the Bachelor of Health Science/Master of Physiotherapy and 4668 Bachelor of Health Science (Honours)/Master of Physiotherapy programs.

....

This unit builds on the knowledge and skills developed in the first 2 years of physiotherapy study. It focuses on client assessment and evidence-based management in acute orthopaedic physiotherapy contexts. This will require strong communication skills, ethical and professional behaviour and an appreciation of interprofessional care. Professional competencies addressed in this unit include introductory skills in cardiorespiratory physiotherapy assessment, interpretation and prioritisation of findings along with the implementation and evaluation of appropriate treatment strategies.

401047.1 Paediatric Physiotherapy

Credit Points 10 **Level** 7

Prerequisite

400997.1 Exercise Rehabilitation AND 400998.1 Neurological Rehabilitation

Special Requirements

Students must be enrolled in 4662 Bachelor of Health Science/Master of Physiotherapy, 4667 Master of Physiotherapy or 4668 Bachelor of Health Science (Honours)/Master of Physiotherapy

....

This unit aims to prepare the student as a competent entry-level practitioner in paediatric physiotherapy. It focuses on understanding the changes which occur from infancy to maturity and the impact of congenital or acquired conditions, or lifestyle diseases causing dysfunction. Clinical and ethical reasoning and family-centred practice are both stressed. The approach will also emphasise the role of physiotherapy within inter-professional teams to prepare for different work settings (acute care, rehabilitation and/or community). The unit integrates prior learning from previous years (especially units related to neurology musculoskeletal and cardiopulmonary physiotherapy and exercise rehabilitation).

400832.1 Partnership in Practice

Credit Points 10 **Level** 7

....

Health services across Australia have demonstrated commitment to the roll-out of Family Partnership Training to all health professionals who support families with young children. This unit will provide an overview of the Family Partnership Model through completion of the core Family Partnership Training (30 hours face to face interactive,

UWS Postgraduate Handbook , 2014
Health and Science Schools - Postgraduate
This file was created on 12/03/2014 4:15:06 PM. Please check the online handbook for changes made after this date.

Page 87

Units

experiential learning). Students will examine the theoretical framework underlying the model which emphasises the need for highly skilled professional communication to develop supportive and effective relationships with families. Facilitating groups for parents is a key skill of the child and family health professional. In this unit participants will also study how adults learn, and the key skills in understanding and promoting the group process. Working in partnership extends to other professional and agencies, enabling students to develop skills in professional collaboration.

401061.1   Pelvic Anatomy

Credit Points 10 **Level** 7

Special Requirements

All students must be advanced trainees in Obstetrics and Gynaecology undertaking a Fellowship in Minimally Invasive Gynaecological Surgery at Blacktown Hospital or other accredited site. Students undertaking this unit must be enrolled in 4690 M Surgery in Advanced Gynaecological Surgery

....

Students undertaking this unit will have a detailed knowledge of pelvic anatomy at commencement. This unit will extend their knowledge in theoretical and practical terms so that they have a solid foundation for developing their skills at minimally invasive surgery.

401062.1   Pelvic Floor Function and Dysfunction

Credit Points 10 **Level** 7

Special Requirements

All students must be advanced trainees in Obstetrics and Gynaecology undertaking a Fellowship in Minimally Invasive Gynaecological Surgery at Blacktown Hospital or other accredited site. Students undertaking this unit must be enrolled in 4690 M Surgery in Advanced Gynaecological Surgery

....

Students undertaking this unit will have a good working knowledge of the pelvic floor at commencement. This unit will extend their knowledge in theoretical and practical terms so that they can safely recognise pelvic floor anatomy through the vaginal, abdominal and laparoscopic approach.

400833.3   Perinatal Mental Health

Credit Points 10 **Level** 7

Assumed Knowledge

Fundamental concepts of mental health at undergraduate degree level.

Special Requirements

Students must be enrolled in 4682 Master of Child and Family Health (Karitane). Patient safety issues are associated. Students will need to have completed the NSW Health Special Requirements for clinical practicum attendance. At present these include: Prohibited Employment Declaration prior to 1 June 2010 or a Working with Children Check Student Declaration after 1 June 2010; Criminal Record Check form prior to 1 June 2010 or a

Student Undertaking Form after 1 June 2010 and have applied for a National Police Certificate; Adult Health Immunisation Schedule. NSW Ministry of Health may request additional documents according to policy changes. Students outside NSW are expected to meet any other state requirements for clinical placement.

....

This unit enables students to explore the complex issues related to parental mental health including; antenatal and postnatal depression and anxiety, substance misuse and domestic violence. Through examination of these complex issues, students will gain knowledge of the risk factors that influence outcomes for infants, children and families. Strategies to promote emotional well being, positive parent child relationships and social support for these families is an essential learning component supported by the the concepts of targeted and specialist intervention, and early intervention. The unit has a 40 hr clinical placement in a secondary or tertiary level child and family health service where in students will gain skills in psychosocial screening for risk factors, vulnerabilities and protective factors and related developmental issues in children.

300196.2   Personal Communication Systems

Credit Points 10 **Level** 7

Assumed Knowledge

Communications Systems. Digital Communications.

....

This unit covers the design fundamentals of cellular systems, including frequency reuse, channel assignments, radio wave propagation in mobile environments, modulation techniques, coding techniques, spread spectrum and multiple access. It includes topics from emerging wireless technologies, and third-generation mobile communication systems and standards.

400774.2   Perspectives on Nursing

Credit Points 10 **Level** 7

Equivalent Units

400234 - Nursing Knowledge: Concepts, Models and Theories

Special Requirements

Students must be enrolled in a postgraduate course.

....

This unit addresses the origins and development of nursing knowledge. A major focus is the development and progress of the discipline of nursing. It includes an in-depth exploration of the history and philosophy of nursing science, including epistemology and strategies for theory generation in nursing. The impact of borrowed perspectives on research, theory and practice in the discipline of nursing is also explored. The unit also addresses the development of theoretical perspectives in nursing, including areas of controversy in the discipline. Numerous perspectives on the relationship between nursing theory, research and practice are considered. A major emphasis in the unit is development of knowledge and understanding of the link between nursing theory, research, practice and related issues.

UWS Postgraduate Handbook , 2014

Page 88

University of Western Sydney

400569.2 Pharmacology of Chinese Medicines

Credit Points 10 **Level** 7

Assumed Knowledge

Equivalent to undergraduate training in Traditional Chinese Medicine.

....

This unit will introduce the student to the pharmacology and toxicology of Chinese herbal medicine. The unit will cover the pharmacological principles of Chinese herbal medicines and identify basic active constituents that contribute to the actions of Chinese herbal medicines. This unit will also introduce safety and toxicology of herbal medicines including mechanisms and measurement of toxicity, known potential adverse reactions of commonly used Chinese herbs, known potential interactions with Western pharmaceuticals and management of adverse events.

401048.1 Physiotherapy for Chronic Illness and Disease

Credit Points 10 **Level** 7

Prerequisite

400997.1 Exercise Rehabilitation

Corequisite

401051.1 Clinical Education B (Rehabilitation) OR
401052.1 Clinical Education C (Ambulatory Care) OR
401053.1 Clinical Education D (Paediatrics) OR **401054.1** Clinical Education E (Advanced Care)

Special Requirements

Students must be enrolled in 4662 Bachelor of Health Science/Master of Physiotherapy, 4667 Master of Physiotherapy or 4668 Bachelor of Health Science (Honours)/Master of Physiotherapy.

....

This unit focuses on the role of physiotherapy in chronic disease management. A problem based learning approach will be undertaken to provide students with the theory, research and practice which underpins the assessment and treatment of people with chronic disease. The role of lifestyle factors in the development of chronic disease will be explored, along with health promotion and preventative strategies. The importance of client-centred care, which respects culture and diversity, and the multidisciplinary team approach will also be investigated in the context of frequently occurring chronic conditions.

300708.3 Planning and Development Control

Credit Points 10 **Level** 7

Assumed Knowledge

This unit assumes that the student has undertaken coursework in building construction, building surveying, engineering, architecture or a related area or has the relevant AQF qualification and gained the equivalent knowledge by working in the construction industry in an appropriate capacity for at least four years.

Incompatible Units

BG814A - Development Control, 200498 - Planning for Bushfire Prone Areas

....

This unit describes the general planning issues relevant to developments in rural and urban areas. The content covers the factors important in determining the allocation and use of land and resources together with the contributions of development to the built and natural environment. Topics include: urban and rural design issues; the impact of the 3 tiers of Government process on development control, and the legal, political and technical issues relevant to impact assessments. Particular attention will be paid to the role of the private sector in developing controls, self regulation and appeal processes. Planning in both the micro and macro environments is examined in the context of sustainability, heritage values, community resources and its strategic effects on the recycling of existing land and non-renewable natural resources. Hazardous environments such as bush fires, floods, landslip and cyclone are also considered.

400928.2 Podiatric Clinical Block

Credit Points 20 **Level** 7

Assumed Knowledge

Human Anatomy , Podiatry Pre-clinical, Podiatric Techniques 1A, 1B, 2B, 3A, 3B

Prerequisite

400930.2 Podiatric Practice 2 AND **400931.2** Podiatric Practice 3 AND **400937.2** Podiatric Techniques 2A AND **400941.1** Podiatric Techniques 3C

Special Requirements

Podiatry specific - students will be participating in patient assessment and management. It is essential that they have been able to demonstrate competencies in patient assessment, documentation, treatment programs and communication within allied health / community settings. The podiatric practice units in combination with the clinical block placement have been designed to be an integrated suite of units where one unit builds on the clinical competencies of the others. Prior to enrolling in this unit students must have: 1) submitted a Criminal Record Check form prior to 1 June 2010 or a Student Undertaking Form after 1 June 2010 and have applied for a National Police Certificate 2) submitted a Prohibited Employment Declaration prior to 1 June 2010 or a Working with Children Check Student Declaration after 1 June 2010. 3) Hold a Senior First Aid Certificate and completed the OxyViva Resuscitation and EpiPen components as administration by a work cover accredited educational body 4) NSW Health Department Category A Vaccinations

....

This unit will further develop students assessment skills encouraging the student to make the appropriate selection of assessment techniques to diagnose, treat and provide long term health outcomes especially in the public / community based patients. In this clinical unit, students will continue to participate in clinical activities under supervision in public sector placements to manage foot pathologies with increased scope of treating special populations (the high risk foot). Supporting workshop activities will be

divided into two areas: Lecture / tutorial format to prepare the student for the block placement and a final feedback session at the end of the placement.

400929.2   Podiatric Practice 1

Credit Points 10 **Level** 3

Assumed Knowledge

Functional Anatomy

Prerequisite

400933.2 Podiatry Pre-Clinical

Corequisite

400942.3 Introduction to Podiatry and Clinical Education

Equivalent Units

400141 - Podiatry Practice 1

Special Requirements

Podiatry specific - students will be participating in patient assessment and management. It is essential that they have been able to demonstrate baseline competencies in patient assessment and infection control procedures. The podiatric practice units have been designed to be an integrated suite of units where one unit builds on the clinical competencies of the others. Prior to enrolling in this unit students must have: 1) submitted a Criminal Record Check form prior to 1 June 2010 or a Student Undertaking Form after 1 June 2010 and have applied for a National Police Certificate 2) submitted a Prohibited Employment Declaration prior to 1 June 2010 or a Working with Children Check Student Declaration after 1 June 2010. 3) Hold a Senior First Aid Certificate and completed the OxyViva Resuscitation and EpiPen components as administration by a work cover accredited educational body 4) NSW Health Department Category A Vaccinations

....

This unit will introduce students to the first clinical unit in the series of 4 where students will demonstrate basic competencies in patient assessment, communication and management skills. The student will also be introduced to basic skills in mechanical therapy as part of the clinical therapies unit. In this unit students will participate in clinics as informed and guided observers, and will commence elementary assessment and diagnostic skills. The activities will be divided into four areas: new patient clinics, clinical tutorials, clinical therapies and a one-week external clinical placement at the end of semester.

400930.3   Podiatric Practice 2

Credit Points 10 **Level** 3

Assumed Knowledge

Functional Anatomy, Podiatry Pre-clinical, Podiatric Techniques 1A, 1B

Prerequisite

400929.2 Podiatric Practice 1

Equivalent Units

400145 - Podiatric Practice 2

Special Requirements

Podiatry specific - students will be participating in patient assessment and management. It is essential that they have been able to demonstrate baseline competencies in patient assessment and infection control procedures. The podiatric practice units have been designed to be an integrated suite of units where one unit builds on the clinical competencies of the others. Prior to enrolling in this unit students must have: 1) submitted a Criminal Record Check form prior to 1 June 2010 or a Student Undertaking Form after 1 June 2010 and have applied for a National Police Certificate 2) submitted a Prohibited Employment Declaration prior to 1 June 2010 or a Working with Children Check Student Declaration after 1 June 2010. 3) Hold a Senior First Aid Certificate and completed the OxyViva Resuscitation and EpiPen components as administration by a work cover accredited educational body 4) NSW Health Department Category A Vaccinations

....

This unit will further develop students assessment skills encouraging the student to make the appropriate selection of techniques (biomechanical assessments) and to introduce the student to the diagnosis and management of a variety of simple foot pathologies. In this unit, the second of the four clinical practice units, students will participate in assessments of patients under supervision and continue with the management of foot pathologies. Clincial activities will be divided into five areas: General Medicine Clinic, Biomechanical Assessment Clinical, Tutorial, Clinical Therapies and External Clinical Placement.

400931.2   Podiatric Practice 3

Credit Points 10 **Level** 7

Assumed Knowledge

Functional Anatomy, Podiatry Pre-clinical, Podiatric Techniques 1A, 1B, 2B

Prerequisite

400930.3 Podiatric Practice 2 AND **400937.3** Podiatric Techniques 2A

Equivalent Units

400152 - Podiatric Practice 4

Special Requirements

Podiatry specific - students will be participating in patient assessment and management. It is essential that they have been able to demonstrate baseline competencies in patient assessment and infection control procedures. The podiatric practice units have been designed to be an integrated suite of units where one unit builds on the clinical competencies of the others. Prior to enrolling in this unit students must have: 1) submitted a Criminal Record Check form prior to 1 June 2010 or a Student Undertaking Form after 1 June 2010 and have applied for a National Police Certificate 2) submitted a Prohibited Employment Declaration prior to 1 June 2010 or a Working with Children Check Student Declaration after 1 June 2010. 3) Hold a Senior First Aid Certificate and completed the OxyViva Resuscitation and EpiPen components as administration by a work cover accredited educational body 4) NSW Health Department Category A Vaccinations

....

UWS Postgraduate Handbook , 2014
Health and Science Schools - Postgraduate
This file was created on 12/03/2014 4:15:06 PM. Please check the online handbook for changes made after this date.

Page 90

This unit will further develop students assessment skills encouraging the student to make the appropriate selection of assessment techniques to diagnose, treat and provide long term health outcomes. In this unit, the third of the four clinical practice units, students will continue to participate in clinical activities under supervision to manage foot pathologies with increased scope of treating special population groups. Clincial activities will be divided into four areas: Clinic-general, biomechanical and surgical assessments, Tutorial, Clinical Therapies and External Clinical Placement.

400932.2   Podiatric Practice 4

Credit Points 10 **Level** 7

Assumed Knowledge

Functional Anatomy, Podiatry Pre-clinical, Podiatric Techniques 1A, 1B, 2B, 3A

Prerequisite

400931.2 Podiatric Practice 3 AND **400937.2** Podiatric Techniques 2A AND **400941.1** Podiatric Techniques 3C

Equivalent Units

400158 - Podiatric Practice 6

Special Requirements

Students must be enrolled in 4661 Bachelor of Health Science/Master of Podiatric Medicine, 4665 Master of Podiatric Medicine or 4666 Bachelor of Health Science (Honours)/Master of Podiatric Medicine. Students will be participating in patient assessment and management. It is essential that they have been able to demonstrate baseline competencies in patient assessment and infection control procedures. The podiatric practice units have been designed to be an integrated suite of units where one unit builds on the clinical competencies of the others. Prior to enrolling in this unit students must have: 1) submitted a Criminal Record Check form prior to 1 June 2010 or a Student Undertaking Form after 1 June 2010 and have applied for a National Police Certificate 2) submitted a Prohibited Employment Declaration prior to 1 June 2010 or a Working with Children Check Student Declaration after 1 June 2010. 3) Hold a Senior First Aid Certificate and completed the OxyViva Resuscitation and EpiPen components as administration by a work cover accredited educational body 4) NSW Health Department Category A Vaccinations

....

This unit will further develop students assessment skills encouraging the student to make the appropriate selection of assessment techniques to diagnose, treat and provide long term health outcomes. In this final clinical unit, students will continue to participate in clinical activities under supervision in both the Uniclinic and public sector placements to manage foot pathologies with increased scope of treating special population groups. Clincial activities will be divided into four areas: Clinic-general, biomechanical and surgical assessments, Tutorial, Clinical Therapies and External Clinical Placement.

400934.2   Podiatric Professional Practice Studies

Credit Points 10 **Level** 7

Special Requirements

Students must be enrolled in 4661 Bachelor of Health Science/Master of Podiatric Medicine or 4665 Master of Podiatric Medicine.

....

This unit will introduce students to the principles of professional development and appropriate requirements to function as a registered podiatrist. As podiatrists may work as a primary provider, as part of a multidisciplinary team, in the public or private health care setting, they require extensive knowledge of many aspects of the management of a practice or business. During a one week conference, students will be introduced to a gumut of principles specific to professional, ethical and legal issues associated with working as a podiatrist and practice and workplace administrative policies and procedures.

400935.3   Podiatric Techniques 1A

Credit Points 10 **Level** 3

Assumed Knowledge

Anatomy – structure and function of the lower extremity is important as the focus of this unit is on abnormalities of the lower limb and subsequent assessment and management of conditions of the foot and leg

Prerequisite

400881.3 Functional Anatomy AND **400933.2** Podiatry Pre-Clinical

Incompatible Units

400142 - Pathomechanics of Human Locomotion, 400144 - Podiatric Medicine

....

This unit will introduce students to clinical (practical hands on) and theoretical foundations of human biomechanics of the foot and lower extremity and the mechanics, diagnosis and treatment of pathological conditions. The unit consists of coordinated lectures and practical components to cover the introductory theory of gait analysis, relevant physical examinations (joint, muscle testing to therapeutic options), diagnosing conditions such as shin pain, foot pain (plantar fasciitis, heel spur syndrome or digital deformities) and related treatment options.

400936.3   Podiatric Techniques 1B

Credit Points 10 **Level** 3

Prerequisite

400933.2 Podiatry Pre-Clinical AND **400881.3** Functional Anatomy

Incompatible Units

400140 - Introduction to Radiology, 400143 - Musculoskeletal Disorders of the Lower Extremity

UWS Postgraduate Handbook , 2014
Health and Science Schools - Postgraduate
This file was created on 12/03/2014 4:15:06 PM. Please check the online handbook for changes made after this date.

Page 91

Special Requirements

Students must be enrolled in 4661 Bachelor of Health Science/Master of Podiatric Medicine, 4665 Master of Podiatric Medicine or 4666 Bachelor of Health Science (Honours)/Master of Podiatric Medicine.

....

This unit will introduce students to clinical and theoretical foundations of the musculoskeletal system conditions that will impact on the function of the lower extremity. Disease processes that affect the joint structure such as osteoarthritis, rheumatoid arthritis, arthropathies, gout, osteoporosis, osteomyelitis, systematic disorders and tumours will be covered. Advanced assessment evaluation will be taught that will include diagnostic techniques, eg. x-rays, ultrasound, magnetic resonance imaging and computer tomography. This will assist in the application and clinical interpretation of presenting disease processes in podiatric settings.

400937.3   Podiatric Techniques 2A

Credit Points   10 **Level**   3

Assumed Knowledge

Regional anatomy of the lower extremity is essential as students will be injecting local anaesthesia into the foot. Infection control and manual dexterity skills are essential which will be covered in Podiatric Practice 1 and Podiatry Pre-Clinical.

Prerequisite

400869.2 Human Anatomy and Physiology 2 AND **400881.3** Functional Anatomy AND **400933.2** Podiatry Pre-Clinical AND **400981.2** Clinical Pharmacology

Equivalent Units

400150 - Surgery for Podiatrists

Special Requirements

Students must hold a Senior First Aid Certificate and must have completed the OxyViva Resuscitation and EpiPen components as administered by a Work Cover accredited educational body.

....

This unit will introduce students to local anaesthesia, the theory of surgical procedures and the practice of skin and nail surgical techniques. As such, this unit allows students to assess patients suitability for administration of local anaesthesia; understand procedures involved in obtaining voluntary consent, appreciate, reasonably predict and describe the possible adverse effects of administering local anaesthesia. Surgery will focus the medico-legal requirements, principles of theatre protocol, peri-operative and post surgical management of the patient and nail and skin surgery, in preparation for student undertaking surgery during Podiatric Practice 3 and 4.

400938.3   Podiatric Techniques 2B

Credit Points   10 **Level**   3

Assumed Knowledge

400135 - Clinical Pharmacology and Microbiology. As this unit builds on the concepts presented in Clinical

Pharmacology and Microbiology, an understanding of the pharmacokinetics and dynamics of drugs is recommended.

Prerequisite

400981.2 Clinical Pharmacology

Incompatible Units

400146 - Pharmacology and Dermatology

....

This unit will introduce students to the principles of pharmacology in podiatry and further develop the understanding of drug prescription issues, with particular focus on drugs of importance to podiatry patients, drug interactions and poly pharmacological issues.

400939.2   Podiatric Techniques 3A

Credit Points   10 **Level**   7

Assumed Knowledge

Anatomy and Physiology taught in core units covering the structure and function of the human body coupled with the content about the mechanics and abnormalities in podiatric specific units with particular focus on assessment, treatment and management of the foot and leg taught in Year 3.

Incompatible Units

400147 - Paediatrics and Sports Medicine for Podiatry, 400153 - Gerontology and Neurology

Special Requirements

Students must be enrolled in 4661 Bachelor of Health Science/Master of Podiatric Medicine, 4665 Master of Podiatric Medicine or 4666 Bachelor of Health Science (Honours)/Master of Podiatric Medicine.

....

This unit will introduce students to clinical and theoretical foundations of biomechanical alignment, trauma, psychological and behavioural factors leading to pain and restricted function of the foot and lower extremity affecting daily living activities. Particular focus will be placed on the mechanics, diagnosis and treatment options of problems experienced in special populations or different age groups in normal daily activities or the sporting arena. Furthermore, this integration will enhance the previously taught assessment and diagnostic techniques in the development of appropriate management and treatment programs of the lower extremity in different populations.

400940.2   Podiatric Techniques 3B

Credit Points   10 **Level**   7

Assumed Knowledge

As this unit builds on the concepts presented in Clinical Pharmacology, an understanding of the pharmacokinetics and dynamics of drugs is recommended.

Incompatible Units

400146 - Pharmacology and Dermatology

Special Requirements

Students must be enrolled in 4661 Bachelor of Health Science/Master of Podiatric Medicine, 4665 Master of

UWS Postgraduate Handbook , 2014
Health and Science Schools - Postgraduate
This file was created on 12/03/2014 4:15:06 PM. Please check the online handbook for changes made after this date.

Page 92

Podiatric Medicine or 4666 Bachelor of Health Science (Honours)/Master of Podiatric Medicine.

....

This unit will introduce students to clinical and theoretical foundations of dermatology including the function and structure of the skin, assessment, diagnosis, aetiological factors and the management of disorders of the skin, with particular emphasis on common foot conditions.

400941.2 Podiatric Techniques 3C

Credit Points 10 **Level** 7

Assumed Knowledge

Anatomy and Physiology taught in core units covering the structure and function of the human body coupled with the content about the mechanics and abnormalities in podiatric specific units. There will be a particular focus on pharmacological aspects in podiatric settings involving assessments, treatment and management of the foot and leg taught in Year 3.

Incompatible Units

400151 - The High Risk Foot, 400153 - Gerontology and Neurology

Special Requirements

Students must be enrolled in 4661 Bachelor of Health Science/Master of Podiatric Medicine, 4665 Master of Podiatric Medicine or 4666 Bachelor of Health Science (Honours)/Master of Podiatric Medicine.

....

This unit will introduce students to clinical (practical hands on) and theoretical foundations of the management of the high risk foot. The unit consists of coordinated lectures and practical components to cover the overview of systemic conditions covered in pathophysiology and will explore the management of the foot and lower extremity manifestations associated with vascular, endocrine, neurological and immunosuppression. Particular emphasis will be placed on the foot at risk and podiatry assessment, diagnosis and management in context of a health profession team management approach. Diagnostic assessment techniques, both clinical and laboratory based will be covered. Infection control, wound classification and wound care management will be discussed in detail.

400238.2 Policy, Power and Politics in Health Care Provision

Credit Points 10 **Level** 7

Assumed Knowledge

Foundations of nursing knowledge, legal and ethical issues in nursing, fundamentals of research, proficiency in academic reading and writing, ability to conceptualise practice within the context of the relevant discipline's professional competencies. Eg: the discipline of nursing within the context of the Australian Nursing Council competencies.

Equivalent Units

HC815A - Policy, Power and Politics in Health Care Provision

Special Requirements

Students must be enrolled in a postgraduate course.

....

This unit enables students to gain an understanding of the political and social constructions that underpin health care services. It also provides students with the opportunity to explore and critically analyse issues related to the development, implementation and outcomes of health and aged care policies.

400238.3 Policy, Power and Politics in Health Care Provision

Credit Points 10 **Level** 7

Equivalent Units

HC815A - Policy, Power and Politics in Health Care Provision

Special Requirements

Students must be enrolled in a postgraduate course. Students enrolled in course 4673 must have passed the following three units before they can enrol in this unit - 400220 Contemporary Professional Practice in Mental Health Nursing and 400206 Evidence-based Nursing and 400235 Leadership in Clinical Practice.

....

This unit enables students to gain an understanding of the political and social constructions that underpin health care services such as social determinants of health. It also provides students with the opportunity to explore and critically analyse issues related to the development, implementation and outcomes of health and aged care policies.

400995.2 Port Entry

Credit Points 10 **Level** 7

Special Requirements

Must be an advanced trainee in Obstetrics & Gynaecology undertaking a fellowship at Blacktown Hospital. Students undertaking this unit must be enrolled in 4690 M Surgery in Advanced Gynaecological Surgery

....

This unit will extend their knowledge in theoretical and practical terms so that they can safely and effectively establish ports for laparoscopic surgery.

400996.1 Power Modalities

Credit Points 10 **Level** 7

Special Requirements

Must be an advanced trainee in Obstetrics & Gynaecology undertaking a fellowship at Blacktown Hospital. Students undertaking this unit must be enrolled in 4690 M Surgery in Advanced Gynaecological Surgery

....

This unit will facilitate the acquisition of knowledge both practical and theoretical for students to enable them to safely use power modalities in laparoscopic Gynecological surgery.

UWS Postgraduate Handbook , 2014
Health and Science Schools - Postgraduate
This file was created on 12/03/2014 4:15:06 PM. Please check the online handbook for changes made after this date.

Page 93

Units

University of Western Sydney

300197.2 Power System Planning and Economics

Credit Points 10 **Level** 7

....

This unit covers planning techniques for energy and electrical power systems. It also covers the economics of various options and reliability of electrical power systems.

400412.2 Primary Health Care and its Applications

Credit Points 10 **Level** 7

Equivalent Units

HC814A - Fundamentals of Primary Health Care, HC807A - Applications of Primary Health Care

Special Requirements

Students must be enrolled in 4569 Master of Primary Health Care or 4570 Graduate Diploma in Primary Health Care.

....

This unit explores the impact and relevance of Primary Health Care in its context as a World Health Organization (WHO) strategy for achieving "Health for All". It examines the ways in which Primary Health Care, along with other significant WHO initiatives, provides a framework for the organisation of just and humane health care systems and provides an opportunity for detailed discussion of the complex factors that impact on the health status of populations. The integration of associated theoretical concepts will enable an understanding of the complex dimensions of health and well-being to evolve and then to inform health care practices and the planning of programs that can lead to sustainable health within a primary health care framework.

300578.3 Professional Development

Credit Points 10 **Level** 3

Assumed Knowledge

Understanding of systems analysis and design.

Equivalent Units

300372 - Professional Preparation and Project Management

Special Requirements

Successful completion of 140 credit points. For students enrolled in 3663 Graduate Certificate in Health Informatics, 3645 Graduate Diploma in IT and 3646 Graduate Certificate in ICT this pre-requisite is not applicable.

....

This is a final year unit that builds on foundation and intermediate computing units to prepare students for professional experience. The unit covers the content in three modules as 1) Ethics and Professional Code of Conduct, 2) Project Management, and 3) Legal, Social, Environmental issues, Quality Assurance and IT Compliance. The content covered in these three modules are carefully designed to fill in the gaps in knowledge that is not so far covered in previous units in preparing students for the challenging projects units and professional working

life ahead. This unit is a pre-requisite to the capstone project, covered in Professional Experience Project unit.

400925.1 Professional Reasoning

Credit Points 10 **Level** 7

Special Requirements

Students must be enrolled in courses 4663 - Bachelor of Health Science/Masters of Occupational Therapy and 4664 - Master of Occupational Therapy. To undertake this unit, students must comply with the following special requirements: Prior to enrolling in this unit students must have: 1) successfully completed an approved Child Protection Workshop 2) submitted a Prohibited Employment Declaration prior to 1 June 2010 or a Working with Children Check Student Declaration after 1 June 2010 3) possess a current WorkCover Authority approved First Aid Certificate.

....

This final year unit focuses on the transition from student to practitioner. The aim of this unit is to provide students with learning opportunities that will consolidate and enhance their competence in professional practice throughout their career. Professional competencies of central concern include advanced clinical reasoning skills, evidence based-practice, reflective practice, personal and career management strategies, self-directed and life long learning. These competencies contribute positively to the effective management of graduates clinical practice in various work contexts, and their future career paths. Acquisition of such skills will allow the graduate to direct and adapt to change in these areas.

400850.2 Professional Topic

Credit Points 10 **Level** 7

Special Requirements

Director of Academic Program/Course Advisor permission is needed for students to be accepted into this unit as it is resource intensive of staff time. Only academically capable students aiming to enrol in a research higher degree after graduating from the Master of Health Science will be accepted.

....

This unit is designed to allow high achieving students who have an interest in potentially undertaking higher degree research after graduation the opportunity to comprehensively explore a relevant topic of interest to them.

300580.2 Programming Fundamentals

Credit Points 10 **Level** 1

Equivalent Units

300405 - Fundamentals of Programming, 300155 - Programming Principles 1, 200122 - Business Application Development 1, 700008 - Programming Fundamentals (UWSC)

....

As a first unit in computer programming, Programming Fundamentals covers the basics of developing software with an emphasis on procedural programming. Students will learn about basic data structures, the concept of

UWS Postgraduate Handbook , 2014
Health and Science Schools - Postgraduate
This file was created on 12/03/2014 4:15:06 PM. Please check the online handbook for changes made after this date.

Page 94

algorithms, fundamental programming constructs, common programming language features and functions, program design and good programming style. A high level programming language is combined with a highly visual framework to teach problem solving using software.

400858.3 Psychopharmacology for Advanced Practice Mental Health Nurses

Credit Points 10 **Level** 7

Assumed Knowledge

Students are expected to have a working knowledge of mental health assessment and treatment procedures, including basic pharmacological principles and knowledge of drugs used for mental illnesses and disorders.

Prerequisite

400238.3 Policy, Power and Politics in Health Care Provision AND **400777.3** Leadership for Quality and Safety in Health Care AND **400957.2** Biological Considerations in Mental Health and Mental Illness for Advanced Practice

Special Requirements

Students must be enrolled in 4673 Master of Mental Health Nursing (Nurse Practitioner). Students must be working in mental health services at an advanced clinical practice level and must nominate a primary supervisor/mentor/assessor a clinical support group.

....

This unit examines pharmacological principles including functional neuroanatomy review, pharmacokinetic principles, pharmacodynamic principles, and neuropharmacology. Students examine a number of psychotropic drugs: antipsychotic, mood stabilisers, complementary medicines, drugs of abuse/misuse, antidepressant, anxiolytic and hypnotic drugs in relation to targeted symptoms, titration, side-effects, and monitoring of clients from across the lifespan. Decision-making in psychopharmacology with development of decision algorithms is explored. The importance of appropriate collaborative processes between the nurse practitioner, clients across the lifespan and their families in medication management is addressed.

400416.2 Public Health, Policy and Society

Credit Points 10 **Level** 7

Equivalent Units

E7229 - Health Management: Policy and Society, E7305 - Health Management Policy and Society

Special Requirements

Students must be enrolled in a postgraduate course.

....

This unit examines the nature of public health and develops a systemic understanding of various public health policy frameworks and issues. The unit provides the context and history for understanding public health approaches, explores the cultural and social dimensions of health and illness and the economic and political environment in which health policies and strategies are developed and implemented. The unit advocates a view of health that includes an implicit recognition of the physical, social and economic environment, affirms the importance of social justice and equity in health care, and emphasises the importance of inter-sectoral collaboration.

400842.2 Quality and Safety in Health Care

Credit Points 10 **Level** 7

Equivalent Units

400777 - Leadership in Quality and Safety in Health Care

....

Health care managers and clinicians are responsible for the quality and safety of patient care within their units. To introduce a culture of safety they must understand and work within current policy, surveillance and governance strategies. In this unit students will study the cultural and governance environments within which quality and safety systems are introduced in health care. Students will also develop skills required to effectively use the tools available for managing and monitoring quality and safety issues within their workplace.

300677.2 Safety and Risk Management

Credit Points 10 **Level** 7

Assumed Knowledge

Recognition that OHS procedures are legislatively required at the workplace and the ability to recognise the need to protect workers from harm at the workplace. Knowledge of the basics of OHS legislation in the students' jurisdiction.

Equivalent Units

300390 - Safety Management. 300395 - Risk Assessment

....

This unit provides a critical insight into the theory and practice of managing safety and health at the workplace with a dual focus on risk management and safety management. Students have the opportunity to develop a safety systems approach concentrating on hazard identification, risk assessment and devising control measures incorporating safety management principles. Safety culture and its influence on OHS practice is also detailed. In addition, the unit addresses the legal underpinning of OHS requirements at the workplace. Labour market change and the role of government, unions and employer organisations are also examined. Global perspectives on OHS from various jurisdictions ranging from the USA, Hong Kong and China are also scrutinised.

300742.2 Science and Health Research Project PG

Credit Points 20 **Level** 7

Corequisite

300398.2 Methods of Researching OR **300411.3** Research Methodology and Experimental Design

Equivalent Units

EH850A - Masters research project, HT801A - Research Project 811, HT805A - Research Project 821, HT807A - Research Project 831, HT807B - Research Project - Science, HT808A - Research Project 841, 300687 - Science Research Project PG

Units

UWS Postgraduate Handbook , 2014
Health and Science Schools - Postgraduate
This file was created on 12/03/2014 4:15:06 PM. Please check the online handbook for changes made after this date.

Page 95

Special Requirements

Enrolment in this unit by non-Master of Science or Master of Health Science students requires permission from the Director, Academic Program.

....

This unit develops critical and analytical skills by undertaking and completing a research project in an area of relevance. The project is carried out on an individual basis. Research projects are offered in consultation with staff who possess research interests and experience in relevant areas.

300770.2 Software Testing and Automation

Credit Points 10 **Level** 7

Assumed Knowledge

Knowledge about: Software Development Life Cycle; Programming knowledge in one of the Object Oriented programming language for e.g. Java, C++; Scripting Language such as Java Script

....

Software Testing and Automation will cover topics in two sections - Fundamentals of Software Testing and Test Automation. Section 1 will enable students to get a good understanding of different types of testing, the entire life cycle of Testing; how to design and prepare Test Cases, Test Data, execute these Test Cases and manage the defects. Students will also learn the importance of exclusive Test Environment for Testing and how to create a Traceability Matrix relating Requirements to Test Cases. Since approaches to testing software have also evolved with rigorous systematic approaches and advanced tools to automate some of the testing tasks. Section 2 will expose students to Test Automation using an automation tool, Object mapping and repository creation, Exception handling, logging and reporting, and Creation and Execution of Automation scripts.

51109.3 Strategic Analysis and Decision-Making

Credit Points 10 **Level** 7

Incompatible Units

U51050 - Strategic Management

Special Requirements

Students must be enrolled in a postgraduate program.

....

Strategic management processes determine the direction of an enterprise and its viability in the light of the changes in its environments. This unit examines strategic management processes, recognising the interests of stakeholders and a range of external and internal constraints. It critically examines the major theoretical approaches to strategy and emerging trends. A strong emphasis is on the application of knowledge to industry and organisational contexts relevant to the student. Participants research and analyse how decision-making processes, leadership, and organisational politics impact on the strategy process. A dynamic, contingent and contested view of contemporary strategic management processes is presented.

400838.1 Supporting Individuals and Communities in Crisis

Credit Points 10 **Level** 7

Special Requirements

Students must be enrolled in 4569 Master of Primary Health Care or 4570 Graduate Diploma in Primary Health Care.

....

The planning, development and implementation of primary health care initiatives rest largely on the capacity of health care workers to develop and engage in partnerships with a diverse range of consumers, health care workers and organisations. In this unit students will critically examine the complexities inherent in developing and sustaining effective and active partnerships with individuals and groups in primary health care contexts. The interpersonal, cultural and socio-political issues that shape communication and the development of partnerships will be examined. Current approaches used to plan for and respond to crises, emergencies and disasters at an individual, organisational and community level will also be explored.

400847.3 Surveillance and Disaster Planning

Credit Points 10 **Level** 7

Assumed Knowledge

Prior qualification in above field. Health or mental health professionals, nurses, social workers, psychologists, medical practitioners.

Special Requirements

Students must be enrolled in a postgraduate course.

....

This unit will address the psychosocial and mental health aspects of disaster management, the systems of disaster response and how these aspects are relevant across the all-hazard approach to Prevention, Preparation, Response and Recovery (PPRR). It will address the current evidence and understanding of this field, leadership and management across the PPRR spectrum and the public health, clinical and other coordination in terms of impact and outcome. It will deal with Australian requirements and systems as well as international and Australian roles in the region. It will utilise on-line resources, a specifically developed handbook, assignment and desktop exercises.

300939.1 Sustainability and Risk Engineering (PG)

Credit Points 10 **Level** 7

Assumed Knowledge

Engineering problem solving skills.

....

Analysis of sustainability with engineering perspective is increasingly becoming important in the modern world. Also, in the future sustainability will include risk engineering. Hence, engineers with in-depth understanding of different tools that can be used for both sustainability and risk analysis will have significant competitive edge in their future career. The main objective of this unit is to introduce

UWS Postgraduate Handbook , 2014
Health and Science Schools - Postgraduate
This file was created on 12/03/2014 4:15:06 PM. Please check the online handbook for changes made after this date.

Page 96

different tools available for sustainability and risk analysis in various engineering applications. The content includes renewable/alternative energy systems, energy/resource efficiency, sustainable/green buildings, sustainable transport and infrastructure, sustainable water management, environmental management systems, sustainability reporting, life cycle analysis, probability/reliability theory, risk assessment models, overall system analysis.

300206.2   Sustainable Design

Credit Points 10 **Level** 7

....

The dramatic socio-cultural change required to address sustainability imperatives demands practical, adaptive, proactive and precautionary innovation from a wide range of disciplines. Sustainable Design is a multi-disciplinary unit which explores the challenges faced by post-industrial cultures. It develops forward-thinking and collaborative problem-solving skills to enable students to envision and implement change in their own disciplinary contexts. Sustainable Design investigates the socio-cultural drivers that potentially endanger or improve upon the future of human health and environmental sustainability. This unit provides a unique opportunity for postgraduate students from different fields to come together and apply their skills and knowledge to wider human and environmental problems.

300977.1   Systems Analysis and Database Management Systems

Credit Points 10 **Level** 7

....

The main purpose of this unit is to provide students with an opportunity to gain knowledge and experience of developing a business information system in a systematic way. This unit examines the general methodology of systems development life cycle, including different phases and various modeling techniques. The unit specialises in the development of a full systems analysis and design documentation by using system development methodologies, including data analysis and modeling methods. It extensively covers database design techniques where students will use a set of business rules obtained from requirements and use case analysis, and database implementation using a commercial database management system. At the same time, student learning, intercommunication and collaborative working skills are enhanced by student participation in tutorial presentations and group assignments.

300585.2   Systems Analysis and Design

Credit Points 10 **Level** 1

Assumed Knowledge

Students should have knowledge of the fundamentals of information systems, computer systems, computer applications and information processing

Equivalent Units

300131 Introduction to Analysis and Design; 700013 Systems Analysis and Design (UWSC)

....

This unit introduces the concepts of System Analysis and Design. The study of methodologies and techniques for problem recognition, requirement analysis, process modelling and/or data modelling are essential elements of this unit. The Systems Development Life Cycle model is employed as the prime approach to teach the unit, providing students with the basic skills required for analysis and design of logical solutions to information systems problems. The use of Computer Aided System Engineering tools will be discussed in practical sessions.

300696.2   Systems and Network Security

Credit Points 10 **Level** 7

Assumed Knowledge

Basic knowledge of networked and computer systems. Basic understanding of cryptography.

Equivalent Units

300253 - Distributed Systems and Network Security

Special Requirements

Students must be enrolled in a postgraduate course.

....

This unit is concerned with the protection of information in computing systems and when transferred over networks. It addresses techniques for securing networking applications and their security arrangements. Students gain an understanding of the fundamentals of the provision of security in networks and systems, as well as an appreciation of some of the problems that arise in devising practical security solutions.

300582.2   Technologies for Web Applications

Credit Points 10 **Level** 2

Assumed Knowledge

Basic programming principles and program control structures equivalent to that covered in Programming Fundamentals. Basic file management and PC operation including how to access and search the World Wide Web.

Prerequisite

300580.2 Programming Fundamentals

Equivalent Units

300129 - Interactive Web Site Development, J2826 - Internet and Web Communications, D2826 - Internet and Web Communications

Incompatible Units

300101 - Creating and Managing Web Sites, CP108A - Principles of the Internet, 101180 - Web and Time Based Design

....

Building on material covered in Programming Fundamentals this unit introduces students to some of the key technologies for developing interactive and dynamic web applications from both the client and server perspective. The unit covers web site design, web site development, web page accessibility and usability, HTML, CSS, client side and server side scripting, database

interaction, web site promotion (Search Engine Optimisation) and web security.

400807.2 Transforming Nursing Practice

Credit Points 10 **Level** 7

Assumed Knowledge

This unit has the potential to form links with previous assignment topic areas of units in the course for further development at a more comprehensive level.

Special Requirements

Students must be enrolled in a postgraduate course.

....

The transformation of nursing practice is facilitated when information about creative and innovative practice change and development is documented, disseminated and critiqued through professional channels such as peer reviewed journals, conference papers, discussion papers or project reports. In this Unit students will be provided with an opportunity to produce a scholarly piece of work that will disseminate information about innovative and creative solutions for transforming practice and improving patient care. Each student will select a topic of interest and examine an issue or aspect of practice to present a comprehensive and scholarly paper as a report, discussion paper, manuscript for publication or conference paper for presentation in which professional practice implications and recommendations are articulated. The Unit aims to enhance scholarly communication skills, provide a vehicle for demonstrating leadership by informing the profession of innovative and creative solutions for transforming practice

300443.2 Web Engineering

Credit Points 10 **Level** 7

Assumed Knowledge

Ability to develop simple static web sites. Knowledge about server-side and browser-side scripting.

Equivalent Units

300251 - Web Application Development

Special Requirements

Students must be enrolled in a postgraduate course offered by the School of Computing, Engineering & Mathematics.

....

Today organizations extensively rely on web based information systems to market, sell, manage customer relations, and for most of the internal operations. Users are increasingly using mobile devices to interact with this information. Due to rapidly changing business environment these systems need to be designed in away to accommodate the frequent changes. New technologies and frameworks have been developed to support development of large, complex, mobile based, maintainable and evolutionary web systems. In this unit students will study some of these technologies, design methods and frameworks that can be successfully used to engineer such web systems. They will get hands on experience by developing such a system.

300693.2 Web Technologies

Credit Points 10 **Level** 7

Assumed Knowledge

The students should be familiar with the fundamentals of computer architecture and programming principles. They should also have a working knowledge of the World Wide Web.

Special Requirements

Students must be enrolled in a postgraduate course

....

The Internet and the World Wide Web have now become part of our everyday life. Initially, in the early 1990's Web technologies consisted of only the markup language HTML and the transmission protocol HTTP. Now they include a variety of client-side and server-side technologies with fresh developments on a continual basis. This unit introduces students to Web technologies and, along with Network Technology, is a core unit for the Master's course in Information and Communications Technologies. The unit focuses on Web page and site design, markup languages, standards, protocols, client-side technologies such as CSS and scripting languages, server-side technologies like Web servers, programming languages and databases, authoring tools, and legal, ethical and social issues. It also includes the use of multi-media, the principles of intranets and extranets, security, and access rights. This unit is heavily orientated towards practical experience based on amplifying the theoretical concepts. The unit will cover the role of the W3 Consortium and possible future trends.

300389.2 Wireless Networking

Credit Points 10 **Level** 7

Assumed Knowledge

Students should be familiar with the fundamentals of computer networking and data communications. In particular, they should have a good understanding of the OSI model, the Internet protocol suite and current internet and networking technologies equivalent to satisfactory completion of an introductory networking unit at the undergraduate level such as 300086 offered at UWS or one year professional experience in networking. The unit is at an advanced level and students would not be able to complete the unit successfully unless they have a good understanding of fundamental issues in computer networking, Internet protocol suite and Internet technologies.

Special Requirements

Students must be enrolled in a postgraduate or honours course offered by the School of Computing, Engineering & Mathematics.

....

Wireless technologies are amongst the most exciting and rapidly growing areas in computing and information technology. They implement applications that profoundly impact our personal way of communication, as well as how business in a variety of industries and organisations are conducted. This unit goes into details of such issues. It discusses wireless networking technologies and their related applications. The main features of wireless and

Page 98

mobile communication systems and the networked services that are based on these systems are also presented. The unit provides students with an in-depth understanding of relevant protocols, the emerging standards and standard organisations. The students are also introduced to some of the relevant current key research issues of the field.

400570.3 Women's Health in Chinese Medicine 1

Credit Points 10 **Level** 7

Assumed Knowledge

Assumed knowledge equivalent to undergraduate training in Traditional Chinese Medicine. Students must have completed a minimum of two years training in raw Chinese herbal medicine prescribing as part of their overall undergraduate training.

Equivalent Units

400570 - Women's Health in Chinese Medicine 1

....

This unit enables practitioners to extend their understanding of a range of gynaecological and obstetric disorders and to diagnose and treat these using acupuncture and patent herbal medicines. The clinical focus of this unit is on the integration of Traditional Chinese Medicine (TCM) in the treatment of disorders of the menstrual cycle, obstetric disorders, menopause and breast disease.

400571.3 Women's Health in Chinese Medicine 2

Credit Points 10 **Level** 7

Assumed Knowledge

Assumed knowledge equivalent to undergraduate training in Traditional Chinese Medicine. Students must have completed a minimum of two years training in raw Chinese herbal medicine prescribing as part of their overall undergraduate training.

Equivalent Units

400571 - Women's Health in Chinese Medicine 2

....

This unit enables practitioners to extend their understanding of a range of gynaecological and obstetric disorders and to diagnose and treat these primarily using Chinese herbal medicine. The clinical focus of this unit is on the integration of Traditional Chinese Medicine (TCM) in the treatment of complex disorders of the menstrual cycle, infertility, obstetric disorders, menopause, pelvic and breast disease.

300692.2 Workflow Management Systems

Credit Points 10 **Level** 7

Assumed Knowledge

Students are expected to have basic knowledge of computer systems, software architectures, web technologies such as HTML and XML and client server architectures. In addition, students are anticipated to have studied information systems development concepts or worked in systems development projects. Further, students

should have a high interest and capability to read and comprehend the research literature, and explore interdisciplinary research.

Special Requirements

Students must be enrolled in postgraduate course

....

This unit covers the both theoretical and practical concepts in the rapidly growing area of Workflow Management System (WfMS). In the current global economy, organisations are investing significantly into WfMS to gain a competitive advantage. With such investments comes the need for an ICT workforce that can use, manage, and create WfMS. Therefore, the objective of this unit is to provide skills and knowledge in: process modelling techniques, system architecture of WfMS, service oriented paradigm in WfMS, workflow analysis, workflow performance analysis, making workflow systems adaptive, process intelligence, and evaluation of ROI of workflow automation efforts.

300437.2 XML and Web Services

Credit Points 10 **Level** 7

Assumed Knowledge

Ability to develop web sites; knowledge of server-side and browser-side scripting.

Special Requirements

Students must be enrolled in a postgraduate course offered by the School of Computing, Engineering & Mathematics.

....

Web Services is a fast growing area of web-based application development. It goes further than, and is built upon, web site and enterprise-wide applications, which have been the main focus of web development so far. Web services go beyond the boundaries of a single organisation and make it possible to seamlessly bind several applications from one or more organisations to give a consolidated or unified service to users. The challenges to application development thus come from multiple sources and are more complex than until now. There are new technologies, protocols and standards to master and issues like security, trust and performance to address that again transcend the normal organisational limits. In a layered approach to understand web development, if layer one is web site, then layer two is web-based application within an enterprise and web services form layer three, straddling one or more applications, not all of them necessarily web-based and one or more organisations. This unit will cover the technologies, standards and protocols essential for web services and the issues that must be addressed for their success.
