

CART 7019 WRITING PROCESS

Credit Points 10

Legacy Code 102499

Coordinator George Haddad ([https://directory.westernsydney.edu.au/search/name/George Haddad/](https://directory.westernsydney.edu.au/search/name/George%20Haddad/))

Description In Quarter 4 2023, this subject is replaced by CART 6006 - Creative Non-Fiction. This subject will consider elements of the physical world around us: the phenomena we inhabit which form our sense of self. Focusing on literature and how meaning is created in literary form the subject will consider the interaction between the created world and the real world. It will focus on method and process in writing. In doing this it will engage with ideas from a number of areas, including science, philosophy, and literary theory in considering particular aspects of both our interaction with world, and how it shapes us, and the manner in which art shapes and forces itself upon the world. A specific theme related to the process of creation in art will be addressed.

School Humanities & Comm Arts

Discipline Creative Arts, Not Elsewhere Classified.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Apply phenomenological methods to the analysis of everyday experience
2. Characterise how conceptual approaches from the sciences might be integrated with artistic or cultural expression
3. Reflect upon the nature of the interaction between ideas and bodies
4. Generate a creative or critical piece of writing that considers the nature of the interaction between the natural world and the worlds expressed in imaginative forms
5. Analyse the different and complimentary potentials of thinking in science and thinking in the arts
6. Contrast the descriptions of the world possible through art and science.

Subject Content
