**Description** Indigenous languages have a growing profile in Australian life. Indigenous languages now feature across the media, literature, performing arts, environment and land management, education, and the corporate world. Western Sydney University acknowledges Dharug people as the traditional custodians of the land where several campuses are located, but relatively few people have had the chance to learn Dharug language. In this subject, students - Indigenous, non-Indigenous Australian and international students alike - have the opportunity to learn about the richness of Australian Indigenous languages, by learning to speak, listen, read and write some Dharug. The subject showcases the diversities and commonalities across Australian Indigenous languages, cultures and histories, the how and why of language revitalisation activities, and ways that everyone can play a role.
