ELEC 2017 REQUIREMENTS AND DESIGN WORKSHOP

Credit Points 10

Legacy Code 301346

Coordinator Richard Yang (https://directory.westernsydney.edu.au/
search/name/Richard Yang/)

Description This subject will be offered at Engineering Innovation
Hub - Hassall St, Parramatta campus. This subject has a series of
software engineering workshops designed to teach students to work
in teams and apply their knowledge to solve real-life problems. These
workshops offer students opportunities to concentrate on software
requirements analysis and design issues including artefacts produced
as well techniques and tools to support this process (brainstorming,
problem statements, requirements elicitation, producing design
documents and prototyping). In addition, it provides students with
some teamwork skills, requirements engineering and design techniques
that an engineer would use in the early stages of the development
process. The students are also getting experience on different aspects
of designing a Web application with a major focus on the front-end.
