

NATS 3027 LABORATORY QUALITY MANAGEMENT

Credit Points 10

Legacy Code 300883

Coordinator Sadegh Niaziesfyani (<https://directory.westernsydney.edu.au/search/name/Sadegh.Niaziesfyani/>)

Description This capstone subject is directed towards the accreditation of a laboratory for chemical, microbiological or forensic testing, using the standards that are applicable in industry. The subject focuses upon the importance and coordination of good laboratory management, teamwork, calibration, record keeping and laboratory manuals. Groups of students are required to develop, establish and operate a comprehensive Laboratory Quality Management system designed for a specific class of chemical, microbiological or forensic test. The students' technical competence and quality system are then assessed using the guidelines laid down by the National Association of Testing Authorities (NATA).

Level Undergraduate Level 3 subject

Equivalent Subjects NATS 3029 - Laboratory Quality Management

Restrictions

Successful completion of 120 credit points

Assumed Knowledge

A demonstrated understanding of and competence with laboratory techniques in analytical chemistry or microbiology, corresponding to successful completion of a Level 2 Microbiology or Analytical Chemistry subject.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Describe the nature and importance of a Laboratory Quality Management System, and the operation of ISO/IEC 17025.
2. Design and follow a laboratory quality management system for the accomplishment of a specific chemical, forensic or microbiological test.
3. Develop quality-management documentation, including sections of a Laboratory Quality Manual, in accordance with ISO/IEC 17025, including policies and procedures.
4. Solve operational problems in a laboratory context.
5. Explain the importance of method validation, calibration procedures, traceability of results, Quality Assurance and Quality Control.
6. Develop appropriate technical skills for working in an accredited chemical, forensic or microbiological testing laboratory.
7. Work constructively within a team.
8. Learn independently, without direct supervision by academic staff.

9. Report on the experience of being assessed by an external accreditation body (NATA).
10. Handle chemical substances and/or micro-organisms safely, and critically evaluate the risks associated with laboratory work, in the context of Work, Health and Safety practices and legislation.

Subject Content

1. Designing and working within a well-defined organisational structure;
2. Developing, establishing and operating a laboratory quality management system designed for a specific class of chemical, microbiological or forensic test;
3. Preparing a Laboratory Quality Manual in accordance with ISO/IEC 17025 and the relevant Field Application Documents from the National Association of Testing Authorities (NATA);
4. Understanding and following NATA laboratory accreditation guidelines.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Type	Length	Percent	Threshold	Individual/ Group Task	Mandatory
Professional Task	2 hours	40	N	Individual	Y
Professional Task	1000-1500 words	10	N	Individual	Y
Applied Project	Monitored throughout the semester	30	N	Group/ Individual	Y
Viva Voce	30 minutes	10	N	Individual	Y
Peer Review	2 pages	10	N	Individual	Y

Teaching Periods

Spring (2025)

Hawkesbury
